**ANSTRUTHER TO CUPAR.** *Reverse.*—Leave as by Route 181, but bear to *r.* at fork just beyond the town, cross the R. Eden, and pass the rly. Keep forward over cross-roads at Pitscottie, and avoid all branch-roads. At Radernie keep to *r.*, and keep forward at Largoward. On meeting road at right-angles, E. of Colinsburgh, bear *L.*, and follow the road as described in a note to Route 195, to Anstruther.

**ROUTE 198. CUPAR TO CRAIL.**

Like all the roads in the interior of Fifeshire, this route consists of a series of varying undulations, and has no particular attractions. The surface throughout is fairly good.

ANDREWS<br>(Town Hall.) | $1\frac{1}{2}$          | $9\frac{3}{4}$ |                                                                                                                                                                                                                                                                                                                                                                                             |

**ANSTRUTHER TO ST. ANDREWS.** *Reverse.*—Route 200 (reverse) to fork  $1\frac{1}{2}$  m. out. Here bear *r.* and keep forward over all cross-roads to Anstruther. Cross Route 195 and go forward into Easter Anstruther.

## ROUTE 200. CAIL TO ST. ANDREWS.

An easy road to near Boarhills, where there is an ascent of  $\frac{3}{4}$  m. This is not difficult, however, and the view from the road-level at the top of the hill is extensive. Surface good until entering St. Andrews, when it becomes a trifle lumpy. This is one of the pleasantest roads in Fife, on a bright, clear, breezy day, with a side-wind blowing off shore.

**CRAIL TO ST. ANDREWS.** *Reverse.*—Proceed eastwards along South St., turn sharp *r.* down Abbey St., at end of which bear *L.*, by Abbey Walk, to Shore Br. At fork-roads bear *L.* Near Boarhills turn sharp *r.*, and then *L.* in  $\frac{1}{4}$  m., and cross the Kenly Burn. Thence an easily-followed road to Crail.

**ROUTE 201. PERTH TO ABERDEEN.**

(Via Dundee and Arbroath.)

A splendid main road with excellent surface; fairly level to Arbroath, becoming hilly between Arbroath and Montrose, and with some sharp gradients of no great length between the latter place and Aberdeen. Fine coast scenery north of Montrose.

| <i>Miles from<br/>Aberdeen.</i> | <i>Places on the<br/>Road.</i> | <i>Mileage.</i>                  |               | <i>General description of the Road.</i>                                                                                                                                                                                                                                                                                                     |

| 70                              | Invergowrie .....                       | 2 $\frac{1}{2}$                  |                  | which village it is level. Gradual descent for 2 m. and rise past Invergowrie into Dundee. Tramlines are met on entering Dundee. Proceed along Perth Rd. to High St.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |
| 66                              | <b>DUNDEE</b> .....<br>(Town House.)    | 4                                | 22               | Leave by Reform St. (opposite Town House), turn to <i>r.</i> in Meadowside Rd. for a short distance, then bend to <i>l.</i> , proceeding northwards, and passing Albert Institute and Royal Exchange on <i>l.</i> ; cross Bell St., and bear to <i>r.</i> along Victoria Rd., Victoria St., and Arbroath Rd. Ascent out of the city; at fork-streets bear to <i>r.</i> Tramlines are followed to the terminus. Road becomes level but rough with local traffic, but improves towards Muirdrum, for some distance before which place it is undulating. Muirdrum is the only village on this stage.                                                                                     |
| 55                              | Muirdrum .....                          | 11                               | 33               | From this village the road descends gradually to Elliot jun., where a line of rails is crossed on the level; rough as a rule. Railway embankment runs beside road on <i>r.</i> for a short distance; pass under br. to <i>r.</i> , and turn again to <i>r.</i> a short distance further, entering the High St. by way of the harbour. Good surface.                                                                                                                                                                                                                                                                                                                                   |
| 49                              | <b>Arbroath</b> .....<br>(Harbour.)     | 6                                | 39               | Pass up High St. over rough paving as far as the Abbey ruins, where turn to <i>r.</i> (Route 213 enters on <i>l.</i> beyond the Abbey.) Ascent to beyond Marywell, followed by easy decline to level before Inverkeilor. A winding descent of $\frac{1}{2}$ m. to Lunan Water should be carefully ridden. Ascent, sharp at first, then more gradual for 3 m., followed by 1 m. of undulating road, then quick descent, not dangerous, to junction with Route 214 (on <i>l.</i> ). Pass under rly. br. and cross R. Esk by the narrow stone br. to <i>l.</i> , beyond which, pass over suspension br. and along Bridge St., a broad and level road leading into High St. Good surface. |
| 44                              | Inverkeilor .....                       | 5 $\frac{1}{2}$                  |                  | Ascent, sharp at first, then more gradual for 3 m., followed by 1 m. of undulating road, then quick descent, not dangerous, to junction with Route 214 (on <i>l.</i> ). Pass under rly. br. and cross R. Esk by the narrow stone br. to <i>l.</i> , beyond which, pass over suspension br. and along Bridge St., a broad and level road leading into High St. Good surface.                                                                                                                                                                                                                                                                                                           |
| 36 $\frac{3}{4}$                | <b>Montrose</b> .....<br>(Peel Statue.) | 7                                | 51 $\frac{1}{4}$ | Pass up High St. (one of the widest in Scotland), and along Murray St., the Mall, and Northesk Rd. At fork, beyond br. over Caledonian Rly., turn to <i>r.</i> ( <i>l.</i> , Route 220). Level to br. over R. North Esk; ascent towards St. Cyrus, into which village there is a short descent. Good undulating bit of road to Lauriston, beyond which the village of Johnshaven lies to <i>r.</i> on the coast line. Undulating road with descent into Bervie. Very good surface.                                                                                                                                                                                                    |

|                             |                                         |                       |               | descent to Catterline Burn. Fairly level to beyond Dunottar Castle (on <i>r.</i> ), when road descends into Stonehaven, with some awkward bends; care necessary. Turn to <i>r.</i> into the town. Good surface.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |
| 14½                         | Stonehaven .....                        | 10                    | 73½           | (Routes 207 and 219 are met here). At north end of town keep to <i>r.</i> ( <i>L.</i> , Route 220). Ascent for 2 m., then road falls to Muchalls Burn, and again rises, passing Muchalls Sta. on <i>r.</i> to above Skateraw, beyond which it is undulating, with an upward tendency to old toll-house at fork-roads. Here there is a choice of two roads into Aberdeen. (1) Bear to <i>r.</i> at fork, passing a loch on <i>L.</i> , and seaside village of Cove on <i>r.</i> Steep descent at Nigg Ch. (danger board); pass the rly. and turn to <i>L.</i> over suspension br. Pass under rly. to <i>L.</i> , proceed along Wellington Rd., and pass under rly. to <i>r.</i> along Palmerston Rd., and turn <i>L.</i> into Market St. to Post Office (on <i>r.</i> ). |
| 10                          | Muchalls Station.....                   | 4½                    |               |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |

|                             | <b>ALTERNATIVE ROUTE.</b> ...           | ...                   | ...           | (2) Bear to <i>L.</i> at fork. A quick descent to br. of Dee commences in village of Charlestown. (At br. of Dee Route 222 is met). Cross the br. and proceed up Bridge of Dee Rd., where tramlines are met, and along Holborn Pl. and Wellington St., at the end of which bear to <i>r.</i> along Union St. Cross rly. by Union Br. and turn down Market St. (fourth opening on <i>r.</i> ) to Post Office (on <i>L.</i> , at corner, when the docks are reached). Very good surface from Stonehaven; lumpy on outskirts of Aberdeen.                                                                                                                                                                                                                                  |
|                             | <b>ABERDEEN</b> .....<br>(Post Office.) | 5½                    | 89            |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |

**PERTH TO ABERDEEN. Reverse.**—Leave Post Office and proceed along Market St., with docks on *L.* Turn *r.* into Palmerston Rd.; go under rly. and along Wellington Rd., passing again under rly., and to *L.* over suspension br. Turn to *r.* (*L.* to Torry), and ascend Nigg Hill. At S. end of Stonehaven (into which town there is a descent requiring care) turn to *L.* up a winding ascent. Keep to *r.* on entering Bervie, avoiding the Station Rd. to *L.* Enter Montrose by Northesk Rd., and pass down High St. At Peel Statue bear to *r.*, cross suspension br., and narrow stone br. Bear to *r.*, and to *L.* at fork-roads. After crossing Lunan Water, keep to *L.* into Inverkeilor. Abbey ruins on *L.* on entering Arbroath High St. Proceed down the High St., and turn to *r.* along Bridge St., and continue along Lady Loan and Dundee Rd. Pass under rly., and turn to *L.* Enter Dundee by Arbroath Rd.; pass along Victoria St. and Rd., cross Wellgate, and turn to *L.*, passing Albert Institute on *r.* Bear to *r.* for a short distance along Meadowside Rd., and turn to *L.* down Reform St., to Town House. Here turn to *r.* along High St. and

Nethergate, following tramway lines. Unmistakable road to Perth. At Bridgend, turn to *L.* and cross the Tay, bearing immediately to *L.* down Tay St., to City Chambers (on *r.*).

EDITOR'S NOTE.—The main road between Dundee and Arbroath does not pass through those important holiday resorts Broughty Ferry and Carnoustie. These places may be reached by the riverside road leaving Dundee Town House by Seagate and keeping straight on, with the *rlly.* on *r.*, to Broughty Ferry. Leave Broughty Ferry by Monifieth Rd., and from the latter place proceed to Carnoustie by way of Barry, with the *rlly.* running near the road to the *r.* From Carnoustie Harbour proceed to East Haven Sta. and turn to *L.* following the straight road ahead until it meets the main road about a m. E. of Muirdrum village. This coast road is level, passing for the most part beside the links of Barry and Carnoustie.

## ROUTE 202. DUNDEE TO FORFAR.

A good main road, hilly in parts, but with excellent surface on the whole.

| Miles from Forfar. | Places on the Road.          | Mileage.        |                  | General description of the Road.                                                                                                                                                                                                                                                                                                                |

**DUNDEE TO KIRRIEMUIR.** *Reverse.*—Leave Kirriemuir southwards, passing Parish Ch. on *L.* At Southmuir bear to *r.* At Glamis Castle gate turn to *L.*, and, a few yards further, to *r.* At Milton keep *L.*, and walk down the dangerous hill towards junction with Route 202. Reverse of that route to Dundee.

**ROUTE 204.****DUNDEE TO NEWTYLE AND GLAMIS.**

Rough with local traffic to Lochee and a short distance beyond; improving after Muirhead; then good to Newtyle and Eassie. After Eassie the surface is rough, but improves considerably towards Glamis.

**DUNDEE TO NEWTYLE AND GLAMIS. Reverse.**—Straight road to Newtyle. At cross-roads (d.p.) turn to *l.* and up the pass, rly. being on *l.* part of the way. Thence unmis- takable by Lochee into Dundee. Tramlines met in Lochee. Proceed by Ward Rd. and Reform St. to Town House in High St., Dundee.

EDITOR'S NOTES.—(a) A connecting road between this route and Route 207 leaves Newtyle at the Estate Office corner, keeping to *l.* (road to *r.* going to sta. only). This road descends to Alyth Jun. Sta. (1 m.), rises for a short distance, and descends into Meigle (2½ m.). Good surface.

(b) Or, leave Town House as follows: Proceed along Nethergate to S. Tay St. (third on *r.*); go along that street and follow tramlines to terminus in Lochee—gradual ascent. Rather less traffic than by Reform St.

## ROUTE 205. DUNDEE TO BLAIRGOWRIE.

Rough to Lochee—good road to summit—looser surface on Tullybaccart Brae, and an excellent road from the foot of that hill into Blairgowrie.

| Miles from Blairgowrie. | Places on the Road. | Mileage.       |        | General description of the Road.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |

| 13½                     | Muirhead .....      | 5½             | 5½     |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |
|                         | ⚡                   |                |        | At fork roads keep to <i>l.</i> , fairly level for 1 m., then gradual ascent for nearly 4 m. to summit on the Sidlaws. About half-way up this ascent keep to <i>l.</i> ( <i>r.</i> to village of Lundie). The descent of Tullybaccart hill on the other side is dangerously steep, and must be cautiously ridden, especially at the awkward bends. At the cross-roads keep straight on, easy descent for 2½ m. into Coupar-Angus, on entering which town a level rly. crossing is passed over; gates frequently closed. |

**DUNDEE TO BLAIRGOWRIE.** *Reverse.*—Leaving rly. sta. (on *L.*) proceed straight out of the town, crossing rly. at Rosemount Sta. On entering Coupar-Angus opposite rly. sta., turn to *r.* along Forfar Rd. and to *L.* in the Square, passing out of the town over level rly. crossing. Pass over cross-roads over a m. out, and again at Ashley. Ascend Tullybaccart hill, rising over the Sidlaws. From Muirhead proceed into Dundee as in reverse of Route 204.

(*a*) If the rider desires to join Route 208 he should go on by Reform St., turn *L.* (keeping Douglas Hotel on *r.*), and go up into Perth Rd., turning *r.* by Queen's Hotel. Or, at Douglas Hotel go forward, passing hotel on *L.*, down to foot of Wellmeadow and continuing on to br., joining Route 208 there.

**ROUTE 206. NEWTYLE TO COUPAR-ANGUS.**

(Via Kettins.)

A narrow, winding road, but having very fair surface to cross-roads, then very good to Coupar-Angus.

| <i>Miles from Coupar-Angus.</i> | <i>Places on the Road.</i>               | <i>Mileage.</i>       |               | <i>General description of the Road.</i>                                                                                                                                                                                                                                                                                                                                                                                                                  |

|                                     | COUPAR ANGUS .....<br>(Cross.) | 1 $\frac{3}{4}$                  | 5 $\frac{3}{4}$ | r. towards Coupar-Angus, passing over level crossing on entering that town (gates frequently closed). Good surface after cross-roads. |

NEWTYLE TO COUPAR-ANGUS. *Reverse.*—Leave the Square, passing S. over level crossing, and having a red ch. on l. At cross-roads bear l., thence a winding, but hardly mistakable, road to Newtyle.

## ROUTE 207. PERTH TO ABERDEEN.

(Via Forfar and Brechin.)

An excellent main road all the way, pleasantly undulating, and with a splendid surface.

| <i>Miles from<br/>Aberdeen.</i> | <i>Places on the<br/>Road.</i>  | <i>Mileage.</i>                  |                  | <i>General description of the Road.</i>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |

| 81 $\frac{3}{4}$                | Perth .....<br>(City Chambers.) | ...                              | ...              | Proceed up Tay St. and turn to r. over the br. into Bridgend; here turn to l. (r., Route 201) and follow tramlines. At fork, a few yds. further, keep to r. (l., Route 208); ascent, rather stiff at first, but becoming more gradual, to Scone, where the tramlines cease. Out of the village the ascent again becomes somewhat steep, and is followed by a fine undulating piece of road, with upward trend, to fork at Balbeggie. Here keep to the l. at the inn. Easy descent through the village, and a stiffish rise for $\frac{1}{4}$ m. The road then becomes undulating, and descends through Burreltown and Woodside villages, by a long, easy decline to the rly. br. Thence level into Coupar-Angus. Excellent surface. |

| 64                              | Meigle .....                    | 5                                |                  | Pass straight through the town (where Routes 205 and 211 are met), passing Railway Hotel on r. Undulating, with fine surface to Meigle, before which village keep to r. at branch-roads, and bear to l. in passing through the village, to rly. sta. Slight ascent 1 m. beyond Meigle, then fairly level to the level rly. crossing at Eassie. Ascent to Glamis (where Routes 203 and 204 are joined). Out of Glamis there is a stiffish rise, and a subsequent decline for nearly 1 m. Again                                                                                                                                                                                                                                       |
| 57 $\frac{1}{2}$                | Glamis .....                    | 6 $\frac{1}{2}$                  |                  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |

## Route 207.

PERTH TO ABERDEEN—*continued.*

| <i>Miles from Aberdeen.</i> | <i>Places on the Road.</i>         | <i>Mileage.</i>       |               | <i>General description of the Road.</i>                                                                                                                                                                                                                                                                                                                                                                                                                                                       |
|-----------------------------|------------------------------------|-----------------------|---------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|                             |                                    | <i>Inter-mediate.</i> | <i>Total.</i> |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |
| 52                          | Forfar .....<br>(Town Hall.)       | 5½                    | 29½           | uphill out of Douglstown, and thence descending into Forfar. Good surface. (Routes 202, 212, and 213 met here.) Enter Forfar by West Port, bear to <i>L.</i> at Town Hall along Castle St., then keep forward. Ascent out of the town; at fork-roads keep to the <i>r.</i> ; rly. sta. passed on <i>r.</i> The road becomes almost level for many miles, with a fine, solid surface. Very slight undulations before Brechin. On entering the town bear <i>L.</i> at lamps. Very good surface. |
| 39½                         | Brechin .....<br>(Town Hall.)      | 12½                   | 42½           | Ascent through the town. At Commercial Hotel turn to <i>L.</i> at right angles. (Routes 215 and 216 converge here.) An upward incline passing under rly. br. Gradual descent to North Esk Bridge; cross the river, and at ¼ m. further turn to <i>r.</i> , following telegraph posts. Easy ascent towards Laurencekirk; keep to <i>L.</i> at branch-roads, 2½ m. beyond Esk Br. ( <i>r.</i> , Route 217). Fair surface.                                                                       |
| 34                          | North Esk Bridge .....             | 5½                    |               |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |
| 28½                         | Laurencekirk .....<br>(Town Hall.) | 5½                    | 53½           | Proceed straight through the town, rly. running parallel on <i>L.</i> , road descending to Fordoun Sta. The rly. is twice passed, the road gradually ascending, with a midway dip to a bridge, for nearly 6 m., followed by a long descent into Stonehaven, which must be carefully ridden. Where Route 201 is met S. of the town, turn at right-angles to <i>L.</i> into the town. Good surface.                                                                                             |

|                             | <b>ABERDEEN</b> .....              | 14½                   | 81½           |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |

**PERTH TO ABERDEEN (VIA FORFAR AND BRECHIN).** *Reverse.*—Reverse of Route 201 to Stonehaven. On leaving that town turn sharp *r.*, then *L.*, and again to *r.*, uphill. Keep to *L.* 4¼ m. further, and turn *L.* near a br. 2½ m. beyond. Keep again *L.* before Fordoun Sta., and to *r.* beyond Laurencekirk. Before North Esk Br. turn *L.*, and keep *r.* when over. Keep again to *r.* just beyond Brechin, and turn to *L.* into Glamis village, then keep forward at the Castle Gate, and bear *r.* at fork beyond. After Meigle Sta. keep *L.*, and again *L.* at Burrelton. Thence a straight forward road to Perth, bearing to *r.* over the Tay (following tramlines), and at end of br. sharp *L.* into Tay St. to City Chambers on *r.*

# ROUTE 208. PERTH TO BRAEMAR.

(Via Glenshee.)

Excellent road to Blairgowrie; good surface to Bridge of Cally; thence fair on the whole, though loose in parts, to Braemar. A heavy road for cycling, but extremely picturesque. The beauty of the scenery and the bracing atmosphere make up for any labour required in passing over this famous "Royal Route."

| Miles from Braemar. | Places on the Road.                          | Mileage.        |                  | General description of the Road.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |

| 50                  | Perth .....<br>(City Chambers.)              | ...             | ...              | Proceed up Tay St., cross the br. to the <i>r.</i> , and in Bridgend turn to <i>L.</i> , following tramlines ( <i>r.</i> , Route 201). Where road forks, a few yds. further, take the low road to the <i>L.</i> ( <i>r.</i> , Route 207). Gradual descent, then a rise to Scone, passing palace on the <i>L.</i> ; ascent continues to Lethendy, beyond which the road is undulating for 5 m., through Guildtown to Cargill, the sta. being passed on the <i>r.</i> Descent to Bridge of Isla. Just beyond the br., the famous beech hedge, which is a $\frac{1}{2}$ m. long, and 80 ft. high, is passed on <i>L.</i> At fork-roads keep to <i>r.</i> ( <i>L.</i> , Route 211). About a m. beyond fork there is a sharp dip to narrow br., thence fairly level, passing the White and Black lochs, to within a m. of Blairgowrie; gradual ascent into the town. Proceed straight down the Main St. to Queen's Hotel on <i>L.</i> Excellent surface. |

## Route 208.

## PERTH TO BRAEMAR—continued.

| Miles from Braemar. | Places on the Road.                                  | Mileage.        |                  | General description of the Road.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |
|---------------------|------------------------------------------------------|-----------------|------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|                     |                                                      | Inter-mediate.  | Total.           |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |
| 17 $\frac{3}{4}$    | Finegand Farm.....                                   | 4 $\frac{1}{4}$ |                  | Brae, which is short but very steep, and must be walked. Thence over the "Braes of the Lair," with uphill tendency, some sharp and long descents, and narrow road, rendering careful riding necessary. Finegand Farm-house passed on <i>r.</i> ; road still undulating, but with rather better surface to the Spital of Glenshee.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |
| 15 $\frac{1}{2}$    | Spital of Glenshee .....<br>(Invercauld Arms Hotel.) | 2 $\frac{1}{4}$ | 34 $\frac{1}{2}$ | Turn sharply to <i>r.</i> over General Wade's road, and across the high-backed br., with Parish Ch. on <i>l.</i> From this point the road rises steadily up Glen Beag, with a short easy downhill run at intervals. The surface becomes loose and stony, and the road when well up the Glen begins the ascent of the Cairnwell. All human habitation is now lost sight of, and huge hillsides rise up in every direction, covered with heather to their summits. The ascent cannot be ridden, as it is for 2 m. very steep and culminates in that remarkable example of road engineering, known as the "Devil's Elbow"—a truly awe-inspiring zig-zag. The road here is exceedingly steep and dangerous; summit 2200 ft. above sea level. At top of the hill there is a danger board, warning cyclists who may be descending the "Elbow." |
| 9 $\frac{1}{2}$     | Devil's Elbow ...                                    | 6               |                  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |
| 9                   | The Summit.....                                      | $\frac{1}{2}$   | 41               | Aberdeenshire is entered, and the road begins a long, delightful descent, which may be ridden at a quick pace with comparative safety, if the bell is sounded at all the bends. Surface loose in parts, but fair on the whole. Road improves in quality as it approaches Braemar, keeping the Clunie Water on <i>l.</i> , and passing Auchallater farm on <i>r.</i> Slight descent into Braemar, passing Victoria Institute on <i>l.</i> ; turn to <i>l.</i> at d.p. to Fife Arms Hotel. Keeping straight on at d.p., along Ballater Rd., the Invercauld Arms Hotel is reached. Post and Telegraph office at Braemar worked by Aberdeen; no direct connection with Blairgowrie. (Route 221 is joined here.) Very fair surface on approaching Braemar.                                                                                    |
| 2                   | Auchallater Farm .....                               | 7               |                  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |
|                     | BRAEMAR .....                                        | 2               | 50               |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |

**PERTH TO BRAEMAR. Reverse.**—Leaving Fife Arms Hotel, turn to *r.* at d.p., and proceed up the glen, keeping the Clunie Water on immediate *r.* Danger board at the summit; rider should at once dismount and walk down the "Devil's Elbow" bends, and should not re-mount for nearly 2 m., and great care should be taken until the comparatively level ground in Glen Beag is gained. Cross "high-backed" br., passing Parish Ch. on *r.* Turn to *l.* into Glenshee, passing Invercauld Arms Hotel

on *l.* Keep straight on at all cross-roads, and ride the several sharp descents with caution. At Bridge of Cally turn to *l.*, and cross br. Turn to *r.* at Royal Hotel in Rattray, just before Blairgowrie; sharp descent. Cross br., and bear to *r.* up Allan St., and then to *l.* to the Queen's Hotel and Cross, in High St.

## ROUTE 209. PERTH TO DUNKELD.

(Via Caputh.)

This road passes through beautiful scenery, especially at the portions where it follows the bank of the Tay. Very fair surface all the way.

| <i>Miles from Dunkeld.</i> | <i>Places on the Road.</i>      | <i>Mileage.</i>       |                  | <i>General description of the Road.</i>                                                                                                                                                                                                                                                                                                                                                                                                                                                          |
|----------------------------|---------------------------------|-----------------------|------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|                            |                                 | <i>Inter-mediate.</i> | <i>Total.</i>    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |
| 17                         | Perth .....<br>(City Chambers.) | ...                   | ...              | Proceed up Tay St., bending to <i>l.</i> when passing the br., keeping North Inch on <i>r.</i> and bearing again to <i>l.</i> along Athole St. At St. Ninian's Cathedral turn to <i>r.</i> , passing the barracks on <i>l.</i> Leave Perth by the Dunkeld Rd., keeping to <i>r.</i> at first fork ( <i>l.</i> , Routes 279 and 280). Fairly level for 4 m., passing under rly. and crossing R. Almond. Keep to <i>r.</i> at branch-roads, and ascend slightly to Luncarty Sta. Splendid surface. |
| 12 $\frac{1}{2}$           | Luncarty Station.....           | 4 $\frac{1}{2}$       | 4 $\frac{1}{2}$  | Descent from sta. to the level. Keep to <i>r.</i> at fork 1 m. further, passing Strathord Sta. on <i>l.</i> ( <i>l.</i> , Route 210). Gradual rise to Stanley, turning sharp <i>l.</i> into the village, and keeping to <i>l.</i> at fork $\frac{3}{4}$ m. beyond. Level for 2 m., and descent, passing Murthly Sta. on <i>r.</i> , to R. Tay, which cross by a new br., supplanting the old ferry, and into Caputh. Ascent from the river. Fair surface.                                        |

**PERTH TO DUNKELD. Reverse.**—From the br. proceed a few yds. northwards, and take first turning on *r.*, and keep to *r.* at fork. At Caputh, turn to *r.*, and, beyond the village, cross the Tay. Before Stanley, keep to *r.* at fork, and bend again to *r.* when leaving the village, having the R. Tay on *l.* Bear to *l.* at Strathord Sta., thence a straight-forward road into Perth.

# ROUTE 210. PERTH TO INVERNESS.

Essentially one of the most picturesque tourist routes in Scotland, passing through all varieties of the grandest Highland scenery, from the deeply wooded river glens, as at Killiecrankie, and down Speyside, to the wild, bare, and rugged Glen Garry, ascending the Grampians. None but sturdy riders, however, should cycle between Bruar and Dalwhinnie, as the road is a neglected one, the gradient very tedious, and there is no hotel or inn for 20 m. The dangerous hills between Carrbridge and Inverness should be ridden with great caution.

| Miles from Inverness. | Places on the Road.                | Mileage.        |                  | General description of the Road.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |

| 116                   | Perth<br>(City Chambers.)          | ...             | ...              | Proceed as in Route 209 to near Strathord Sta., and at the fork-roads here bear to the <i>L.</i> ( <i>r.</i> , Route 209). Short rise after passing under rly., sta. lying on <i>r.</i> Easy gradient up to Bankfoot, in which village bear to <i>L.</i> at fork. Road still ascending through the hamlet of Waterloo, the top of the hill being reached $1\frac{1}{4}$ m. beyond that place. Descent to the rly. br., beyond which an awkward bend must be ridden with care. Easy run, through wooded land, into Birnam. When through the village, turn to <i>r.</i> and cross the R. Tay into Dunkeld. Surface good. (Routes 282 and 283 leave, on <i>L.</i> , $\frac{1}{2}$ m. beyond Birnam.) Proceed straight through Dunkeld, bearing to <i>L.</i> at branch-roads, at N. end of village. Ascent for 1 m., and subsequently an undulating descent by Dowally to Guay Sta. (on <i>L.</i> ), and a succession of long undulations, parallel with R. Tay, to Ballinluig. (A road leaves on the <i>L.</i> , running on the N. bank of the Tay, to Weem Hotel or Aberfeldy; but, to reach the latter place from here, it is preferable to cross the Tay at Logierait (ferry), or at Grantully Br., and proceed 'to Aberfeldy over a portion of Route 283 (see p. 298), a distance of 9 m.) Road continues undulating to within $1\frac{1}{2}$ m. of Pitlochrie, when it is level, but again ascends during the last $\frac{1}{2}$ m. into the village; bear to <i>L.</i> on entering. Good surface, though sandy in places and apt to be rather heavy in very dry weather. |

| 83 $\frac{3}{4}$      | Aldclune                           | 5               |                  | Proceed straight through the village, passing rly. sta. on <i>L.</i> Road ascends in long easy slopes towards the Pass of Killiecrankie, through remarkably fine scenery. The last $\frac{1}{2}$ m. to the summit of the Pass is rather stiff. Rapid fall to beyond the sta., and sharp ascent to Aldclune, then easy to Blair Athole. The surface to Killiecrankie is good, but from that point to Blair Athole again becomes rough and sandy in parts.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |

| 78 $\frac{3}{4}$                 | Bruar .....                    | 3                                |                   | long ascent over the Grampians commences, by way of Glen Garry. The ascent is easy for 1 $\frac{1}{2}$ m. beyond Dalriach, but again becomes stiff to Dalnacardoch shooting lodge (on L.). The prospect is now wild and desolate in the extreme; trees are left behind and not seen again until Strathspey is reached. To obviate all traces of the road being lost during winter snow storms, posts marking the route are placed at intervals by the wayside. The ascent becomes steeper beyond Dalnacardoch, and the road surface degenerates into a mere mountain track, covered with loose stones and grass-grown. The summit (1484 ft.) is reached 2 m. beyond Dalnaspida Sta. From this point there is practically a continuous descent for 20 m. to Kingussie undulating and with improving surface after Dalwhinnie. Dalwhinnie Sta. passed on L.; at the three branch-roads keep to the middle one. Towards the foot of Glen Truim, the road returns to the E. side of the rly.; at fork before Spey Br. keep to L., passing Newtonmore Sta. on r. and proceeding through the village to Kingussie. (Route 290 is joined at Newtonmore.) The road improves greatly as it approaches Kingussie. |

| 7½                               | Craggie Inn .....              | 4½                               |               | Craggie Inn and very awkward abrupt bend to <i>r.</i> to <i>br.</i> over R. Nairn. Road ascends steeply to Daviot Ch. and continues to ascend to the plantation on Drummoissie Moor, beyond which it descends very rapidly for over 2 m., and must be ridden with caution. Easier decline from Culcabock into Inverness. Keep to <i>r.</i> at fork after crossing the burn, and enter the town by Kingsmills Rd., proceeding into High St. by the steep Stephen's Brae; Town Hall on <i>l.</i> , towards the ruin. Surface good to Culcabock; then rather rough into Inverness.<br>(Here are met Routes 225, 295, 300, 301, 305, 306, 307, and 310.) |

|                                  | (Town Hall.)                   |                                  |               |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |

**PERTH TO INVERNESS.** *Reverse.*—Leave Town Hall by High St. and Stephen's Brae (care required); pass High School on *l.* and keep to *l.* at fork, keeping along Kingsmills Rd., at end of which bear to *l.* and cross the burn. Keep to *r.* where Culloeden Rd. leaves, and ascend to Drummoissie Moor. Dangerous descent past Daviot; cross *br.* and turn sharply to *l.* At branch-roads in Carrbridge turn to *r.* and cross river. Straight-forward road to Newtonmore, where, at fork beyond village, keep to *l.* Near Dalwhinnie Sta. bear to *l.*, passing rly. and also passing the hotel (on *l.*). Rough and bleak unmistakable road over the watershed to Blair Athole, Pass of Killiecrankie, and Pitlochrie. At fork just past Dalnacardoch keep to *l.*; rly. running beside road all the way. Leaving Pitlochrie, bear to *r.*, road keeping beside rly. and R. Tummel to Ballinluig. Keep to *l.* at branch-roads (*r.*, to Aberfeldy). In Dunkeld, keep straight through village and cross the Tay, turning to *l.* on meeting road beyond at right angles, and proceeding thence through Birnam to Bankfoot, where keep to *l.* at fork beyond village. On entering Perth, pass Barracks and St. Ninian's Cathedral on *r.*, proceed down Athole St., bear to *r.*, passing the North Inch and Albert Monument on *l.*, to County Buildings in Tay St., avoiding the *br.* over the Tay.

**EDITOR'S NOTE.**—There is a right-of-way up Glen Tilt from Blair Athole to Braemar, but it is almost impossible to cycle the distance (29 m.), though many tourists boast of having done so. The road up the Glen from Blair Athole is, however, quite rideable for 8 m. to Forest Lodge, or even as far as the Falls of Tarf; but further the cyclist cannot go unless he be prepared to drag his machine over a mass of rock and boulders, which it would be folly to attempt. (See also note to Route 221.)

## ROUTE 211. COUPAR-ANGUS TO DUNKELD.

A bye-road, crossing country and uniting three more important routes. Good surface all the way and improving towards Dunkeld.

| <i>Miles from Dunkeld.</i> | <i>Places on the Road.</i>     | <i>Mileage.</i>       |                  | <i>General description of the Road.</i>                                                                                                                                                                                                                                                                                                                                                                                                                                                       |

| 14 $\frac{3}{4}$           | COUPAR-ANGUS .....<br>(Cross.) | ...                   | ...              | Proceeding a short distance down the Forfar Rd., turn to <i>L.</i> , opposite the road leading to rly. sta., and continue as in Route 205 to Bridge of Couttie, a few yds. beyond which turn to <i>L.</i> Blairgowrie single line of rly. passed, and road pleasantly undulating to intersection of Route 208, before Meikleour; level to the village.                                                                                                                                        |
| 13 $\frac{1}{2}$           | Bridge of Couttie .....        | 1 $\frac{1}{4}$       |                  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |
| 9 $\frac{3}{4}$            | Meikleour .....                | 3 $\frac{3}{4}$       | 5                | On meeting a road at right angles in the village, turn to <i>r.</i> , with policies of Meikleour House on <i>L.</i> Keep to <i>L.</i> at first branch-roads, and again at next fork. Road level by the Little and Meikle Fardles; turn to <i>r.</i> when a bye-road is met at right angles, before Spittalfield. In the village keep forward. Slight ascent towards Caputh, before which place road forks: keep to <i>r.</i> ( <i>L.</i> to village). Easy descent into Caputh. Fair surface. |
| 6                          | Spittalfield .....             | 3 $\frac{3}{4}$       |                  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |
| 4 $\frac{3}{4}$            | Caputh .....                   | 1 $\frac{1}{4}$       | 5                | Here Route 209 is joined; proceed to Dunkeld as detailed in the latter portion of that route. Good surface.                                                                                                                                                                                                                                                                                                                                                                                   |
|                            | DUNKELD .....                  | 4 $\frac{3}{4}$       | 14 $\frac{3}{4}$ |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |

**COUPAR-ANGUS TO DUNKELD.** *Reverse.*—Proceed as in reverse of Route 209 to fork (d.p.) at Caputh. Bear to *L.* past ch. (on *r.*) and turn to *r.* before Spittalfield. Keep straight on through village to Meikleour. Turn to *L.* in Meikleour past smithy; cross Route 208, pass rly. line, and join Route 205. Turn sharply to *r.*, cross R. Isla, and thence forward to Coupar-Angus.

## ROUTE 212. BLAIRGOWRIE TO FORFAR.

(Via Kirriemuir.)

Somewhat hilly, with fair surface, to Kirriemuir, but of very good surface and affording easier riding from Kirriemuir to Forfar.

| <i>Miles from Forfar.</i> | <i>Places on the Road.</i>            | <i>Mileage.</i>       |               | <i>General description of the Road.</i>                                                                                                                              |

| 19                 | Ratray .....                    | $\frac{1}{4}$   |                  | keep straight on at branch-roads (Route 208 leaves on <i>L.</i> , up Balmoral Rd.). Easy rise to Old Ratray, sharp dip and rise beyond, and thence undulating ascent. At $\frac{1}{4}$ m. beyond New Alyth, the branch-road to the sta. and village of Alyth leaves on <i>L.</i> Keep forward, and again forward at next fork, road gradually descending, and passing Alyth branch of rly., to Ruthven and br. over R. Isla. Ascent from the br., pass cross-roads, and keep to <i>r.</i> at fork-roads; undulating to Craigton, and for $\frac{3}{4}$ m. beyond. Ascent, steep at first, then easier, towards Westmuir, beyond which the road rises for $\frac{1}{2}$ m., and descends to the br. at Kirriemuir. Ascent into the town; turn to <i>r.</i> , twice, into the Forfar Rd. Fair surface. |

**BLAIRGOWRIE TO FORFAR. Reverse.**—Leaving by the main north road (as on p. 213) turn to *L.* at fork before rly. br. Pass over main line of Caledonian rly., nearly 1 m. further. At branch-roads before Kirriemuir turn to *r.*; care required on entering the town. Pass ch. on *r.* and turn to *L.* twice, road dipping down to br. outside the town on the east side. The hill before Craigton is dangerously steep at one part, and should be ridden with care. Easily-followed road to Blairgowrie.

## ROUTE 213. FORFAR TO ARBROATH.

The main road between the two towns. Excellent surface.

## Route 213.

FORFAR TO ARBROATH—*continued.*

| Miles from<br>Arbroath. | Places on the<br>Road. | Mileage.                |                 | General description of the Road.                                                                                                                                                                                                                                                                                                                                                     |
|-------------------------|------------------------|-------------------------|-----------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|                         |                        | Inter-<br>medi-<br>ate. | Total.          |                                                                                                                                                                                                                                                                                                                                                                                      |
| 8                       | Guthrie Station .....  | 4                       |                 | tendency out of Forfar, to Rescobie and Balganie Lochs (on <i>L.</i> ). Easy rise at Balganie, then good running past Auldbar Sta. ( $\frac{1}{2}$ m. on <i>L.</i> ), and long descent towards Guthrie Sta. and Friockheim Sta., rly. running beside road most of the way. At Friockheim Sta. bear well round to <i>r.</i> (to <i>L.</i> , Routes 214 and 215).                      |
| 6 $\frac{1}{2}$         | Friockheim Station ... | 1 $\frac{1}{2}$         | 8 $\frac{1}{2}$ | Leaving the sta., ascend Legaston Brae, nearly 1 m. in length, but of comparatively easy ascent. Easy running towards Colliston Mill, and slight ascent to that point. Splendid descent by Gowanbank, into Arbroath, joining Route 201 after passing rly., and proceeding down Guthrie Port to Abbey ruins. Continue down High St. to Town House (on <i>r.</i> ). Very good surface. |
| 3 $\frac{3}{4}$         | Gowanbank .....        | 2 $\frac{3}{4}$         |                 |                                                                                                                                                                                                                                                                                                                                                                                      |
|                         | Arbroath .....         | 3 $\frac{3}{4}$         | 15              |                                                                                                                                                                                                                                                                                                                                                                                      |
|                         | (Town House.)          |                         |                 |                                                                                                                                                                                                                                                                                                                                                                                      |

**FORFAR TO ARBROATH. Reverse.**—Leave Town House (on *L.*) and proceed up High St. to fork near Abbey ruins. Here keep to *L.*, cross rly., and go along Cairnie St., Cairnie Rd., and Forfar Rd. At Friockheim Sta. bear round to *L.* At fork 1 $\frac{1}{2}$  m. beyond Guthrie Sta., keep to *L.* Thence an easily-followed road to Forfar.

**NOTE TO REVERSE ROUTE.**—Arbroath may also be left by proceeding *down* High St. from Town House to first cross-streets, then turning to *r.* along Commerce St., over Brothock Br.; keeping to *r.* for short distance, turn to *L.* along Millgate, to *r.* into West Port, and out of the town by Keptie St., crossing rly. br. and Keptie Rd. At fork, beyond skating pond (on *L.*), turn to *r.*, and ascend to junction with Forfar Rd. at New Cemetery. This alternative route avoids the busier parts of the town.

**EDITOR'S NOTE.**—Another road runs eastwards out of Forfar, on the other side of Rescobie Loch meeting Route 214 at Crossgates, 2 $\frac{1}{2}$  m. N. of Friockheim Sta. It is undulating to Clocksbrigg Sta.; then ascends gradually, for 3 $\frac{1}{2}$  m., falling to Crossgates. This is the direct Forfar to Montrose route, but has not such good surface as the roads described in Routes 213 and 214. It is not recommended.

## ROUTE 214.

## FRIOCKHEIM STATION TO MONTROSE

A link route, making connection to the north between Route 213 and a portion of Route 201. See note to Route 213. Good surface and level for a greater part of the way.

| 1 $\frac{3}{4}$            | Dyklands .....                     | 2 $\frac{1}{2}$         |                  | Dyklands. Descent for 1 m. to junction with Route 207, on L., meeting at sharp right angles. Turn to r.; slight ascent into Laurencekirk. Very good surface. |
|                            | LAURENCEKIRK<br>(Town Hall.) ..... | 1 $\frac{3}{4}$         | 10 $\frac{1}{4}$ |                                                                                                                                                              |

**MONTROSE TO LAURENCEKIRK. Reverse.**—A little over  $\frac{1}{4}$  m. S. of village turn sharply to L. After passing rly. beyond Marykirk, turn sharply to L., and again near Hillside, to L., passing two rlys. On joining Route 201 N. of Montrose, turn to r., and enter town, crossing Victoria (rly.) Br., and proceeding by Northesk St., by The Mall and Murray St., into High St.

# ROUTE 218. BRECHIN TO BANCHORY.

(Via Bridge of Dye.)

A fairly easy road to Clattering Brig, but the precipitous ascent, on a loose, rough surface, to Cairn o' Mount, is exceedingly stiff, and the descent therefrom dangerous. The scenery is magnificent.

| Miles from<br>Banchory. | Places on the<br>Road.              | Mileage.                |        | General description of the Road.                                                                                                                                                                                                                                                                                                                                                                                                                                       |

|                         |                          | Inter-<br>medi-<br>ate. | Total. |                                                                                                                                                                                                                                                                                                                                              |
| 14½                     | Clattering Brig (a)..... | 4                       | 14½    | Road ascends for 1 m., then falls towards Boghall, where, at fork, keep to <i>l.</i> Steepish ascent to the level before Clattering Brig. Fair surface.                                                                                                                                                                                      |
| 12                      | ↑<br>Cairn o' Mount..    | 2½                      |        | Here commences a very steep ascent 2½ m. long to the summit at Cairn o' Mount (about 1450 ft.). From the top there is a rapid descent for over ½ m., followed by a level ledge; a further steep descent, too dangerous to ride, for 1¾ m.; then a short sharp rise, and another dangerous descent to Bridge of Dye. Loose and stony surface. |
| 8                       | Bridge of Dye.....       | 4                       | 21     | Steep rise from the br. and descent for over 1 m. to fork roads; here keep to <i>r.</i> (b). Quicker descent to the br. at Bogendreep, from which the road again rises. At fork keep to <i>l.</i> ; descent to Strachan, where Feugh Water is crossed. Fair surface.                                                                         |
| 4½                      | Bogendreep Bridge.....   | 3½                      |        |                                                                                                                                                                                                                                                                                                                                              |
| 3                       | Strachan ..              | 1½                      | 26     | Undulating road, with rising tendency, for 1½ m., then descends, passing through a plantation, to Bridge of Feugh; bear to <i>l.</i> ( <i>r.</i> , Route 222), cross R. Dee, and ascend to Banchory. Good surface.                                                                                                                           |
| ¾                       | Bridge of Feugh.....     | 2¼                      |        |                                                                                                                                                                                                                                                                                                                                              |
|                         | <b>BANCHORY</b> .....    | ¾                       | 29     | (Route 208 joined at Banchory.)                                                                                                                                                                                                                                                                                                              |

**BRECHIN TO BANCHORY. Reverse.**—Leaving the village eastwards, turn down, *r.*, to Bridge of Dee, and bear to *l.* Keep straight on at Bridge of Feugh, with Feugh Water on *l.*-hand, to Strachan. At fork, turn to *l.*, and at next fork to *r.* At Bogendreep Br. keep to *r.* Road easily followed to summit. The very dangerous descent to Clattering Brig, must be walked down. Keep twice to *l.* before Fettercairn; bear to *l.* at Gannochy Br. At fork just beyond Edzell keep to *l.*; turn to *r.* on joining main road (Route 207) before Brechin.

(a) At Clattering Brig the branch road to *r.*, crossing the burn, runs through the beautiful and romantic Glen of Drumtochty to the village of Auchinblae, thence to Fordoun Sta., where it joins Route 207. Good surface.

(b) The road to *l.* from Bridge of Dye leads to Feughside Inn, thence on to Aboyne. Just before reaching the inn, the R. Feugh is crossed by a small wooden br., available for foot passengers.

## ROUTE 219. STONEHAVEN TO BANCHORY.

A hilly cross-country route, with very fair surface for the first 5 and last 5 m. The middle portion, rising over a shoulder of the hills, is a desolate bit of road with inferior surface.

| 16 $\frac{1}{4}$               | STONEHAVEN .....<br>(Market.) | ...                     | ...              | Leave by Evan St. and the Slug Rd. Rather stiff ascent for $\frac{1}{2}$ m. out of the town, passing rly., then easier to Redcloak, when road again ascends rather stiffly, with easy decline to Cowie Water. Cross the br.; steep ascent towards Mowtie, and a long climb to Rickarton. Road undulating for $1\frac{1}{4}$ m. to beyond Roadside, from which point it again ascends to the summit. At fork keep to <i>l.</i> Long winding descent to Burn of Sheeoch, requiring great care in riding down, keeping to <i>r.</i> at bend over half-way down. After crossing the br. bear to <i>r.</i> ; road ascends for 1 m., followed by long descent, with awkward bend at a br., to junction with Route 222. Turn to <i>l.</i> on meeting this road. Almost level to Bridge of Feugh; turn to <i>r.</i> over the br., and again to <i>r.</i> when across ( <i>l.</i> , Route 218). Cross Bridge of Dee, and ascend to Banchory. Very fair surface, except near summit. |

**STONEHAVEN TO MILL INN.** *Reverse.*—Proceeding westwards from Mill Inn (viâ Route 222) at  $\frac{3}{4}$  m. turn to *l.* and leave main road; beyond Monquich road bends to *r.*, at smithy keep to *l.* At next fork keep to *r.* On descent towards Stonehaven, at Polbare, turn *l.* and a short distance further, to *r.*: pass rly., road descending into the town. Great care should be taken in descending into Stonehaven on account of the rough surface, sharp turns, and steep descent.

**ROUTE 221. ABERDEEN TO BRAEMAR.**

This route combines the rare advantages of most excellent scenery and a well-engineered smooth-surfaced road, making it the most delightful cycling run in Scotland. The ascent is gradual throughout the entire route, but, except for a m. or two beyond Ballater, the gradients are extremely slight.

Excellent surface.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |
| 34½                        | [Potarch Bridge].....      | 6                     |               | The sta. passed on <i>l.</i> , bear to <i>r.</i> Road ascends for 1 m., crossing rly., dips slightly, and re-ascends to Boghead, falling towards Dinnet Sta.; then continues to rise gradually for 2 m., falls a short distance, and goes uphill to Cambus o'May Sta., passing over the Muir of Dinnet, between the two rly. stas. A further rise of 2 m. to Tullich, beyond which keep to <i>l.</i> at fork; the rly. is repassed, and road becomes almost level to Ballater. Turn to <i>r.</i> on entering the village. Excellent surface.                                                                                                                                                                                                                                      |
| 32¼                        | Kincardine O'Neil .....    | 2                     | 26            | Proceed through the village, passing rly. sta. on <i>r.</i> ; steep ascent for over ½ m.; descending to Bridge of Gairn, and long ascent to Kyleacreich Inn, from which point there is a gentle decline for nearly 2 m. At Abergeldie the road re-ascends easily to Crathie, Balmoral Castle being seen, on opposite bank of the Dee, amid magnificent surroundings. A fine view of Lochnagar is had from here. [A road leaves, on <i>r.</i> , connecting with Route 223, see note.] Undulating to Inver Inn, thence ascending very slightly, and passing through beautiful Highland pine woods, to Invercauld Br., where the Dee is crossed. Fine undulating road on S. bank of the river, with gentle upward tendency towards Braemar; ascent into the village. At fork (d.p.), |

## Route 221.

**ABERDEEN TO BRAEMAR**—*continued.*

| <i>Miles from<br/>Braemar.</i> | <i>Places on the<br/>Road.</i>                                                   | <i>Mileage.</i>                  |                  | <i>General description of the Road.</i>                                                                                                                          |
|--------------------------------|----------------------------------------------------------------------------------|----------------------------------|------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|                                |                                                                                  | <i>Inter-<br/>medi-<br/>ate.</i> | <i>Total.</i>    |                                                                                                                                                                  |
|                                |  |                                  |                  |                                                                                                                                                                  |
|                                | <b>CASTLETON OF BRAEMAR</b>                                                      | 2 $\frac{3}{4}$                  | 58 $\frac{1}{4}$ | keep to r. (L., Route 208). Cross the Clunie Water to centre of the village. Excellent surface. (For continuation of road to Inverey and Linn of Dee, see note.) |

**ABERDEEN TO BRAEMAR.** *Reverse.*—Cross Clunie Water, pass hotel on r.; cross R. Dee at Invercauld Br. At fork, opposite Balmoral, keep to r., and at fork beyond Bridge of Gairn, again to r. On leaving Ballater, turn to L., keeping on N. bank of the Dee. At fork, beyond Cambus o' May Sta. (near beginning of Muir of Dinnet), keep to r. Unmistakable main road to Banchory. Here keep straight on, having rly. on r.-hand most of the way, to the outskirts of Aberdeen. Follow tramlines along Great Western Rd. to Union St., and along that st., over rly. br., to Market St. (on L., a short distance further), at foot of which, on L., is General Post Office.

**EDITOR'S NOTES.**—(1) An excellent "circular run" from Aberdeen is obtained by following Route 221 to Banchory, and returning by the reverse of Route 222. Or, these two routes may be thus linked together, and the ride shortened, by crossing the Dee by any of the intermediate brs. (Banchory, Durris, Park, Milltimber.)

- (2) A road leaves (to r.) just beyond Bridge of Gairn, leading up to Reinloan. At the fork, opposite Balmoral Castle, there branches off another connecting road to the inn, by Bridgend of Bush. Both roads are rough. From Reinloan, a road strikes off northwards, over the hill shoulder, connecting with Route 223. It is very rough, and not to be recommended for any but the more adventurous of riders. A greater part of the way has to be walked. (12 $\frac{1}{2}$  m.)
- (3) From Braemar a road runs westwards, by Mar Lodge, to Inverey (5 m.), ascending for 3 m. out of Braemar, and falling towards Inverey; fair surface, and very fine scenery. The rider may continue by Linn of Dee (1 m.), where the river is crossed at a very picturesque point, to the foot of Glen Dee (3 m.). Here the river is again crossed, this time by a wooden br., and the bank of the Geldie Burn followed. This burn is crossed by a foot br., and Bynach Lodge is reached at about 12 m. from Braemar. Here the road altogether ceases; a pedestrian may, however, walk and climb over into Glen Tilt (see note on p. 210), but it is an impossibility to wheel a cycle over the summit. Standing at Bynach Lodge, the view, looking N. up the Dee valley, is indeed magnificent. The following, giants of the Cairngorms, Ben Muich Dhui, Cairntoul, Braeriach, Ben-a-Buird, Ben A'an, and the sharply defined Devil's Point, make a superb picture.

**ROUTE 222.****ABERDEEN TO BANCHORY.**

(Via S. side of R. Dee.)

The direct road to Banchory and the upper Deeside is via Route 221. The road detailed below has a very good surface throughout, after Bridge of Dee, and the gradients are easy. There is some attractive scenery on this road, the views of distant mountains being very fine, especially after the ninth m.s.

| <i>Miles from<br/>Banchory.</i> | <i>Places on the<br/>Road.</i>          | <i>Mileage.</i>                  |               | <i>General description of the Road.</i>                                                          |

|---------------------------------|--------------------------------|----------------------------------|------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|                                 |                                | <i>Inter-<br/>medi-<br/>ate.</i> | <i>Total</i>     |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |
| 16 $\frac{3}{4}$                | Bridge of Dee .....            | 2                                | 2                | along Union St. to fork. Here bear to <i>l.</i> into Holburn St. and Pl., following tramlines ( <i>l.</i> ). Pass under rly. br. and down Bridge of Dee Rd. to tramway terminus, at Bridge of Dee. Cross the br. and turn sharply to <i>r.</i> ( <i>l.</i> , ahead, Route 201). Gradual descent out of Aberdeen; surface rough in parts owing to local traffic.                                                                                                                                                                                                                                                                                        |
| 11 $\frac{1}{4}$                | Mill Inn.....                  | 5 $\frac{1}{2}$                  | 7 $\frac{1}{2}$  | Road follows S. bank of R. Dee, is fairly level for 2 m., then rises gently towards Heathpark; again ascending, easily, for $\frac{1}{2}$ m., and undulating to Mill Inn. Very good surface.                                                                                                                                                                                                                                                                                                                                                                                                                                                           |
| 5 $\frac{1}{4}$                 | Durris.....                    | 6                                |                  | Ascent from the inn (Route 220 leaving on <i>l.</i> $\frac{3}{4}$ m. beyond) to long stretch of gently undulating road, passing Craiglug, with easy rise towards the br. near Durris Ch. (on <i>r.</i> ). Level for 1 m., and Durris Br. (over Dee) is passed on <i>r.</i> , forming a connecting link with Route 221 near Crathes Sta. Gradual ascent for over 1 m., then again pleasantly undulating (Route 219 joins on <i>l.</i> , at W. Balbridie.) Almost level to Bridge of Feugh; turn to <i>r.</i> , cross the br., and turn again to <i>r.</i> when over ( <i>l.</i> , Route 218). Cross Bridge of Dee and ascend to Banchory. Good surface. |

**ABERDEEN TO BANCHORY. Reverse.**—At E. end of village turn down to *r.* to Bridge of Dee, bear to *l.* to Bridge of Feugh, which cross, and again bear to *l.* At fork keep to *l.*; then unmistakable road to Bridge of Dee (Aberdeen). Cross br., and follow tram lines into the city. When across rly. br. in Union St. turn down Market St. (on *r.*, short distance further) to General Post Office, at corner on reaching docks.

**ROUTE 223. ABERDEEN TO GRANTOWN.**

(Via Tomintoul.)

A very fine road, leading through beautifully varied scenery, to Cock Br.; then becoming a moor track, precipitously steep in parts, and always rough, to within a m. or two of Grantown. Only hardy riders should attempt that portion between Cock Br. and Grantown.

| 23                   | Cock Bridge.....             | 5 $\frac{3}{4}$ | 53 $\frac{1}{2}$ | Here the road of civilisation may be considered to end, as the appalling ascent which now confronts the rider can hardly be termed a road. Known as "the ladder," but perhaps better described as "the precipice" (1 in 8), it climbs an abrupt hillside, bends to <i>l.</i> and then to <i>r.</i> during the first portion of the ascent. From Cock Bridge there is a rise to 2048 ft. in 2 m., starting from 1330 ft. This track over the wild bare open moorlands, cut, as it is, through the roots of the heather, requires little description. * When the summit is reached the prospect is a vast one, the solitude impressive. The descent down the Conglass Water, road bending at one point sharply to <i>l.</i> , should be ridden with care. Several points of the road are dangerous owing to broken bridges, and at such places the streams themselves must be ridden through. At fork keep to <i>l.</i> into Tomintoul; or, go to <i>r.</i> and turn up to the village to <i>l.</i> at a point further on. |
| 21                   | Summit.....<br>(2048 ft.)    | 2               |                  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |
|                      |                              |                 |                  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |
| 14                   | Tomintoul .....<br>(Square.) | 7               | 62 $\frac{1}{2}$ | This is the highest village in the Highlands. Pass straight through, road bending down to <i>l.</i> , to waterside; cross br. to <i>l.</i> Very steep ascent, followed by level and very steep ascent and descent, <i>dangerous</i> , with bad turn at foot, to Bridge of Brown. Ascend by steep zig-zag for fully $\frac{1}{2}$ m., and more gradually for another $\frac{1}{2}$ m., then level. Steady short descent, intermediate level, and further descent for 5 m. On joining Speyside Rd. (Route 248) turn to <i>l.</i> and take first turn to <i>r.</i> , crossing river; then after $\frac{1}{2}$ m. keep <i>r.</i> , leaving the river, and ascend through woods to Grantown. Very rough stony road.<br>(Routes 248, 252, 253, and 254 joined here.)                                                                                                                                                                                                                                                           |
| 12                   | Cross R. Avon.....           | 2               |                  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |

**ABERDEEN TO ALFORD (VIA KEMNAY). Reverse.**—As in reverse of Route 223 to Tillyfourie. Take *L.* fork and avoid road to *L.* at Monymusk. Keep to *r.*  $\frac{1}{2}$  m. beyond Kemnay, avoid both roads ( $\frac{3}{4}$  m. apart) northwards to Kintore, and bear to *r.* crossing Tuach Burn. On entering Woodside keep to *r.*, passing the main portion of the village on *L.* Follow tramway lines through Woodside, and enter Aberdeen by Powis Ter. and George St., crossing Union St. into Market St., to docks; General Post Office on *L.* at corner.

# ROUTE 225. ABERDEEN TO INVERNESS.

(Via Keith and Elgin.)

A very fine main road; hilly between Bainshole and Fochabers, thence very good to Elgin; and excellent from Elgin into Inverness, being on the level most of the way. Alternative routes between one or two of the points on this road are described in the notes. Interesting scenery. Some fine views of Moray Firth and Sutherland and Caithness Hills after Elgin.

| Miles from Inverness. | Places on the Road.                             | Mileage.         |                  | General description of the Road.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |

| 92 $\frac{3}{4}$      | Branch-roads .....                              | 11 $\frac{1}{2}$ | 11 $\frac{1}{2}$ | Keep straight on when across the burn ( <i>L.</i> , Route 224), descending into Kintore. Bear slightly to the <i>L.</i> in the village, rly. on <i>r.</i> ; cross Alford branch of rly.; road ascends, and is undulating to Port Elphinstone (where a road connecting with Route 224 leaves on <i>L.</i> ) and, after crossing R. Don, enter Inverurie. Capital surface.<br>On leaving the village keep to <i>L.</i> at fork-roads, and again to <i>L.</i> at a subsequent fork a short distance further. Road ascending at first, then almost level, passing Drummines, where keep to <i>r.</i> at fork. Inveramsay jun. sta. passed on <i>r.</i> , and road bends round to <i>L.</i> to Pitcaple (sta. on <i>L.</i> ). The road runs, for about 2 m., between river and rly., and at Mill of Carden turns sharply to <i>r.</i> , crossing the stream and ascending slightly ( <i>L.</i> , see note <i>d.</i> ). For 1 m. the road is fairly level, but begins to re-ascend at Pitmachie (where a branch-road to <i>r.</i> connects with Route 232). At fork, 1 $\frac{1}{2}$ m. further, keep to <i>r.</i> ( <i>L.</i> , to Inch). Ascent becomes rather steeper by Colpy and junction with Route 232 on <i>r.</i> At fork, 1 m. beyond, keep to <i>L.</i> ; road fairly level for nearly 2 m. to Bainshole, where it again rises for 2 $\frac{1}{2}$ m. to the summit of the Foudland Hills. This ascending gradient is well engineered all the way. A long descent of 4 m., with one or two bends that require care, leads to junction with Route 234, Huntly rly. sta. and Huntly. Capital surface.<br>Pass straight through the town, and, 1 m. out, cross R. Deveron, and turning to <i>L.</i> ( <i>r.</i> , Route 239) commence a 1 $\frac{1}{2}$ m. ascent at Westerton, keeping to <i>r.</i> at fork half way up. Rapid descent to a br., from which road again rises by a steepish winding incline 2 $\frac{1}{2}$ m. long. At fork, $\frac{1}{2}$ m. up, keep to <i>L.</i> ( <i>r.</i> , to Cairnie). A little beyond Coachford, the descent begins towards Keith; take fourth turning on <i>r.</i> on entering the town. Good surface on the whole. |

| 54 $\frac{3}{4}$      | Keith.....                    | 3 $\frac{3}{4}$ | 49 $\frac{1}{2}$ | Pass through the town, and then turn to <i>r.</i> , passing rly., and crossing R. Isla and entering the village of Fife-Keith. After nearly $\frac{1}{2}$ m. of descending road, turn to <i>r.</i> , again passing rly.; and at branch-roads 1 m. further keep to <i>L.</i> ( <i>r.</i> , Route 244), passing N. Bogbain Farm on <i>L.</i> , road ascending to Forgieside, a short distance beyond which the descent, through magnificent pine forests, begins. The first m. of decline, past the cross-roads, is gradual, then 1 m. of fairly level road, and the subsequent descent towards Fochabers is rapid, and must be ridden carefully, the gradients varying from 1 in 19 to 1 in 24. Route 242 met before entering the village; turn to <i>L.</i> Very good surface.            |
| 54 $\frac{1}{4}$      | Fife-Keith.....               | $\frac{1}{2}$   |                  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |

|                       |                               |                 |                  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |
| 46 $\frac{3}{4}$      | Fochabers.....                | 4               | 57 $\frac{1}{2}$ | Pass through the village, and cross R. Spey; road ascends, slightly, to Mosstodloch cross-roads (Route 250 crossed). Easy rise for 2 m., then undulating, through wooded land, to Lhanbryde. The dip near Threapland must be ridden with care. (At Lhanbryde a road leaves, <i>r.</i> , for Garmouth, joining Route 250 there.) Leaving Lhanbryde, there is a splendid stretch of road, into Elgin, crossing on road level the Lossiemouth branch rly. before entering the town. Excellent surface.                                                                                                                                                                                                                                                                                       |
| 45 $\frac{1}{2}$      | Mosstodloch.....              | 1 $\frac{1}{4}$ |                  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |
|                       |                               |                 |                  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |
| 41 $\frac{3}{4}$      | Lhanbryde.....                | 3 $\frac{3}{4}$ |                  | Proceed through the broad market-place, passing the High Kirk, and at fork-roads at the Hospital, keep to <i>r.</i> ( <i>L.</i> , Route 247). (See also note <i>b.</i> ) Slight rise and fall to R. Lossie, and a further ascent for over $\frac{1}{2}$ m., then road continues undulating through thick woods, which extend, with few breaks, for practically 4 m. Road roughish in parts for some way. (Route 251 leaves, on <i>r.</i> , 3 $\frac{1}{4}$ m. out.) Slight descent to Alves, and a further short decline to Woodside. Fine bit of easily undulating road to Newmill (where keep to <i>r.</i> ); then level, with the exception of one intermediate decline, to Forres. (Route 251 joins, on <i>r.</i> , before entering the town, see note <i>c.</i> ) Excellent surface. |

| 15 $\frac{3}{4}$                 | Nairn.....<br>(Cross.)         | 2 $\frac{1}{4}$                  | 88 $\frac{1}{2}$  | roads, before passing rly., keep to <i>r.</i> ( <i>L.</i> , Route 254), cross R. Nairn and enter the town, turning <i>L.</i> Excellent surface.<br>Proceed along High St. to Dr. Grigor's statue, where turn to <i>r.</i> , road bending to <i>L.</i> a short distance further. At $\frac{1}{2}$ m. out, slight ascent, then again level. At 2 m. out, road forks; take road to <i>L.</i> ( <i>r.</i> to Fort George, see note <i>d</i> ). From this point there is a perfectly straight run for nearly 5 m. Level by Blackcastle Farm and slight fall towards level rly. crossing. Easy rise through a small wood and decline to the level, which continues beyond Petty Post Office. Slight descent by Culloden Sta. (the battlefield lies to the <i>L.</i> , about 2 m.—Route 255), and, passing the rly., runs on the level by the shore of the Inner Moray Firth. Rise to a br. over rly., then again level, towards Inverness. The road bends round to <i>L.</i> and the top of High St. is reached; Town Hall on <i>L.</i> down High St. Very good surface from Nairn, but the portions overhung by woods are apt to be sticky for some time after rain. No village between Nairn and Inverness, and no inns.<br>(Routes 210, 295, 300, 301, 303, 305, 306, 307, and 310 converge at Inverness.) |

**ABERDEEN TO INVERNESS.** *Reverse.*—From Town Hall proceed along High St. and Petty St. and at 1 m. out keep to *L.* at fork. Keep to *r.* before Petty Post Office; then long straight stretch; bear to *r.* towards Nairn at road junction. Enter Nairn by Leopold St. and at statue turn to *L.* At fork-roads beyond Nairn keep to *L.*, to Forres. At fork beyond Forres keep to *r.*, and again to *r.* at Alves, to Elgin. At Lhanbryde keep to *r.* at fork, and at Fochabers, on leaving the village, turn sharp to *r.* at branch-roads. 1 $\frac{1}{2}$  m. beyond Forgieside keep to *r.*; pass rly., enter Fife-Keith, and cross br. into Keith. Again pass rly. and turn sharply to *r.*, through town, and at southern end turn to *L.*; at fork keeping main road, which bears to the *r.* At fork near Cairney Ch. (on *L.*) keep to *r.* and cross a stream; and at  $\frac{3}{4}$  m. beyond Westerton turn sharply to *r.*, cross the br., and enter Huntly. Pass sta. (on *r.*), and at fork keep to *r.* At fork on hill summit keep to *L.*; at branch-roads before Colpy to *r.*, and at Colpy to *L.* Bear to *r.* at next road junction, and at Mill of Carden to *L.* Leaving Inverurie, cross R. Don, and passing through Port Elphinstone keep to *L.* at fork. Pass straight through Kintore, and at fork beyond keep *L.* Thence into Aberdeen by reverse of Route 224, from the Truach Burn.

**EDITOR'S NOTES.**—(a) The road to the *L.* at Mill of Carden is a connecting-link between Routes 225 and 233. It ascends to Oyne (1 m.) and rises gradually to Kennethmont Sta. (11 m.), falling from thence to junction with Route 233 before Gartly Sta. The surface of this road is very good. By using this loop-road the rider gains an alternative route between Inverurie and Huntly—less direct, but with easier gradients between those two points. The rly. runs parallel all the way.

- (b) An alternative route between Elgin and Forres runs via Pluscarden Abbey. Keep to *L.* at fork at Hospital and to *r.* at next fork. Beyond Torrieston turn to *L.*; Pluscarden Abbey lies to *r.*  $1\frac{1}{2}$  m. further. Gradual ascent from Elgin. From the br. beyond the Abbey the road ascends steeply for  $1\frac{1}{2}$  m. to Hazlebank, and there is a steep descent for 1 m. on the other side. Undulating by Cantsford and descending to Rafford, where keep to *r.* at fork, and at next fork (1 m. further) to *L.*; downhill into Forres. Fair surface. Distance between Elgin and Forres by this road is 15 m.
- (c) By turning to *r.* at this point, before entering Forres, and riding a short distance along Route 251, the famous Sweno's Stone will be seen standing in a field on the *L.*-hand side. It is a narrow shaft of sandstone 23 ft. high, carved with the figures of warriors and animals, the figures being arranged systematically in five divisions. It is supposed to commemorate the expulsion of the Danes.
- (d) The road to the *r.* at this fork leads to Campbelltown and Fort George. A fine, smooth, and almost level road, passing, for some part of the way, through plantations. At the cross-roads,  $6\frac{1}{4}$  m. out, turn to *r.* (*L.* to Fort George Sta.). Passing through Campbelltown, a dead level, by the shore, bending to *L.* to Fort George ferry. This ferry (1 m. wide) carries the rider to "Black Isle," Route 307 being joined at Fortrose, which lies  $1\frac{1}{2}$  m. from the ferry landing-place. Returning to Campbelltown, a road leads from thence to Petty Post Office on Route 225, leaving to *r.* at the cross-roads, turning sharply to *L.* at Stuarton, keeping for some distance near the shore, turning to *L.* near Petty Church, passing Castle Stuart and the rly., and joining the main road.

## ROUTE 226.

## ABERDEEN TO BANFF AND MACDUFF.

(Via Turriff.)

The direct route. Excellent surface on the whole throughout; a very exposed road during a N.E. headwind.

| <i>Miles from Banff.</i> | <i>Places on the Road.</i> | <i>Mileage.</i> |                 | <i>General description of the Road.</i>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |

| 15½               | Auchterless Station ...         | 3½             |        | and then re-descending to a stretch of almost level road. Near the entrance gateway to Fyvie Castle (on <i>r.</i> ) the road bends abruptly first to <i>r.</i> and then to <i>L.</i> Level to 1¼ m. beyond Auchterless Sta., then gradually ascending for a short distance, followed by a delightfully easy descent by Darra towards Turriff. On approaching fork near rly. sta., keep to <i>r.</i> , pass under rly. br. (very awkward turn), and cross the Idoch Water. Road bends to <i>L.</i> and ascends into the town. Turn to <i>r.</i> on entering the Main St. From Old Meldrum to Fyvie the surface is fair, but becomes excellent on the level between Fyvie and Turriff. (Route 240 leaves at W. end of Main St.).                                                                                                                                                                                              |

| 7½                | Plaidy Station .....            | 3½             |        | At cross-roads at Commercial Hotel (on <i>r.</i> ) turn to <i>L.</i> , and about 100 yds. further turn to <i>r.</i> , road ascending stiffly. Fairly level for ¼ m., followed by an easy ascent and descent, and continued long easy undulations, with downward tendency to Plaidy Sta. Here rly. is crossed, road continuing to descend to a bridge near Castleton, from which it re-ascends for nearly ½ m., and is undulating, with upward tendency, to beyond King Edward Sta. Almost level for 2½ m., rly. running on <i>r.</i> -hand, then descending, road bending round gradually towards <i>L.</i> , and winds down to the <i>r.</i> bank of R. Deveron. Cross the river by Banff Br. to <i>L.</i> ; level along the shore. Turn to <i>L.</i> up Bridge St. and again to <i>L.</i> in Low St., ascending steep hill, and bearing to <i>r.</i> into High St. Good surface.<br>(Routes 234 and 239 are joined here). |

| ½ | Banff Bridge .....            | ... | ... | For Macduff, do not cross the br., but follow the road round to <i>r.</i> , by the shore; level for ½ m. Harbour passed on <i>L.</i> ; bear to <i>r.</i> , and ascend into the town. Surface lumpy from Banff Br. (Route 235 is met here.) |
|   | MACDUFF .....<br>(Town Hall.) | ½   | 46  |                                                                                                                                                                                                                                            |

ABERDEEN TO BANFF AND MACDUFF. *Reverse*.—From Banff, High St., turn to *L.* down steep hill into Low St., to *r.* along Bridge St., and again to *r.* along the Shore Rd. to Banff Br.; when across which, turn to *r.*

From Macduff descend towards the Shore Rd., bending to *L.*; following Shore Rd. (passing access road to sta. on *L.*) round to *L.* to Banff Br. Here meet reverse from Banff, as above.

From Banff Br. road bends to *L.*, ascending, and then to *r.*, with rly. running on *L.* Unmistakable road to Turriff by King Edward and Plaidy Stas. On entering Turriff turn down to *L.* at cross-roads, and sharply to *r.* at Commercial Hotel corner. Opposite Post Office turn down to *L.* towards sta.; pass under rly. and turn sharply to *L.*, keeping thence straight on, rly. being on *L.* At Darra keep to *r.*, shortly afterwards crossing over rly. twice. Beyond Auchterless Sta. keep to *r.* at fork; and on approaching entrance gateway at Fyvie Castle turn to *r.*, and then to *L.*, passing sta. on *r.* Turn to *L.* at southern end of Old Meldrum village, and at fork beyond keep to *r.* At rly. br. before Dyce turn to *L.*, passing under rly., then keep to *r.* From Auchmill, as in reverse of Route 224 into Aberdeen.

## ROUTE 227. ABERDEEN TO PETERHEAD.

Easy gradients and good surface. The surface, however, becomes very rough on approaching Peterhead. Fine coast scenery during the last few miles.

| Miles from<br>Peterhead. | Places on the<br>Road.                          | Mileage.                |                  | General description of the Road.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |

| 33 $\frac{3}{4}$         | <b>ABERDEEN</b> .....<br>(General Post Office.) | ...                     | ...              | From Post Office proceed up Market St., turn to <i>r.</i> on entering Union St., and follow tramlines to <i>L.</i> along King St. Leave the city by King Street Rd., passing King's College and Old Aberdeen on far <i>L.</i> Road slightly undulating to Bridge of Don and Damhead; ascent to fork-roads, where keep to <i>r.</i> ( <i>L.</i> , Route 230). 2 m. of undulating road with downward tendency to next fork, where keep again to <i>r.</i> , with descent to a br. A succession of short rises and falls for about 2 m., with easy rise beyond Balmedie, followed by a stretch of fairly level road, and decline beyond Pitgersie to the Foveran Burn. Ascent for $\frac{1}{4}$ m., and almost level to cross-roads at Fontainebleau (here Route 232 is crossed). Bear slightly to <i>L.</i> , and at fork, ahead, keep to <i>r.</i> , descending to Bridgend. A winding ascent for 1 m., then again descending, to Ellon. Surface rough for a short distance out of Aberdeen; then, on the whole, excellent. |

|                          | (Town Hall.)           |                         |                  |                                                                                                                                                                                                                                                                                                                                                                                                                                                        |

**ABERDEEN TO PETERHEAD. Reverse.**—Leaving the town due W., keep to *L.* at fork, and following coast line avoid all branch-roads to *L.*, leading to coast villages. Descent to Water of Cruden beyond the post office at the cross-roads, keeping to *L.* before reaching the bridge. Bear to *L.*, where roads meet, at Birness; and abruptly to *r.* 1 $\frac{1}{4}$  m. before Ellon. Cross the river and keep to *L.* at fork. At Fontainebleau, where four roads meet, keep to *r.* at fork ahead; thence unmistakable into Aberdeen. Enter city by King St. Rd. and King St., bear to *r.* with tramlines in Castle St. into Union St.; turn down Market St. (third thoroughfare on *L.*) to General Post Office.

## ROUTE 228. ABERDEEN TO FRASERBURGH.

Very good surface, except for a few miles beyond Mintlaw. This is the direct road to Fraserburgh, the other route being via Peterhead: see Nos. 227, and 236.

| Miles from<br>Fraserburgh. | Places on the<br>Road. | Mileage.                |                  | General description of the Road.                                                                                                                                                                                                                                                                                                                                                                                                                                                 |

ABERDEEN TO FRASERBURGH. *Reverse.*—Leaving Fraserburgh rly. sta., (passed on *l.*), keep to *l.* at fork, then straight on. At fork, 1 m. beyond Rathen, keep to *r.* and cross Route 235 at Mintlaw. Bear to *r.* on nearing Birness fork; thence as in reverse of Route 227 to Aberdeen.

## ROUTE 229. ABERDEEN TO NEW DEER.

Fairly good road on the whole, but rough in parts; hilly and poor beyond New Deer, towards junction with Route 235.

## Route 230.

**ABERDEEN TO METHLICK**—*continued.*

| Miles from<br>Methlick. | Places on the<br>Road.    | Mileage.                |        | General description of the Road.                                                                                                                                                                                                           |
|-------------------------|---------------------------|-------------------------|--------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|                         |                           | Inter-<br>medi-<br>ate. | Total. |                                                                                                                                                                                                                                            |
| 2½                      | Haddo House .....         | 2¼                      |        | grounds. This is the mail-gig route, and the road is open to pedestrians and cyclists. Keep Haddo House on <i>r.</i> , passing close to it, until public road is reached at gate, near R. Ythan. Turn <i>l.</i> to Methlick. Good surface. |
|                         | <b>METHLICK (a)</b> ..... | 2½                      | 22½    |                                                                                                                                                                                                                                            |

**ABERDEEN TO METHLICK. Reverse.**—Go down the riverside, and on reaching the gate of Haddo grounds, enter the private rd. to *r.*, and pass Haddo House. In Tarves bear *l.*, and *r.* on meeting another road at Bridgefoot. Keep *r.* at fork and go over cross-roads at Pitmedden. Keep *r.* at branch-roads; thence easily followed to Aberdeen.

(a) A good run from Methlick may be obtained by going westwards along the banks of the R. Ythan for about 5 m. Finely kept road and charming scenery by the Braes o' Gight (or Gicht).

**ROUTE 231 ABERDEEN TO TARLAND.**

The only villages on this route are Echt and Tarland. Lumpy surface out of Aberdeen, then fairly good to Echt, beyond which it is inferior to near Tarland, when it improves somewhat.

| Miles from<br>Tarland. | Places on the<br>Road. | Mileage.                |        | General description of the Road.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |

| 24¾                    | Fork-roads .....       | 6½                      | 6½     | A gradual descent by Cairnie to Garlogie, where, at fork, keep to <i>r.</i> after crossing Leuchar Burn. A gradual rise to Echt, passing the Free Ch. on <i>r.</i> before entering the village. From Echt the road declines gradually for almost 1 m., then ascends, steeply in parts, to beyond Midmar Ch. (on <i>r.</i> ), is then undulating for 1 m., and re-ascends by Auchorie. The latter portion of this climb is stiff; keep to <i>r.</i> at fork roads. Descent for 1¼ m. by Drumlassie (on <i>r.</i> , off the road) and ascent towards Tornaveen, with descent to the br. at Ennets. Surface good to Echt, then only fair. |
| 21½                    | Garlogie .....         | 3¼                      |        |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |

|                                |                                |  |                  |                                                                                                                                                                    |
|                                | TARLAND .....                  | 6 $\frac{1}{4}$                                                                   | 31 $\frac{1}{4}$ | hill run of over 3 $\frac{1}{2}$ m. to Tarland, with somewhat of a sudden dip into the village; care necessary. Poor surface in parts, but fair riding as a whole. |

**ABERDEEN TO TARLAND. Reverse.**—Proceeding through the village to the cross-roads at the ch., turn to the *l.* up the steep ascent. At 6 m. keep to *l.* at fork, and again to *l.* at fork near the wood beyond Tullochvenus. Avoiding all farm roads branching off at intervals to *r.* and *l.*, the road is unmistakable into Aberdeen. See latter portion of reverse of Route 223.

**EDITOR'S NOTE.**—From Tarland a road runs by way of Lochs Davan and Ceander, joining Route 221 on Muir of Dinnet, near Cambus o' May Sta., and within 5 m. of Ballater. Climb of 1 $\frac{1}{2}$  m. out of Tarland, then undulating; fair surface, rough in parts, to Cambus o' May, and excellent to Ballater. Tarland to Ballater, 11 m.

## ROUTE 232. NEWBURGH TO HUNTLY.

(Via Old Meldrum.)

A cross country route, running almost directly E. to W. Hilly, and of inferior surface, between Pitmedden and Old Meldrum, but easy gradients, and good surface from thence to Huntly.

| 34 $\frac{1}{2}$              | NEWBURGH .....                 | ...                              | ...           | Proceeding through village southerly, turn to <i>r.</i> and leave due W. Short stiffish rise, then easier ascent to the branch-roads at Fontainebleau. Route 227 is crossed; keep to <i>l.</i> at the fork here. Gradual fall to the Tarty Burn, followed by short rise and fall, and long ascent towards Logierieve Sta. Pass over rly.; then pleasantly undulating to cross-roads, where bear to <i>r.</i> , along bank of the Bronie Burn, to Pitmedden fork-roads. Slight ascent to Pitmedden. Good surface. |

| 21 $\frac{3}{4}$      | Old Meldrum .....<br>(Square.)                   | $\frac{3}{4}$           | 12 $\frac{3}{4}$                     | Avoiding all sts., etc., to <i>r.</i> , descend rapidly out of the village. Rly. sta. passed on <i>l.</i> , off the road. Long undulating stretch of open road for 2 $\frac{1}{2}$ m., then ascending for 1 $\frac{1}{2}$ m., and undulating beyond for 1 m., but still with upward tendency. Downhill to the cross-roads, and beyond. Cross over rly., and fairly level to the wayside post office, and ascending, gradually, to Rothmaise, beyond which the road runs in a straight line for some distance, and is rather dreary. Descent to a br., then very gradual rise for 1 $\frac{1}{2}$ m. A dip to the br. beyond the cross-roads (Kirkton of Culsalmond to <i>r.</i> ), then level to junction with Route 225. Turn to <i>r.</i> and continue to Huntly as on p. 235. Good surface. |

**NEWBURGH TO HUNTLY.** *Reverse.*—As in reverse of Route 225 for 10 m., then turn sharply to *l.* before reaching Colpy. Pass over cross-roads near Culsalmond; cross rly. and pass second cross-roads; then a straight-ahead road into Old Meldrum. Keep well to *r.* in village, turning to *r.* at its S. end; at fork  $\frac{3}{4}$  m. beyond turn to *l.* At  $\frac{1}{2}$  m. beyond Pitmedden keep to *l.*, and at Fontainebleau keep again to *l.* at fork. Turn sharply to *l.* into Newburgh village.

## ROUTE 233. ALFORD TO HUNTLY.

Fine surface to Lumsden, then rougher and hilly to Gartly. Very pleasant undulating bit of road down Strath Bogie to Huntly. A direct connection between Routes 223 and 225.

**ALFORD TO HUNTLY. Reverse.**—Leave Huntly Square, going due S., and ascend Strath Bogie. At fork beyond Gartly keep to *r.* At 2 m. beyond Rhynie cross Water of Bogie and turn *L.* At Mossat fork keep *L.*; cross the Don to *r.* at Alford Br., and  $\frac{1}{2}$  m. further turn sharply to *L.*, to Alford village.

## ROUTE 234.

## HUNTLY TO BANFF.

(Via Aberchirder.)

Latter part of this route is hilly; the surface is fair to Bridge of Marnoch, and improves beyond. Fine views from the higher ground.

**HUNTLY TO BANFF (VIA ABERCHIRDER).** *Reverse.*—From High St. continue out of the town in a southerly direction, avoiding all roads to *l.*, and descending,  $\frac{1}{2}$  m. out, to R. Deveron side. At fork keep to *r.*, and again to *r.* at next fork. Leaving Aberchirder, road bends to *l.* and descends a bending hill to Auchintoul Burn; care required on this descent. Keep to *r.* at fork-roads 2 m. beyond Bridge of Marnoch, and again to *r.* at fork 2 m. beyond Bogniebrae. Join Route 225 at 3 m. further and turn to *r.* to Huntly.

## ROUTE 235. PETERHEAD TO BANFF.

On the whole an excellent road. Surface rough and lumpy in places, but this is only local. The gradients are well-engineered and are hardly perceptible in parts.

|                   |                              |                 |                  | Deer. Road nearly level by policies of Pitfour, passing the Abbey of Deer on <i>L.</i> An easy ascent commences at Mill of Bruxie, beyond which Route 237 branches off to <i>r.</i> ; keep to <i>L.</i> , with easy running to Brucklay Sta. Excellent surface.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |
| 20 $\frac{3}{4}$  | Brucklay Station .....       | 5 $\frac{1}{4}$ | 14 $\frac{1}{4}$ | Easy undulating ascent through woods; apt to be sticky after rain, and rutty, but good on the whole. Long gentle rise to the woods of New Pitsligo; fairly level for about $\frac{1}{2}$ m., then a short, sharp descent towards the village, bearing to <i>L.</i> Very good surface.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |
| 16 $\frac{1}{2}$  | New Pitsligo .....           | 4 $\frac{1}{4}$ | 18 $\frac{1}{2}$ | Proceed straight through village, road bearing round to <i>L.</i> at the foot of rising ground. Route 238 joins on <i>r.</i> at Overtown. Easy ascent out of New Pitsligo, and, after $\frac{3}{4}$ m., a series of gentle descents with intervening level bits of road. Fairly level to the Woods of Byth; keep to <i>r.</i> at fork ( <i>L.</i> , see p. 243). Ascent for a m. through the woods and beyond, surface generally soft, especially after rain. A series of undulations on the down grade towards Fishrie Post Office, beyond which there is a steepish descent, and a very stiff ascent. Easy upward gradient towards Longmanhill, before which road bends to <i>r.</i> When past the village bear round to <i>L.</i> ; a long descent into Macduff, entering by Buchan St., Skene St., to Crook of Ness St. Last portion, surface lumpy; but very good on the whole. |

**PETERHEAD TO BANFF. Reverse.**—From High St. turn to *L.* down steep hill to Low St., and again to *L.* into Bridge St., continuing along shore to the br. over R. Deveron, across which bear *L.* Enter Macduff by Crook of Ness St., and pass through the town by Skene St. and Buchan St. Keep to *r.* at fork, and at end of Longmanhill village bear to *L.* Keep to *L.* at branch-roads near Byth Woods and to *r.* at branch-roads at Overtown before New Pitsligo. At end of that village bear to *L.*, ascend hill, and bear round to *r.* Pass over cross-roads about a m. further; avoid

road to *L.* before Bruxie Mill and road to *r.* before Mintlaw. Pass over cross-roads at Mintlaw, thence unmistakable to Peterhead.

## ROUTE 236.

### PETERHEAD TO FRASERBURGH.

The direct road between these two towns—an easy, level road on the whole. Fraserburgh may also be reached by following Route 235 to Mintlaw, and by proceeding northwards from the cross-roads there by Route 228, or by going via Route 237 from Mintlaw.

## Route 237. MINTLAW TO FRASERBURGH—continued.

| Miles from<br>Fraserburgh. | Places on the<br>Road.            | Mileage.                |                  | General description of the Road.                                                                                                                                                                                                                                                                                                                                                                                        |
|----------------------------|-----------------------------------|-------------------------|------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|                            |                                   | Inter-<br>medi-<br>ate. | Total.           |                                                                                                                                                                                                                                                                                                                                                                                                                         |
| 8 $\frac{3}{4}$            | Strichen.....                     | 3                       | 10 $\frac{3}{4}$ | Strichen, rly. running on r. At cross-roads keep to r., by rly., into the village. Fair surface.                                                                                                                                                                                                                                                                                                                        |
| 3 $\frac{1}{2}$            | Memsie .....                      | 5 $\frac{1}{4}$         | 16               | Turn abruptly to l., when a road is met just at the village, at right angles, near rly. Almost level for $\frac{3}{4}$ m., followed by 1 m. of ascent, road bending to r.; keep to r. again at fork. Long downhill run for fully 1 $\frac{1}{2}$ m., followed by short rise, road again falling past cross-roads towards Memsie. Uphill from a br. over a small stream to the cross-roads at Memsie. Very good surface. |
|                            | FRASERBURGH<br>(The Cross.) ..... | 3 $\frac{1}{2}$         | 19 $\frac{1}{2}$ | Keep straight on, descending for 1 $\frac{1}{2}$ m. to another small br., and undulating, with downward tendency, towards Fraserburgh. Join Route 228, $\frac{1}{2}$ m. from the town, and bear l.; almost level by Saltoun Pl. and Cross St. to High St. Very good surface.<br>(Routes 228, 236, and 238 meet here.)                                                                                                   |

**MINTLAW TO FRASERBURGH. Reverse.**—Leave by Cross St. and Saltoun Pl., and keep to r. at fork  $\frac{1}{2}$  m. beyond the town. A straightforward road to Strichen. Here bear to r., crossing br., and to l. about  $\frac{1}{2}$  m. further, with rly. on l. for some distance. When the cross-roads, a m. beyond Fridayhill, is reached, turn to l. and continue to Mintlaw by Brucklay Sta. by the main Peterhead—Banff Rd. (Route 235).

**EDITOR'S NOTES.**—(a) Strichen may also be reached from Mintlaw by turning to r. just beyond Bruxie Mill, skirting Louden woods, and entering Strichen, passing ch. on l. and going under rly. This road is not recommended, though it is shorter than that detailed above.

(b) Yet a third way of reaching Strichen from Mintlaw is by following Route 228 for some distance northwards (about 2 $\frac{1}{2}$  m.), then bearing to l. at Sandhole, passing over all cross-roads, keeping to l. at fork, and avoiding all further cross and branch-roads to side of rly. (running on r.) just before Strichen. Here turn to r., then sharply to l.; sta. being on l. This is a fairly good road, and more direct.

## ROUTE 238. FRASERBURGH TO BANFF.

The most direct rideable connection between the two towns; a very good road on the whole, with capital surface most of the way.

| Miles from<br>Banff. | Places on the<br>Road.            | Mileage.                |        | General description of the Road.                                                                          |
|----------------------|-----------------------------------|-------------------------|--------|-----------------------------------------------------------------------------------------------------------|
|                      |                                   | Inter-<br>medi-<br>ate. | Total. |                                                                                                           |
| 26                   | FRASERBURGH<br>(The Cross.) ..... | ...                     | ...    | Leave by High St., and at fork $\frac{1}{2}$ m. out, keeping to l. (r., coast road, see note). Pleasantly |

Route 238. **FRASERBURGH TO BANFF**—*continued.*

| <i>Miles from Banff.</i> | <i>Places on the Road.</i>  | <i>Mileage.</i>       |                 | <i>General description of the Road.</i>                                                                                                                                     |
|--------------------------|-----------------------------|-----------------------|-----------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|                          |                             | <i>Inter-mediate.</i> | <i>Total.</i>   |                                                                                                                                                                             |
| 21 $\frac{3}{4}$         | Ardlaw .....                | 4 $\frac{1}{4}$       |                 | undulating by Percyhorner, then ascending. Pass cross-roads at Ardlaw, and keep to <i>r.</i> at fork, beyond. Nearly level to Tyrie Ch. and Post Office. Very good surface. |
| 20 $\frac{3}{4}$         | Tyrie Church .....          | 1                     | 5 $\frac{1}{4}$ | Easy rise for $\frac{3}{4}$ m., then ascending in a more marked manner for nearly 2 m., followed by a further 2 m. of pleasantly undulating road.                           |
| 15                       | Overtown .....              | 5 $\frac{3}{4}$       | 11              | Re-ascending towards Overtown, at junction with Route 235, where bear to <i>r.</i> Good surface.                                                                            |
|                          | BANFF<br>(Town Hall.) ..... | 15                    | 26              | Route 235 to Banff.                                                                                                                                                         |

**FRASERBURGH TO BANFF.** *Reverse.*—As in reverse of Route 235 to branch-roads at Overtown, before New Pitsligo. Turn to *L.*, thence unmistakable to Fraserburgh.

**EDITOR'S NOTE.**—There is no rideable road to Banff by the coast. A road certainly does exist, but this is all it can be said to do. For through communication it is altogether worthless, as the hills are of a startling nature, and the surface loose and bad. The road is quite rideable, though hilly, to Aberdour Bay, and is fair for a m. or two E. of Macduff, but riders should, as a rule, be careful to avoid this so-called "short-cut." There is compensation, however, for those who choose to follow this road: the cliff scenery is very fine, and some of the little fishing villages decidedly quaint.

**ROUTE 239. BANFF TO HUNTLY.**

(See also Route 234.)

A very good road on the whole and strikingly picturesque towards the head of Glen Barry.

| <i>Miles from Huntly.</i> | <i>Places on the Road.</i>  | <i>Mileage.</i>       |                 | <i>General description of the Road.</i>                                                                                                                                                                                                                                                                                                                                                                                                       |
|---------------------------|-----------------------------|-----------------------|-----------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|                           |                             | <i>Inter-mediate.</i> | <i>Total.</i>   |                                                                                                                                                                                                                                                                                                                                                                                                                                               |
| 21 $\frac{1}{4}$          | BANFF<br>(Town Hall.) ..... | ...                   | ...             | From High St. proceed by S. Castle St., bear to <i>L.</i> , then to <i>r.</i> , and leave by the coast road westwards, rly. running at first on <i>r.</i> , then on <i>L.</i>                                                                                                                                                                                                                                                                 |
| 18 $\frac{3}{4}$          | Lady's Bridge Station..     | 2 $\frac{1}{2}$       |                 | Descent out of the town, then level by Lady's Br. Sta. (on <i>L.</i> ) and for a m. beyond, then gently ascending. At fork near Ordens keep to <i>L.</i> , passing rly. Short stretch of level, then again ascending for 1 $\frac{1}{2}$ m., and falling towards Cornhill; keep to <i>r.</i> at fork, road then ascending easily into the village. Very good surface, except for a little distance out of Banff, where it is apt to be lumpy. |
| 16 $\frac{1}{2}$          | Ordens Fork-roads.          | 2 $\frac{1}{4}$       |                 |                                                                                                                                                                                                                                                                                                                                                                                                                                               |
| 13                        | Cornhill .....              | 3 $\frac{1}{2}$       | 8 $\frac{1}{4}$ | Easy ascent for $\frac{1}{2}$ m., then falling by Bogtown to branch-roads, where keep straight on (sharp <i>r.</i> ,                                                                                                                                                                                                                                                                                                                          |

## Route 239.

**BANFF TO HUNTLY**—*continued.*

| 10                            | Glen Barry Station.....        | 3                                | 11½           | to Portsoy, see note). The road now rises on a steady incline up Glen Barry to the fork roads near the sta. (which is on <i>r.</i> ). Here keep to <i>l.</i> ( <i>r.</i> , Route 241). Good surface.<br>Fine downhill run for 1½ m. to the level; then gently ascending to another level stretch, and passing through plantations to Rothiemay cross-roads. Still level for over ½ m., then quick descent to the R. Isla, followed by a long ascent by Rothiemay Sta. (on <i>r.</i> ), with R. Deveron on <i>l.</i> , past Haddock, to the woods beyond. Decline by Robieston to the level, and at branch-roads turn sharply to <i>l.</i> and cross R. Deveron ( <i>r.</i> , Route 225), with gentle rise towards Huntly. Fair surface; lumpy in parts.<br>(Routes 225, 232, 233, 234, and 240, are joined here.) |

**BANFF TO HUNTLY. Reverse.**—Follow portion of Route 225 (p. 235) to br. over Deveron a m. out; here bear to *r.* Beyond Rothiemay Sta. cross R. Isla, and at fork, just beyond, keep *l.*; pass cross-roads near Rothiemay, and at fork 1¾ m. further keep to *r.* (*l.* to Knock Sta.). At fork, at lower end of Glen Barry, keep to *r.*; thence unmistakable to Banff, avoiding all cross and local roads to either side. Bear to *r.* and enter by South Castle St. into High St.

**EDITOR'S NOTE.**—The road to *r.* before entering Glen Barry, mentioned in the detailed description (*l.* at fork at lower end of glen in reverse), is the direct Huntly—Portsoy Rd., not given as a separate route. With few exceptions it is a continuous descent all the way to the coast, from the fork mentioned, but the surface is not so good as by the longer road, following reverse of Route 239 (above) to fork near Ordens, and here turning to *l.*, continuing to Portsoy by Route 242. The distance by the direct road is nearly 18 m.

**ROUTE 240. HUNTLY TO TURRIFF.**

Excellent surface to Aberchirder, then not quite so good, and very hilly to Turriff. Another road connects Huntly with Turriff: see note below.

|                                |                                | <i>Inter-<br/>medi-<br/>ate.</i> | <i>Total.</i> |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |
| 3½                             | Scotston .....                 | 4½                               |               | for ½ m. to a stretch of fairly level running ; then descends rapidly for 1¾ m. to a small br., from whence it again ascends to the branch-roads. Here turn to <i>r.</i> ( <i>L.</i> , by-road to Banff), with downhill run to Scotston. For a m. the road is undulating, still with downward tendency, and for the next m. descends steeply towards Eastside Br. ; keep to <i>L.</i> beyond Forglen Ch. (on <i>L.</i> ), rly. passed beyond Eastside Br. and road ascends into Turriff. Very fair surface. (Route 226 joined here). |
| ¾                              | Eastside Bridge .....          | 2¾                               |               |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |
|                                | <b>TURRIFF</b> .....           | ¾                                | 19½           |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |

**HUNTLY TO TURRIFF. Reverse.**—Leave Turriff by Main St., pass rly., and cross Eastside Bridge. At fork beyond Scotston keep *L.*, and on meeting Route 234 before Aberchirder turn sharply to *L.* Thence into Huntly proceed as in reverse of Route 234.

**EDITOR'S NOTE.**—Another connecting road with Turriff leaves Route 234 to *r.* at Bogniebrae and goes by way of Glendronach Distillery, where turn to *L.* and ascend a very steep hill. Road descends by Westfield to Fortrie, and again ascends for about a m., falling from thence in a winding manner to a br., from which it re-ascends to a long stretch of fairly level running, then descending towards Turriff. When at the sta. turn sharply round to *L.* (care required) and enter the town as described on p. 239. This is a much hillier road than Route 240 (above).

**ROUTE 241.****BANFF TO KEITH.**

The gradients are all easy, comparatively speaking, and the surface is good as a whole, with a few local roughnesses. Attractive scenery about Glen Barry, at the head of which Knock Hill is prominent on *r.*

|                              | (N. end of town.)              |                                  |               |                                                                                                                                                                                                                                                                                                                |

**BANFF TO KEITH.** *Reverse.*—Leave due N., road ascending at first, then falling to br. over R. Isla, after crossing which, bear to r., and keep again to r. at branch-roads. At  $1\frac{3}{4}$  m. beyond Grange Ch. keep to l. Reverse of Route 139 from Glen Barry Sta.

## ROUTE 242. BANFF TO INVERNESS.

A splendid road, having capital surface throughout and, on the whole, easy gradients. Seafield Brae (i in 19) at Cullen is the steepest hill met with, and the descent to Fochabers is also fairly steep. The scenery, especially near Fochabers, is very striking.

**BANFF TO INVERNESS.** *Reverse.*—Route 225 (reverse) to Fochabers. Keep forward out of the village, ascending into wooded land. Enter Cullen by Red Row, turn sharp r. under rly. br. and ascend Seafield St. and Seafield Brae beyond. Keep to l. at branch-roads, and keep again to l. after crossing Burn of Boyne. Reverse of Route 239 into Banff.

## ROUTE 243.

## KEITH TO CULLEN.

Rather a dreary road, with variable surface, but affording good riding on the whole. There is a fine downhill run for near 6 m. towards Cullen; a much more difficult road to ride in the reverse direction.

| Miles from Cullen. | Places on the Road.                               | Mileage.        |                  | General description of the Road.                                                                                                                                                                                                                                                                                                                      |

**KEITH TO CULLEN. Reverse.**—Ascend Seafield Brae and keep r. at fork. An unmistakable road to junction with Route 241 at Auchinhove, thence follow that route to Keith.

## ROUTE 244.

## KEITH TO DUFFTOWN.

(Direct Road.)

A hilly road with variable surface—good in some parts, indifferent and roughish in others. Some very attractive scenery is passed through near Drummuir and at head of Glen Fiddich. See also Route 245.

| Miles from Dufftown. | Places on the Road.              | Mileage.       |        | General description of the Road.                                                                                                                                                                                                                                |

## Route 244.

## KEITH TO DUFFTOWN—continued.

| Miles from Dufftown. | Places on the Road.                           | Mileage.       |                 | General description of the Road.                                                                                                                                                                                                                                                                                                                                                                                                                                                 |
|----------------------|-----------------------------------------------|----------------|-----------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|                      |                                               | Inter-mediate. | Total.          |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |
| 5                    | Drummuir .....                                | $\frac{3}{4}$  | $5\frac{3}{4}$  | Downhill for $\frac{1}{2}$ m., then an ascent of the long hill in front, keeping to <i>r.</i> at fork. From the hill-top there is a decline beside rly. line, which follows the road from Keith, with a sharp turn to <i>l.</i> This is followed by a slight rise, passing under rly., and having a stiffish ascent, on which keep to <i>r.</i> , with very lumpy surface into Dufftown. Enter by Fife St. To <i>r.</i> at Clock Tower for Routes 245 and 246. Variable surface. |
| 3                    | Summit .....                                  | 2              |                 |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |
|                      | DUFFTOWN ( <i>a</i> )<br>(Clock Tower.) ..... | 3              | $10\frac{3}{4}$ |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |

**KEITH TO DUFFTOWN.** *Reverse.*—Leave by Fife St., bear round to *l.*, cross R. Fiddich to *r.*, pass under rly., and follow rly. to *r.* Before Drummuir keep to *r.*, thence an unmistakable road by rly. line to near Fife-Keith. In that village turn *r.* to Keith.

**EDITOR'S NOTE.**—The road up Glen Rinnes beyond Dufftown and over the Watershed into Glenlivet, is very hilly for 3 m., followed by a long gradual ascent on rough surface to summit,  $7\frac{1}{2}$  m. from Dufftown. Thence it is chiefly downhill with roughish surface to Achbreck in Glenlivet. Distances from Dufftown: Craighead Inn,  $8\frac{1}{2}$  m.; Achbreck,  $10\frac{1}{4}$  m. A road connects Achbreck with Tomintoul (on Route 223). There is a great amount of uphill work to be done, but the road, running as it does over the high moorlands, has fair surface as a whole but is loose and rough here and there. Tomintoul is  $8\frac{1}{4}$  m. from Achbreck. The scenery on the road from Dufftown to Achbreck is very fine in Glen Rinnes.

**KEITH TO PORT GORDON AND BUCKIE.**—Follow portion of Route 225 for  $2\frac{1}{4}$  m., then bear *r.*, passing Forgie Sta. on *l.*  $\frac{1}{4}$  m. beyond. An undulating road, with good hard surface to fork, where keep to *r.* and pass over rly.; road ascending. The undulations continue more or less all the way, with short intermediate level stretches. At 7 m. from Keith, where road forks, keep again to *r.* Cross Route 242, and keep forward towards Port Gordon, having short rough descent for 200 yds. near rly. br. before that village, into which bear *r.* Keep forward along coast to Buckie. Port Gordon,  $10\frac{1}{4}$  m.; Buckie, 12 m.

## ROUTE 245. KEITH TO CRAIGELLACHIE AND DUFFTOWN.

An easy road for 6 m., then hilly. Surface good at first, then fair after Mulben cross-roads and rather variable on the hills up to Dufftown. The scenery in parts is very fine. This forms an alternative route to the preceding one (244).

| Miles from Dufftown. | Places on the Road.              | Mileage.       |        | General description of the Road.                                                                                                                                            |
|----------------------|----------------------------------|----------------|--------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|                      |                                  | Inter-mediate. | Total. |                                                                                                                                                                             |
| $16\frac{1}{4}$      | KEITH<br>(N. end of town.) ..... | ...            | ...    | Proceed, passing rly. and crossing river, to Fife-Keith, where keep <i>l.</i> at fork beyond, having rly. on <i>r.</i> Fine, almost level running for $4\frac{1}{2}$ m. out |

## Route 245.

KEITH TO GRAIGELLACHIE AND DUFFTOWN—*cont.*

| Miles from<br>Dufftown. | Places on the<br>Road.   | Mileage.                |                  | General description of the Road.                                                                                                                                                                                                                                                                                                                                                                                                                                               |
|-------------------------|--------------------------|-------------------------|------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|                         |                          | Inter-<br>medi-<br>ate. | Total.           |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |
| II $\frac{1}{4}$        | Blackhillock .....       | 5                       |                  | of Fife-Keith to cross-roads, where turn <i>L.</i> ( <i>r.</i> , to Mulben Sta. ; forward, a very rough road to Route 250). Very good surface.                                                                                                                                                                                                                                                                                                                                 |
| IO $\frac{3}{4}$        | Mulben Cross-roads ..... | $\frac{1}{2}$           | 5 $\frac{1}{2}$  | Easy for some way beyond the turn, then a stiffish rise into woods passing Boharn Ch. on <i>r.</i> , on the hillside. At top of first ascent the road becomes fairly level for about $\frac{1}{2}$ m. and again rises. In $\frac{3}{4}$ m. the top of the hill is reached, beyond which there is a quick descent to fork-roads, where keep to <i>r.</i> Stiffish ascent from a br., then easier and a long steep hill down towards Craigellachie; care required. Fair surface. |
| IO                      | Boharn Church .....      | $\frac{3}{4}$           |                  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |
| 6 $\frac{1}{2}$         | Fork-roads .....         | 3 $\frac{1}{2}$         |                  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |
| 4 $\frac{1}{2}$         | Craigellachie .....      | 2 $\frac{1}{2}$         | 12               | Bear round to <i>L.</i> , passing rly. at sta., and turn sharp <i>L.</i> opposite hotel. Steady ascent on hillside above Glen Fiddich for 2 m., and a quick descent by Midtown to Balvenie. Into Dufftown the road is again uphill. Fairly good surface until near Dufftown, where it becomes somewhat lumpy.                                                                                                                                                                  |
| 2                       | Midtown .....            | 2 $\frac{1}{2}$         |                  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |

**KEITH TO CRAIGELLACHIE AND DUFFTOWN.** *Reverse.*—Proceed downhill, due N., out of Dufftown, passing sta. on *r.* Keep to *r.* at fork 3  $\frac{1}{2}$  m. down the valley, and turn sharp *r.* at the hotel at Craigellachie and bear round to *r.* passing sta., and ascend steep hill beyond. At Mulben cross-roads turn to *r.* and follow rly. towards Keith. Bear *r.* near road junction, leaving the rly. line, and pass through Fife-Keith to Keith.

**EDITOR'S NOTE.**—Dufftown to Huntly by Market Inn and Milltown. This is a very hilly road to summit, which is reached at over 1100 ft., and is downhill nearly all the way to Huntly. Surface bad and very rough for some distance on either side of summit ; for the rest fair, and good towards Huntly. Distances from Dufftown : summit, 4  $\frac{3}{4}$  ; Market Inn, 2  $\frac{1}{4}$ —7 ; Milltown, 3  $\frac{1}{4}$ —10  $\frac{1}{4}$  ; Huntly, —15  $\frac{1}{4}$ . This road forms the only direct access between Huntly and Dufftown.

## ROUTE 246. DUFFTOWN TO FORRES.

(Via Dallas.)

A very hilly Highland road rising to a high altitude on the open moors, between the Spey and Findhorn valleys. The scenery at parts is very striking, and some fine woods are passed through beyond Bridge of Lossie. Surface good at either end of the route and bad midway.

| 13 $\frac{1}{4}$   | ↑ Summit .....            | $\frac{1}{2}$   | 15               | At the top the road is easy for $\frac{1}{4}$ m., after which the descent begins; rough, loose surface. At Yellowbog there is a dip over a burn with moderate rise on other side, then rather stiffer. Beyond this the road again descends a somewhat dangerous hill, very steep for 150 yds., with a turn to <i>r.</i> at foot over another burn, and an ascent beyond. Surface begins to improve, and road descends rather quickly, through plantations to Bridge of Lossie, beyond which bear <i>r.</i> to Dallas. Surface fair latterly.                                          |

**DUFFTOWN TO FORRES (VIA DALLAS).** *Reverse.*—Leave High St. by Cumming St., and at foot turn *L.*, then take second turn on *r.*, up St. Leonard's Rd. At  $1\frac{1}{2}$  m. out bear *r.* at fork; keep to *L.*  $\frac{1}{2}$  m. beyond Cantsford, and to *r.* at next fork. At road

junction before Dallas bear to *r.*, and at end of that village keep to *l.* to Bridge of Lossie. Thence unmistakable over the moor to branch-roads, beyond Priestfield, where bear *l.* An easily followed road to near (*a*) Craigellachie, bearing to *r.* over R. Spey, and passing rly. before the village, in which bear *r.*, then *l.* opposite hotel. Route 245 to Dufftown.

- (*a*) Before Craigellachie, which can be seen down on *r.*, the road is on the cliff that rises perpendicularly from the Spey. The descent here to the river level is steep, and when near the foot, beware of a difficult turn round to *r.* If the rider feels he cannot take this turn with safety, he should go straight on and make the turn back some distance further.

## ROUTE 247. DALLAS TO ELGIN.

An undulating road for 5 m., then descending towards Elgin, this latter part affording easy running. The gradients, as a whole, are in the rider's favour all the way. The surface is very fair, and improves towards Elgin.

| Miles from<br>Elgin. | Places on the<br>Road. | Mileage.                |                  | General description of the Road.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |

| 10 $\frac{3}{4}$     | DALLAS .....           | ...                     | ...              | Leave village due N. as in preceding route, and bear <i>r.</i> at road junction up a sharp ascent, then an undulating road by Craigend and with downward tendency towards Kellas, passing alongside some fine plantations. Road is easy, with slight upward trend to Blackhillock, and then fairly level for $\frac{3}{4}$ m., when it descends a long fairly steep hill on a gradient of 1 in 18 or so at one part. The descent is less steep towards Cloddach, but the downward slope is continued to the road junction near Pittendreich. Keep forward over a fairly level road to Elgin. Fairly good surface on the whole. |

**DALLAS TO ELGIN.** *Reverse.*—Proceed W. along High St., and at Hospital keep to *l.* at fork, and at Pittendreich keep again to *l.* At road junction beyond Craigend turn *l.* to Dallas.

## ROUTE 248. GRANTOWN TO ELGIN AND LOSSIEMOUTH.

An easy road to Advie, with fairly good surface, then hilly, with poorer surface for some way, but improving beyond Dalnashaugh. Very hilly, mostly downward, to Aberlour, and a capital road with comparatively easy grades to Elgin, and practically level to Lossiemouth. Beautiful scenery on Speyside, at Dalnashaugh, and Craigellachie.

GRANTOWN TO LOSSIEMOUTH. *Reverse.*—From rly. sta. proceed westward, and at cross-roads turn to *l.* After crossing R. Lossie before Elgin turn *r.* along North St., in which bear *l.* On reaching High St. turn *l.* passing Parish Ch., and then turn *r.* by Commerce St. and keep forward. In Glen Rothes avoid a road to *r.*, and keep forward through Rothes village. At road junction beyond Dandaleith bear to *l.*, cross R. Spey and turn *r.* in Craigellachie. An easily-followed road to Dalnashaugh Inn, where turn sharp *r.*, downhill. Keep to *l.* at fork beyond the Avon Br., thence unmistakable up Speyside towards Grantown. Cross Spey Br., and bear *r.*, in  $\frac{1}{2}$  m., into Grantown.

## ROUTE 249.

## TOMINTOUL TO DALNASHAUGH INN.

(Via Avon Valley.)

A very picturesque road down the valley of the Avon, or A'an, with the hills of Cromdale on *l.* from Tomintoul, and the great Ben Rinnes over to *r.* beyond the foot of Glen Livet. Surface roughish at first, then fair, and again rather rough and lumpy towards Dalnashaugh.

|                                            |                                | <i>Inter-<br/>medi-<br/>ate.</i> | <i>Total.</i>    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |
| 14 $\frac{3}{4}$                           | TOMINTOUL .....                | ...                              | ...              | Leave in a N.W. direction, passing through village, and follow a rough road descending to <i>l.</i> towards the riverside. Keep straight forward, having river on <i>l.</i> , then bear up to <i>r.</i> , leaving river and crossing the Conglass Water. Ascend from the br., thence an undulating road by Kirkmichael, and down the Avon side to br. over the Livet Water. Beyond this the road remains undulating, but has a downward tendency. At little over $\frac{1}{2}$ m. beyond Dalchirach there is an awkward little descent and a sharp turn across a br. over a burn. At fork-roads keep to <i>l.</i> ( <i>r.</i> , Route 248) to Dalnashaugh Inn. Very fair surface, by the Avon side, on the whole; much cut up and rough after the Livet Br. owing to traffic in connection with the distillery. |

**TOMINTOUL TO DALNASHAUGH INN.** *Reverse.*—Ascend for 200 yds. from the inn and bear *r.*, and keep forward up the Avon valley—an unmistakable road to Tomintoul.

## ROUTE 250.

### CRAIGELLACHIE TO GARMOUTH.

A good, very easy road throughout. Some fine scenery during the first portion of the route, and well-wooded land before Garmouth—a village lying near the mouth of the Spey.

| <i>Miles from Garmouth.</i> | <i>Places on the Road.</i>    | <i>Mileage.</i>       |              | <i>General description of the Road.</i>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |

**ELGIN TO BURGHEAD AND FORRES.** *Reverse.*—Leave Forres due E. and keep to *L.* at fork-roads, passing Sweno's Stone on *L.* Beyond Coltfield Sta. turn *L.* and keep again *L.* before Burghead. Leaving Burghead re-trace road to fork, where keep *L.*, and on meeting main road beyond Newton House turn *L.* to Elgin.

**ROUTE 252. AVIEMORE TO FORRES.**

A very good road, on the whole, throughout. Surface excellent down the Findhorn valley to Forres; for the rest good, with some loose stones about near the summit. Very fine Highland scenery all the way. There is no inn at Dava.

## Route 252.

AVIEMORE TO FORRES—*continued.*

| <i>Miles from Forres.</i> | <i>Places on the Road.</i> | <i>Mileage.</i>       |               | <i>General description of the Road.</i>                                                                                                                                                                                                              |
|---------------------------|----------------------------|-----------------------|---------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|                           |                            | <i>Inter-mediate.</i> | <i>Total.</i> |                                                                                                                                                                                                                                                      |
| 14½                       | Dava .....                 | 4                     | 22½           | Keep to <i>r.</i> at fork, passing sta. on <i>r.</i> , and descending the valley of the Dorbock Burn, with sharp descent (1 in 19) to Bridge of Divie, where bear <i>L.</i> , ascending towards Dunphail. Good surface; rather loose here and there. |
| 14                        | Dava Station .....         | ½                     |               |                                                                                                                                                                                                                                                      |
| 10½                       | <i>Tomidav</i> .....       | 3½                    |               | Splendid downhill run from here, through beautiful woods in the Findhorn valley, to Forres. Turn <i>r.</i> on meeting Route 225 into the town. Very fine surface from Dunphail.                                                                      |
|                           | ↓                          |                       |               |                                                                                                                                                                                                                                                      |
| 8½                        | Bridge of Divie .....      | 1½                    |               |                                                                                                                                                                                                                                                      |
| 7¾                        | Dunphail .....             | 1                     | 29½           |                                                                                                                                                                                                                                                      |
| 5½                        | Presley .....              | 2½                    |               |                                                                                                                                                                                                                                                      |
|                           | <b>FORRES</b> .....        | 5½                    | 37            |                                                                                                                                                                                                                                                      |
|                           | (Court House.)             |                       |               |                                                                                                                                                                                                                                                      |

**AVIEMORE TO FORRES. Reverse.**—Leave town westwards, and after crossing the Altyre Burn, turn *L.*, passing rly. At fork in Altyre Woods keep *r.* and keep to *L.* beyond Presley. At Bridge of Divie turn to *r.*, thence unmistakable to Grantown. At fork on leaving that town, keep *L.* (*r.* to sta.) and bear *L.* at Dulnain Br.; keep *r.* at Drumullie and forward to Aviemore.

**EDITOR'S NOTE.**—Before reaching Castle Grant Gate N. of Grantown Sq., a narrow road leaves to *r.* for Advie, following the *L.* bank of the Spey. It has a fair surface, and is undulating with one or two rather sharp descents. Advie is entered by turning down to *r.* beyond Knockanbuie, and crossing the river by the long wooden br. Distance 8 m.

## ROUTE 253. GRANTOWN TO CARRBRIDGE.

A very fine road, with easy undulations to beyond Dulnain Br., then practically level; good surface and beautiful scenery.

| <i>Miles from Carrbridge</i> | <i>Places on the Road.</i> | <i>Mileage.</i>       |               | <i>General description of the Road.</i>                                                                                                                                                                                                                                                                                                                                      |
|------------------------------|----------------------------|-----------------------|---------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|

|                              | <b>CARRBRIDGE</b> .....    | 2½                    | 9¾            |                                                                                                                                                                                                                                                                                                                                                                              |
|                              | (Hotel.)                   |                       |               |                                                                                                                                                                                                                                                                                                                                                                              |

**GRANTOWN TO CARRBRIDGE. Reverse.**—Leave due E., having river on *r.*—an unmistakable road to Grantown.

## ROUTE 254. GRANTOWN TO NAIRN.

From Dava (where there is no inn, though such a possession is often accredited to it) the surface is rather poor. The steep hills to the Findhorn should be ridden very carefully, as the surface is loose. The last 8 m. are all downhill, and the surface is good. Attractive scenery when crossing the Findhorn Valley.

| 7 $\frac{1}{2}$   | Belivat .....           | 2               |                  | almost equally steep climb for a m., then down-                   |
| 5                 | Littlemill .....        | 2 $\frac{1}{2}$ |                  | hill towards Belivat. Surface poor up to this                     |
|                   |                         |                 |                  | point, and loose and rough on the two steep                       |
| 1                 | Househill .....         | 4               |                  | hills. The road descends gradually to Littlemill                  |
|                   | NAIRN .....             | 1               | 23 $\frac{1}{4}$ | on good surface, and continues to fall, with                      |
|                   | (Cross.)                |                 |                  | several breaks in the descent, to Nairn. Surface                  |
|                   |                         |                 |                  | improves very much latterly.                                      |

GRANTOWN TO NAIRN. *Reverse*.—Cross R. Nairn E. of the town, and turn *r.* at branch-roads beyond, then keep *L.* at fork. At Ferness (top of steep hill from R. Findhorn) keep to *L.*; thence a straightforward road.

## ROUTE 255. DAVIOT TO INVERNESS.

(Via Culloden.)

This route is given on account of its passing through the middle of Culloden Moor, scene of the disastrous blow to the fortunes of "Prince Charlie." Surface fair. In coming direct from Inverness by Route 210 (reverse) keep to *L.* at Castlehill.

| 11½                          | Cantraybruich.....         | 1½                    |               | in the fight. Bear <i>r.</i> , descending towards Cantraybruich, and keep forward to Croy, where bear <i>l.</i> and keep to <i>l.</i> on an undulating road to junction with Route 225, where turn <i>l.</i> along the main road to Inverness. Fair surface. |
| 9                            | Croy .....                 | 2½                    |               |                                                                                                                                                                                                                                                              |
| 7½                           | Tornagrain .....           | 1½                    |               |                                                                                                                                                                                                                                                              |
|                              | Inverness .....            | 7½                    | 17½           |                                                                                                                                                                                                                                                              |
|                              | (Town Hall.)               |                       |               |                                                                                                                                                                                                                                                              |

DAVIOT TO INVERNESS. *Reverse.*—Route 225 (reverse) to  $\frac{3}{4}$  m. beyond Tornagrain. Bear to *r.* at that point to Croy. Bear *r.* at Croy and keep to *r.* At branch-roads near the Cumberland Stone bear *l.* (a), then an easily-followed road to Daviot.

(a) Keep forward for Inverness, thus making a circular route.

## ROUTE 256. CALLANDER TO OBAN.

The scenery throughout this route is magnificent. A very variable road: to Lochearnhead it is undulating, with a sharp hill or two, but possesses fairly good surface; the long ascent of Glen Ogle is rather loose in parts, but good on the whole; to Crianlarich from Lix the road is a pleasant one to ride, but is apt to be soft at times, and remains good to near Tyndrum, beyond which place there is a mere stone-strewn track down Glen Lochy, and riders should travel by train from Tyndrum to Dalmally. Through the Pass of Brander the surface is poor; it improves near Taynult, but becomes rough again in a m. or two. Towards Connel Ferry the surface is good and remains good to Oban.

**CALLANDER TO OBAN. Reverse.**—Proceed N. along George St. and keep to L. at fork at the ch. with clock tower; pass gates of Dunollie on L. and ascend the steep hill beyond. At Stonefield Farm turn r. under rly. and keep forward at Taynuilt Hotel and avoid a road leading to r.  $\frac{1}{2}$  m. beyond. At 1 $\frac{3}{4}$  m. beyond Loch Awe

Hotel, road bends to *r.*, crossing R. Strae, and turns again sharp *r.* over R. Orchy before Dalnally. At the hotel turn to *L.*, and keep to *r.* 2 m. beyond. Thence unmistakable by Tyndrum and Crianlarich to Lix Toll, where turn *r.*, and forward over an easily-followed road down to Callander.

EDITOR'S NOTES: (a) The narrow but good road running westwards from Kingshouse Inn leads the rider to Rob Roy's Grave, where the chieftain lies peacefully, at the foot of the Braes of Balquhider, in a small churchyard, with a roofless ivy-clad church in its centre, on *r.* of the road. Balquhider is 2 m. from Kingshouse.

(b) The road on the S. side of Loch Earn is hilly and narrow, but has a fairly good surface; distance to St. Fillans, 8 m. It passes through some fine scenery, but as a cycling road it is, of course, hardly to be compared to that on the N. side of the loch.

(c) The road to *r.* at Taynuilt Hotel leads over rly. and down to Bonawe Ferry, which is crossed in a small rowing boat. The road on the N. side of Loch Etive, going westwards, is very rough and stony, but passes through some charming scenery. Route 288 is joined at Connel North Ferry. Distance from Taynuilt to North Connel by this road, 10½ m.

(d) Dunstaffnage Castle, which is a very fine ruin, and from which a splendid view of the coast and islands is to be obtained, is approached by passing through the gate at the little cottage, near the small waterfall, by the side of the main road. The keys of the castle are kept at the house standing just beside the ruin. The approach road is often covered by the tide at high water.

## ROUTE 257. GLASGOW TO OBAN.

(Via Inveraray.)

A very variable road, possessing in parts some of the finest road surface in Scotland, and in others the worst. The good portions lie by the shore of Loch Lomond and Loch Fyne, the last 5 m. into Oban being also good. The rough and bad portions are in Glen Croe, Glen Aray, and Glen Nant, and between Taynuilt and Stonefield Farm. The scenery, however, is of the most magnificent description from Luss onwards: the views from the head of some of the glens being adequate compensation for the amount of rough riding to be undergone before obtaining them.

| Miles from Oban. | Places on the Road.               | Mileage.       |        | General description of the Road.                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |

GLASGOW TO OBAN (VIA INVERARAY). *Reverse.*—Reverse of Route 256 to Taynuilt, ½ m. beyond which place turn up to *r.*—steep, rough ascent. Beyond Kilchrenan keep to *r.*, cross Loch Awe by ferry to Port Sonachan and proceed to *l.* At road junction beyond the steep hill bear up to *r.* and down Glen Aray to Inveraray, at which village turn to *l.*, following the shore of Loch Fyne. At Clachan keep to *r.*, and going round the head of the loch turn again *r.* after crossing the R. Fyne. In 1½ m. the road turns *l.* up Glen Kinglas; keep to *l.* of the Kinglas Water to near the head of the glen, when cross the stream to *r.* and pass Loch Restil on *r.* before the summit of Glen Croc. The descent at the top of this glen is very steep and dangerous, and has one or two awkward bends. Keep round to *l.* by the shore of Loch Long, then bear to *r.* round the head of the loch to Arrochar. At fork-roads here keep to *l.* (as in Route 269) to Tarbet Hotel on Loch Lomond side: thence an unmistakable by the shore of the loch to Luss and beyond, and easily followed to Alexandria; thence by reverse of Route 107 to Glasgow.

(a) There is a ferry from Inverbeg to Rowardennan, from which point the ascent of Ben Lomond is made.

## ROUTE 258.

## ARDRISHAIG TO OBAN.

The surface on this road, as is so frequently the case in the Western Highlands, is very variable. The road is a good one to the fork beyond Kilmartin, is poor in parts to Kilmelfort, improves in the Pass of Melfort, remains fair to Kilninver, is indifferent by Loch Feochan side, but becomes good towards Oban. The hills are long and severe; the scenery throughout possesses a wild, rugged magnificence that is hardly to be surpassed in the kingdom. The m.s.s. are not to be relied on to Kilmelfort, but are correct from thence to Oban.

| 29 $\frac{1}{2}$ | Kilmartin Hotel .....                | 1 $\frac{3}{4}$ |        | 9 $\frac{3}{4}$ The road falls for a few yds. and ascends gradually to fork roads, where keep to L. (r. to Ford and Loch Awe—see note to Route 275). Stiff ascent for 2 $\frac{1}{2}$ m., with rather rough surface. Towards the top of this hill the road crosses the high moorland, and from the summit descends rapidly. This long winding descent to the head of Loch Craiguish must be ridden with care. The view, seawards, on this hill is very fine. The level ground is gained at Kintraw, from which point the road is easy for $\frac{3}{4}$ m., but the surface is poor. Fairly steep ascent for $\frac{3}{4}$ m. over the open moorland, and a fall on the other side down to the shore again, with some rather sudden intermediate descents; surface rough. To the shores of Loch Melfort the road is undulating, and the last m. to Kilmelfort almost level. Surface roughish in parts and grass-grown here and there. |

| 23 $\frac{3}{4}$ | Kintraw .....                        | 1 $\frac{3}{4}$ |        | Beyond the hotel the road rises abruptly for about 100 yds., is fairly level round the shore of the small Loch Druinnean, and subsequently winds up the romantic Pass of Melfort, where the road rises at one part to a great height above the bed of the stream. Beyond the pass the road goes over open, rugged moorland, and descends, gently, when over the watershed. At a br. just before the 10th m.s. from Oban, there is an awkwardly abrupt turn that requires care; thence it is mostly downhill to Kilninver, where at the white ch. bear r. (L., see note). Very variable surface; fair on the whole.                                                                                                                                                                                                                                                                                                                    |
|                  | ↑                                    |                 |        |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |

| $\frac{1}{2}$           | Oban High School.....                 | $1\frac{1}{2}$        |                  | Oban. Pass under rly. br., having the fine buildings of the High School above the road on <i>r.</i> , and the Parish Ch., also on <i>r.</i> ; bear slightly to <i>l.</i> to Argyll Sq. Good surface towards Oban. |
|                         | <b>OBAN</b> .....<br>(Argyll Square.) | $\frac{1}{2}$         | 39 $\frac{1}{2}$ |                                                                                                                                                                                                                   |

**ARDRISHAIG TO OBAN.** *Reverse.*—From Argyll Sq. pass Victoria Hotel on *r.* and leave by Cumbie St., keeping to *r.* at fork at ch. At Kilninver keep to *l.*, thence an unmistakable road to Kilmartin, a m. beyond which keep to *l.* At Kirkmichael-Bridgend turn *r.*, and turn *l.* on meeting the Crinan Rd. beyond Achnashelloch; thence forward to Ardrishaig.

**EDITOR'S NOTE:** Road from Kilninver to Easdale. Turn to *l.* at Kilninver Ch., road ascending very steeply (1 in 11) for over  $\frac{1}{2}$  m., with a long descent on other side to a stretch of fairly level running. Turn to *r.* at Auchnasaul, leaving the mainland and crossing, by a br., to the island of Seil, at Clachan. For  $2\frac{1}{2}$  m. on the island the road is gently undulating, turns to *r.* near Kilbrandon, and ascends to beyond Kilbride, followed by a steep descent (about 1 in 13), with awkward turn on the hill, towards Easdale. Some of the views on this road are very fine. The surface is loose and soft, but affords fairly good riding on the easier portions. Distances from Kilninver—Clachan Inn, 3 $\frac{1}{2}$  m.; Kilbride, 6 $\frac{1}{2}$  m.; Easdale Pier, 8 m.

## ROUTE 259.

## ARDRISHAIG TO CAMPBELTOWN.

This is a very picturesque route and passes through some varied scenery. The road is an easy one, where it runs by the shore, but becomes very hilly in parts when it deviates from the coast line, passing over several hill-shoulders. The surface throughout is good, especially by the shore; on the hills it is apt to be rather loose in dry weather. The "short cut" to Machrihanish is mentioned in note *b*.

**ARDRISHAIG TO CAMPBELTOWN.** *Reverse.*—Leave the town due N.W., having Campbeltown Loch on *r.*; keep to *l.* out of the town, and again to *l.* at fork-roads; thence an unmistakable road by the W. coast of Kintyre, and across the Tarbert. Here turn sharp *l.*, over an easily followed road, having coast on *r.*, to Ardrishaig.

**EDITOR'S NOTES.**—(*a*) The road to *l.* at Redhouse fork leads down to Campbeltown by the E. coast. It is an excessively hilly, narrow, and in parts very rough, road: it cannot be, therefore, recommended as a cycling route. The distance from Tarbert to Campbeltown by this road is 38 $\frac{1}{2}$  m.

(*b*) When the tide is out, a delightful run may be had along the sands, near the water line, direct to Machrihanish from near Westport, a distance of 4 $\frac{1}{2}$  m. For those going from Ardrishaig to Machrihanish, this short cut avoids the long circuit through Campbeltown. To cross the stream which flows over the sands near Machrihanish, go up on to the links, and pass over the water by the golfers' br.

## ROUTE 260. CAMPBELTOWN TO SOUTHEND AND MACHRIHANISH.

Both the Southend and Machrihanish roads have good surface; on the former the hills are not difficult, and the latter road is practically level. The road does not extend beyond either Southend or Machrihanish, but some delightful walks may be enjoyed round the Mull of Kintyre.

**CAMPBELTOWN TO SOUTHEND. Reverse.**—An unmistakable road to Stewarton, where keep to *r.* towards Campbeltown.

**TO MACHRIHANISH.** As above to Stewarton, where turn to *r.*, road becoming narrower but remaining fairly level, skirting the famous golf course on *r.* before the village. Good surface. Distance, 5 m. Westport on Route 259 may be reached by riding over the sands in Machrihanish Bay; see note (*b*) to that route.

## ROUTE 261. ARDRISHAIG TO ARDRISHAIG. (Circular Route.)

The surface is fair generally, but in parts it is rather soft and is frequently loose on the hills. The road is a narrow one and is very hilly. The views from the top of several of these hills are very fine.

| 23 $\frac{1}{4}$       | Ardpatrick Post Office ..... | 2               |                  | The road turns inland and becomes very undulating to Kilberry Ch., with somewhat variable surface, but affording fair riding on the whole. Beyond the ch. there is a steep ascent which becomes easier after a $\frac{1}{4}$ m., and having a sharp turn near the hill top, from whence it descends to the level before Tiretegan, and rises by the ch. to Orran. From here there are a series of undulations, chiefly descending, with rather a steep fall to a br. at the Crear Burn. From this br. there is a long ascent to Stotfield, and an almost equally long but rather steeper decline beyond to the shore of Loch Killisport. Near Ormsary House the road re-ascends, is undulating for a m., and falls by Ballyaurgan but rises again by Baronlongart House and descends to Achoish Inn, where keep to r. at fork-roads. Surface indifferent in parts, but fair as a whole. |

**ARDRISHAIG TO ARDRISHAIG (CIRCULAR ROUTE).** *Reverse.*—Follow Route 259 for 2 $\frac{1}{2}$  m. and bear to r., thence an unmistakable road round near the coast-line, and then for some way by the shore of West Loch Tarbert, re-joining Route 259 at 10 m. S. of Ardrishaig. On the whole, the hills are more in the rider's favour in the "forward" direction, than in the "reverse" of this circular run.

## ROUTE 262. ARDRISHAIG TO TAYVALLICH.

Capital road for 7 m., then fair. The scenery on Loch Sween side is very attractive.

| 9½                        | Fork-roads .....                    | 3½                      | 3½     | Road rises gradually, passing the locks of the Crinan Canal on r., and with capital, almost level, running to Bellanoch, where turn to l. (forward, see note) up a rather sharp ascent with an easier rise beyond to second fork, where keep to r. (l. to Kilmory—a poor road). Gradual rise for a m. on a winding road, with descent (sharp turn near brow of hill) to a stretch of gently undulating road towards Tayvallich. Very good surface to Bellanoch, then poorer, but fair as a whole. The continuation to Keills (4½ m.) is rough. |

**ARDRISHAIG TO TAYVALLICH.** *Reverse.*—Proceed N., having shore on r. At Bellanoch bear to r., thence an unmistakable road to Ardrishaig.

**EDITOR'S NOTES.**—Keeping forward at Bellanoch, a fairly good road leads by the side of the canal to Crinan (1½ m.), where the steamboats leave for Oban and the western islands. (See Macbrayne's time tables.)

## ROUTE 263. INVERARAY TO ARDRISHAIG.

A good road on the whole, with comparatively easy gradients, and very fair surface throughout. The scenery is at times attractive, especially by the shore of Loch Fyne and at Loch Gair. The famous Craræ quarries (scene of an extraordinary accident in 1886) are well worth a visit.

| 26½                       | INVERARAY .....         | ...                     | ...    | Leave in a S.W. direction, having Loch Fyne on l. and passing along a finely wooded road, which is level for 1½ m. and rises before Horsepark, beyond which it is easy for ½ m., then ascends, stiffly in parts, for 2½ m. From the summit there is a long gradual descent; keep to l. at fork at Auchindrain. At road junction near Furnace turn sharp r., having a fairly level run for 3½ m. to Auchgoyle, beyond which point there is an uphill pull for 1½ m. and a long finely graded descent towards Loch Gair Inn. Good surface. |

Capital surface.                                                                                                                                         |

**INVERARAY TO ARDRISHAIG. Reverse.**—Route 258 for 1 $\frac{3}{4}$  m., where turn *r.* into Lochgilphead, and again to *r.* on leaving village, having shore on *r.* Easily-followed road to Sandhole, at  $\frac{1}{2}$  m. beyond which turn sharp *L.*, thence unmistakable to Inveraray.

(a) From near Loch Gair Inn a road leads to *r.* for Lochgilphead, is more direct than the coast road, but is very hilly. The surface, however, is fair.

## ROUTE 264.

### INVERARAY TO TIGHNABRUAICH.

This is a picturesque road to Otter Ferry, beyond which it becomes very hilly and passes over bleak moorland. As a cycling road, it is—like many others by the side of lochs in this part of Scotland—fair level when running near the water's edge, and hilly when leaving the shore. After Creggans Pier, the surface is poorer and becomes very indifferent in parts over the hills towards Kames. Beyond Tighnabruaich there is no road, but coast steamers frequently call at the pier there, and afford communication with Rothesay and the Clyde watering-places.

| Miles from Tighnabruaich                   | Places on the Road.                                                     | Mileage.                           |                        | General description of the Road.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |

**INVERARAY TO TIGHNABRUAICH. Reverse.**—From pier go S. along shore and turn inland before Kames Pier. Beyond the powder works turn sharp *r.* at cross-roads. Thence an unmistakable road, skirting the eastern shore of Loch Fyne for the most part, to Cairndow Inn. Thence to Inveraray as in Route 257.

**EDITOR'S NOTES.**—(a) The ferry between Inveraray and St. Catherine's shortens this route by nearly 16 m.

(b) The road forward at Kames branch-roads leads to Ardlamont House, the wood adjoining which was the scene of the mysterious death of young Hamborough, in August, 1893, from a gunshot wound. The house is  $\frac{3}{4}$  m. from the branch-roads.

## ROUTE 265.

STRACHUR PIER TO DUNOON AND  
INNELLAN.

A road passing through very beautiful scenery, and known to tourists as the "famed Loch Eck route." For 18 m. the road is practically level.

| 13                      | Steamboat Pier .....            | 4 $\frac{1}{2}$         |                  | Where road forks near Whistlefield keep to <i>r.</i> ( <i>l.</i> , see note to Route 270), having a pleasant level run along the shore of the narrow Loch Eck. During the season a steamer plys on this loch in connection with the coaches from Dunoon to Strachur. From the Inverchapel Burn, which is crossed just beyond the S. end of the loch, the road descends gradually towards Ardbeg, where turn to <i>r.</i> ( <i>l.</i> , Route 270), crossing the R. Eachaig and passing Cothouse Inn on <i>l.</i> At $\frac{1}{2}$ m. beyond the inn turn again to <i>r.</i> , cross the R. Little Eachaig and keep to <i>l.</i> at Dalinlongart, where Route 267 is joined on <i>r.</i> , with an easy run into Sandbank. Good surface. |

**STRACHUR PIER TO INNELLAN.** *Reverse.*—Proceed by the coast, northwards, to Dunoon, entering that town by Wellington St. At head of this street bear to *r.*, and take second street on *r.*, going down a narrow winding road to base of the Castle Hill and the pier. Keep forward, passing the Argyll Hotel on *r.*, and ascending Argyll St.; then turn to *r.* down a narrow street to the East Bay, and following the coast road round to Ardnadam, beyond which turn up *l.* into Sandbank, and, opposite Free Ch., round to *r.* through the village. At fork-roads at Dalinlongart keep to *r.*, and keep again to *r.* ¼ m. after crossing the R. Little Eachaig. Beyond Cothouse Inn the R. Eachaig is passed over, and the road leads sharp *l.* just beyond. Before Whistlefield Inn keep to *l.*, thence an easily-followed road to Strachur village, before which, a short steep descent, with nasty turn at foot, requires careful riding.

**EDITOR'S NOTES.**—(*a*) There is a shorter road to Dunoon from Sandbank than that round by Hunter's Quay, but it is not so level and is not so frequently used. Keep forward at the Free Ch., having a rather stiff climb for ¾ m. Loch Loskin is passed on *r.* and the road descends (keep to *r.* at fork) towards Dunoon, is fairly level into Argyll St., and falls gently to the pier, the distance being 2¾ m. from Sandbank village.

(*b*) Beyond Innellan the road follows the coast to Toward, before which, at the fork, it goes to *r.* round the grounds of Castle Toward, ascends to Achavoulin, beyond which it is undulating for 1½ m., and falls rapidly down a dangerous descent to Loch Striven side, and turns *r.* along the shore to Inverchaolain Ch. and Glenstriven House. Beyond this the road, as such, does not go—connection with Route 267 at the head of the loch being by a very rough footpath, where cycles must be carried. Total distances from Innellan Pier—Toward fork-roads, 2½ m.; Achavoulin, 4½; Inverchaolain Ch., 9¾; Glenstriven House, 11¾. Very good road to Toward, then fairly good to Glenstriven House.

**ROUTE 266. STRACHUR PIER TO ROTHESAY.**

(Via Colintraive.)

A very poor road after Leanach, from which point it climbs over the moorland and descends the wild and lonely Glendaruel. The surface is variable, and ranges from good (in Bute) to very loose and bad above Dunans. The scenery, especially in Glendaruel and at the Kyles of Bute, is remarkably fine.

Rather lumpy surface after Port Bannatyne; tramline in centre of road for some part of the way.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |

**STRACHUR PIER TO ROTHESAY.** *Reverse.*—From the pier follow tramline towards Port Bannatyne, having the shore on *r.* Beyond Port Bannatyne keep to *r.* at branch-roads and follow the coast for about a m. further, when the road turns inland up a hill and regains the coast beyond. The road ends at the ferry landing, where cross to Colintrave Pier, from which bear to *L.* At branch-roads 5 $\frac{1}{4}$  m. further bear to *L.*, then keep up the glen, having the R. Ruel on *L.*, to Garvie, beyond which cross br's. to Dunans. At Leanach bear to *r.*, thence an easily-followed road to Strachur Pier.

**EDITOR'S NOTE.**—The *r.* fork beyond Dunans may also be taken, but the road is not so preferable as that by Garvie. This alternative bit of road passes through several farm gates, passes Glendaruel House, crosses the R. Ruel, and rejoins the other road at the Clachan of Glendaruel, near Kilmodan Ch. Very poor surface.

## ROUTE 267. STRACHUR PIER TO DUNOON.

(Via Glendaruel.)

For first portion of this road see summary to Route 266. The climb over to Lochstrivenhead is very arduous, the surface being bad and the gradients steep. In Glen Lean, the road improves somewhat and is fairly good after Clachaig to junction with Route 265. Scenery very attractive in Glendaruel, at the head of Loch Striven, and towards the Holy Loch.

STRACHUR PIER TO DUNOON (VIA GLENDARUEL). *Reverse.*—Reverse of Route 265 to Dalinlongart, where turn to *l.* Thence an unmistakable road to junction with Route 266, proceeding thence by reverse of that route.

## ROUTE 268.

### LOCHGOILHEAD TO INVERARAY.

This route consists principally of the rider having to climb for 2½ m. to the top of a very steep, rough hill, gaining thereby an altitude of 719 ft., and of immediately having to walk down (for riding is not advisable) an equally long and steep hill towards the level of Loch Fyne. For those who are not alarmed at such a prospect this road is permissible; for others it would perhaps be better avoided.

|                       | INVERARAY .....                        | 1½             | 10¾    |                                                                                                                                                                                                                                                                                |

LOCHGOILHEAD TO INVERARAY. *Reverse.*—Ferry to St. Catherine's pier, from which bear L. by the shore. At 2½ m. further turn sharp r. up a zig-zag ascent to head of Hell's Glen; thence follow the coach road by Monevechadan Br. down to Lochgoilhead.

## ROUTE 269.

### HELENSBURGH TO TARBET.

(Via Garelochhead.)

A capital road, running amid the most varied and delightful scenery, with long, almost level stretches by the loch sides. The climb between the Gare Loch and Loch Long is very steep and practically unrideable.

Arrochar and Tarbet Sta., on the W. Highland Rly., is passed just beyond the top of the ascent, the road falling gently from thence towards Loch Lomond, and having a sharp bend to r. before hotel and pier. |
|                       | TARBET HOTEL .....     | $\frac{1}{2}$           | 18 $\frac{3}{4}$ | (Route 272 met here.)                                                                                                                                                                                                                                                                                     |

**HELENSBURGH TO TARBET.** *Reverse.*—Bear to l. up the glen, leaving Loch Lomond on r. At Arrochar turn sharply to l., then follow shore of Loch Long to Ardarroch; *dangerous* hill before Garelochhead. Easily-followed road to Helensburgh.

**ROUTE 270. GARELOCHHEAD TO DUNOON.**

This route skirts the shores of the inland sea lochs most of the way and is, therefore, for the greater part, level. The only hill of any consequence is that passed over beyond Roseneath. The surface is good throughout, and the views over the lochs are very fine.

| Miles from<br>Dunoon. | Places on the<br>Road. | Mileage.                |                  | General description of the Road.                                                                                                                                                                                                         |

**GARELOCHHEAD TO DUNOON.** *Reverse.*—Reverse of Route 265 to road junction after Cothouse Inn. Turn *r.*, having Holy Loch on *r.*, and follow coast to Ardentinny. Cross ferry to Coulpport. Beyond Kilcreggan ascend the steep hill and keep forward to Roseneath, thence unmistakable to head of the Gare Loch, where bear to *r.* to Garelochhead.

**EDITOR'S NOTES.**—(a) Ardentinny to Whistlefield Inn (on Route 265). On reaching the pier, after crossing from Coulpport, bear to *r.*, road leaving the shore. Keep forward up Glen Finart, with a very steep climb to summit and an equally steep and dangerous descent (1 in 8) to Whistlefield. Very rough road. Distance, 5 m.

(b) The ferry between Strone Pier and Hunter's Quay shortens this route considerably.

**ROUTE 271. HELENSBURGH TO LUSS.**

A direct link from the coast road at Helensburgh with Route 257. Hilly as far as the road junction near Loch Lomond side, with variable surface, but affording capital running from thence to Luss.

| <i>Miles from Luss.</i> | <i>Places on the Road.</i>           | <i>Mileage.</i>       |               | <i>General description of the Road.</i>                                                                                                                                                                                                                                                                                                                                                                                                                            |

**HELENSBURGH TO LUSS.** *Reverse.*—Reverse of Route 257 for 3½ m. S. of Luss, when turn to *r.*; thence an unmistakable road to Helensburgh, with dangerous hill into that town.

## ROUTE 272.

## TARBET HOTEL TO CRIANLARICH.

One of the most attractive roads in Scotland, leading through the most varied and striking scenery—at first penetrating the wooded shores of Loch Lomond, then ascending the rugged Glen Falloch. A practically level road for 11 m., to the foot of the glen, with very fine surface.

| Miles from Crianlarich | Places on the Road.     | Mileage.        |                  | General description of the Road.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |

| 16 $\frac{3}{4}$       | TARBET HOTEL .....      | ...             | ...              | Follow the road skirting the western shore of Loch Lomond. Very gentle undulations to Inveruglas, where a stream is crossed, and beyond which there is a rise and fall, the road regaining the shore of the loch a short way beyond. A delightfully smooth, winding, very picturesque road, running between the westward slopes of Ben Vorlich and the waters of Loch Lomond, runs at an almost dead level towards Ardlui and Inverarnan, with excellent surface throughout. After a m. of easy riding the ascent of Glen Falloch begins and is continuous for 4 m., but at no point very difficult. Near the head of the glen the road is fairly level for $\frac{1}{2}$ m., then re-ascends slightly and falls towards Crianlarich. In Glen Falloch the road, river, and rly. run parallel most of the way. The surface is capital to beyond Inverarnan and remains fairly good on the whole to Crianlarich. (Route 256 joined here.) |

TARBET HOTEL TO CRIANLARICH. *Reverse*.—Leaving the hotel at Crianlarich proceed S. towards the head of Glen Falloch, road running parallel with the West Highland Rly. ; thence unmistakable down the glen and by Loch Lomond side to Tarbet.

## ROUTE 273.

## CALLANDER TO THE TROSSACHS AND LOCH LOMOND.

Though this road is merely a succession of short rises and falls, and the surface loose and inferior, it is one of the most frequented routes in Scotland, leading as it does through the exquisite scenery that forms the background of "The Lady of the Lake." The road is a narrow one and careful riding is necessary when the heavy tourist coaches are met or overtaken.

|                           | (Pier.)                |                         |        |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |
| 4 $\frac{1}{4}$           | ↑ Road junction ...    | $\frac{3}{4}$           |        | 8 $\frac{1}{4}$ Keep forward, having Loch Achray on <i>r.</i> , to road junction, where keep to <i>r.</i> ( <i>L.</i> , see note <i>a</i> ). Ascend for $\frac{1}{2}$ m. into the beautiful Trossachs Glen, then an easier road to the pier ( <i>r.</i> , see note <i>b</i> ). Embark on the "Rob Roy" steamer and sail down Loch Katrine to Stronachlachar pier, where the steamer stops. From the pier, passing hotel on <i>L.</i> , there is a steep ascent towards junction with Route 274. Keep forward, passing Loch Arklet on <i>L.</i> , on a rough inferior road over the moorland to Inver. At $\frac{1}{2}$ m. further the long, winding, almost precipitous descent to Inversnaid begins. This hill is very dangerous and should not be ridden down. At the pier on Loch Lomond the road ends and steamer may be taken for Ardlui (on Route 272) or Tarbet (on Route 257). |

**CALLANDER TO LOCH LOMOND.** *Reverse.*—Walk up the steep hill and at top keep forward, passing Route 274 on *r.* at end of Loch Arklet. "Rob Roy" steamer to the Trossachs pier. Leaving the pier go forward through the Trossachs to the hotel on *L.* An easily followed road to Kilmahog, where turn sharp *r.* towards Callander.

**EDITOR'S NOTES.**—(*a*) The road to *L.* leads over the hill to Aberfoyle. It is used by the coaches, but is at present (1897) closed to cyclists.

(*b*) There is *no* road round Loch Katrine to Stronachlachar. The "Silver Strand," a short way along the loch side, may be ridden to, however.

## ROUTE 274.

## ABERFOYLE TO LOCH LOMOND.

This is a very arduous road for 10 m., with roughish surface in parts. Beyond the summit it is good, but becomes again rough towards Inversnaid. The scenery is magnificent throughout.

| 15                        | ABERFOYLE<br>(Hotel.)  | ...                     | ...    | From the hotel proceed due westward, road fairly level for a m., then ascending to beyond Milton, and undulating through the Pass of Aberfoyle, with successive rise and fall by Loch Ard to Kinlochard. In $\frac{1}{2}$ m. there is a stiff ascent and a sharp winding fall on the other side to a small br. The road now steadily ascends through well wooded ground to Loch Chon, where it becomes again undulating. Surface good out of Aberfoyle; fair, but loose and rough in parts, after Kinlochard. From Loch Chon there is a long stiffish climb for $1\frac{1}{2}$ m., then a good downhill run, on improving surface, to the gate across the road near junction with Route 273. On joining that route bear to L. (r., to Stronachlachar). Very poor surface from road junction to Inversnaid. The dangerously steep hill to the side of Loch Lomond must be walked down. |

**ABERFOYLE TO LOCH LOMOND.** *Reverse.*—Walk up the steep hill and keep forward to road junction beyond Loch Arklet. Here turn r., passing through the gate at county boundary. An unmistakable road to Aberfoyle.

## ROUTE 275.

## DALMALLY TO PORT SONACHAN.

An excessively hilly bit of road, but strikingly picturesque. Most of the hills must be walked up and the descents ridden with caution. For continuation by loch side beyond Port Sonachan, see note below.

| Miles from<br>Pt. Sonachan. | Places on the<br>Road. | Mileage.                |        | General description of the Road.                                                                                                                                                                                                                                                            |

|                            |                                 |                         |                 | Road re-ascends, with rather stiff bit near top of hill for $\frac{1}{2}$ m., then falls, crossing a small stream and going through plantations, skirts grounds of Inistrynich House and passes Inishail Ch. (both on <i>r.</i> ). Descent ends near the ch., road again rising, at first rather steeply, then easier and falls rapidly to the br. at Cladich. Rough surface.                                                                                                      |
| 4 $\frac{3}{4}$            | Inishail Church .....           | 4 $\frac{1}{4}$         |                 |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |
| 3 $\frac{1}{4}$            | Cladich .....                   | 1 $\frac{1}{2}$         | 6 $\frac{1}{2}$ | Cross the br. and at fork-roads, a short distance beyond, keep to <i>r.</i> ( <i>L.</i> , Route 257) easy running for a m., to a br. over a stream, then very steep climb for $\frac{1}{2}$ m. at a gradient about 1 in 11 in parts. Very steep descent on the other side, about 1 in 13, to another br., followed by a short rise, and then declining to the level by the shore of Loch Awe and Port Sonachan Hotel. Surface loose and rough on the hills, but good on the level. |
|                            | PORT SONACHAN .....<br>(Hotel.) | 3 $\frac{1}{4}$         | 9 $\frac{3}{4}$ | (A ferry-boat crosses the loch to Taychreggan Hotel for the Glen Nant road. See Route 257.)                                                                                                                                                                                                                                                                                                                                                                                        |

**DALMALLY TO PORT SONACHAN.** *Reverse.*—Having hotel on *r.* and loch on *L.*, proceed eastwards. At branch-roads before Cladich bear to *L.*; thence unmistakable to Dalmally. Descend towards the sta. with caution.

**EDITOR'S NOTE.**—A narrow road passes along the E. side of the loch from Port Sonachan to Ford Inn by Portinsherrich, is rough and hilly in parts, but leads through some very fine scenery. S. of Ford Inn it joins Route 258, and is of good surface. Port Sonachan to Ford, about 18 m., and about 22 m. to junction with Route 258 near Kilmartin.

## ROUTE 276. DUNBLANE TO CRIEFF.

Comparatively easy gradients on the whole, the dip to Bishop's Br. being the most noticeable. The surface is very good throughout, the road being well and firmly made. Some very fine views are obtained from the higher ground and near Muthill.

| Miles from<br>Crieff. | Places on the<br>Road.                | Mileage.                |                 | General description of the Road.                                                                                                                                                                                                                                           |

**DUNBLANE TO CRIEFF.** *Reverse.*—From Square go down the steep hill towards rly. sta., which is passed on *L.* At Bridgend bear *L.* Into Muthill turn *L.*, bear *r.* in the village and leave, going round to *L.*, passing the green on *r.* At fork-roads at top of hill from Bishop's Br. keep to *r.* An easily-followed road to Greenloaning and Dunblane, the latter portion as in reverse of Route 176.

**ROUTE 277. DUNBLANE TO COMRIE.**

Very good road to Braco, then poorer surface over the moor. The descent towards Comrie has several sharp bends, but is well graded and affords a good downhill run. Some fine hill views on the descent from the summit.

**DUNBLANE TO COMRIE.** *Reverse.*—Leave due S. and cross R. Earn. Just beyond Dalginross turn *L.* at cross-roads, then keep to *r.* on a winding, well-graded ascent. At junction with Route 276 bear *r.* to Braco, thence as in reverse of Route 176 from Greenloaning.

**ROUTE 278. RUMBLING BRIDGE TO CRIEFF.**

Hilly on the whole, but the gradients, especially in Glen Devon and Glen Eagles, are splendidly engineered. Very picturesque in the two glens mentioned and at Rumbling Bridge and Crieff.

**RUMBLING BRIDGE TO CRIEFF.** *Reverse.*—As in reverse of Route 276 to branch-roads at Bridgehill, near the top of the hill beyond the Machany Water. Here turn to *L.* and avoid all cross and branch roads. At Loaninghead cross-roads keep straight on towards Glen Eagles, and proceed up that glen and down Glen Devon to Yettis of Muckart cross-roads. Here keep to *L.* at fork, ahead, thence straightforward to Rumbling Bridge. Hill beyond the Yettis must be descended with care.

## ROUTE 279. PERTH TO CRIEFF AND LOCHEARNHEAD.

One of the best roads in Scotland, and passing through most picturesque scenery, especially beyond Crieff and on Loch Earn side. Very easy gradients after Crieff.

| 12½                         | Comrie .....                   | 3                       | 24     | Proceed through village, bearing first to <i>r.</i> , then to <i>L.</i> , with R. Earn on <i>L.</i> Gradual ascent for first m. out, then almost imperceptibly rising up the valley of the Earn for 3 m. For the last ½ m. to St. Fillans the ascent is rather more marked. Splendid surface. |
| 7                           | St. Fillans .....              | 5½                      | 29½    | At this point a magnificent stretch of level road by N. shore of Loch Earn commences and continues to Lochearnhead. Excellent surface.                                                                                                                                                        |
|                             | LOCHEARNHEAD<br>(Hotel.) ..... | 7                       | 36½    | (Route 256 joined here. Lochearnhead Sta. lies about 2 m. S. of village.)                                                                                                                                                                                                                     |

**PERTH TO LOCHEARNHEAD.** *Reverse.*—Keep along N. side of Loch Earn; a very straightforward road to Comrie. On entering the village turn to *r.*, then to *L.*, passing sta. on *r.* when leaving. Pass over cross-roads and a br. before Crieff, then bear round to *r.*, and to *L.* in the town, to the square. At fork beyond, keep to *L.*, and to *r.* at Gilmerton. Pass straight through Methven, road bearing to *r.* in ½ m., then sharply to *L.* beyond Methven Castle. Unmistakable into Perth.

**EDITOR'S NOTE.**—From Crieff, a short circular run may be obtained by going to Gilmerton, here turning *L.*, and again to *L.* at fork, with grounds of Monzie Castle on *L.*, to Monzie village. Here keep *L.*, crossing two streams, road bending round to *L.*, passing through wooded land, and descending towards the br. at Hosh. Here turn to *L.* after crossing br., and re-join Route 279. at the cross-roads, ½ m. further. About 7 m. round.

## ROUTE 280.

## METHVEN TO AMULREE HOTEL.

A hilly road, but of fair surface. Very fine scenery in Glen Almond and the Sma' Glen. Opposite Trinity College, on the other side of the Almond, lies Logie-Almond, the late residence, and the "Drumtochty" of his story, of "Ian McLaren."

| Miles from<br>Amulree Ho. | Places on the<br>Road. | Mileage.                |        | General description of the Road.                                                                                                                                                                                                                                                                                                                                                                                                                                  |

| 6 $\frac{1}{2}$                   | Road junction .....            | 1 $\frac{3}{4}$                  | 8                | Descending from village, with R. Almond on r., cross a stream and keep to r. at fork. Long ascent to junction with Route 281 where bear to r. (L. to Crieff). Fair surface. |
|                                   | AMULREE HOTEL .....            | 6 $\frac{1}{2}$                  | 14 $\frac{1}{2}$ | Route 281 to Amulree Hotel.                                                                                                                                                 |

**METHVEN TO AMULREE.** *Reverse.*—As in reverse of Route 281 to road junction at 6 $\frac{1}{2}$  m. where turn to L. Keep to L. beyond Buchanty (r., over the hill to Foulis Wester). At  $\frac{1}{4}$  m. beyond Trinity College turn to r. and at fork beyond Grundercruie keep to r., bearing still to r. into Methven.

## ROUTE 281. CRIEFF TO ABERFELDY.

Very hilly in parts but passing through some typical Highland scenery, and particularly picturesque in the Sma' Glen. The view from the summit, at head of Glen Cochill, looking into Strath Tay is magnificent.

| <i>Miles from<br/>Aberfeldy.</i> | <i>Places on the<br/>Road.</i> | <i>Mileage.</i>                  |                  | <i>General description of the Road.</i>                                                                                                                                                                                                                                                              |

## Route 281.

**CRIEFF TO ABERFELDY**—*continued.*

| <i>Miles from<br/>Aberfeldy.</i> | <i>Places on the<br/>Road.</i> | <i>Mileage.</i>                  |                  | <i>General description of the Road.</i>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |
|----------------------------------|--------------------------------|----------------------------------|------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|                                  |                                | <i>Inter-<br/>medi-<br/>ate.</i> | <i>Total.</i>    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |
| 9 $\frac{1}{4}$                  | Milton .....                   | 1 $\frac{3}{4}$                  |                  | having R. Bran on <i>r.</i> , descending to a br. then rising towards Milton, where, at fork, turn to <i>L.</i> ( <i>r.</i> , Route 282). From this point the road ascends, rather steeply at first, then easier, for nearly 5 $\frac{1}{2}$ m., up Glen Cochill. Long steep descent passing a loch on <i>L.</i> , and keeping straight on by Gatehouse, beyond which road bends to <i>L.</i> , to a br. over a stream and into Aberfeldy. This long gradient is at parts 1 in 13 and must be ridden down with great care. Surface good to the summit then rough and loose on the descent to Aberfeldy. Turn to <i>r.</i> at cross-roads into village.<br>(Routes 283, 284, and 285 are joined here.) |
| 3 $\frac{1}{4}$                  | Summit .....                   | 5 $\frac{1}{2}$                  |                  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |
| 2 $\frac{1}{4}$                  | Gatehouse .....                | 1 $\frac{1}{2}$                  |                  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |
|                                  | ABERFELDY .....                | 2 $\frac{1}{4}$                  | 23 $\frac{1}{4}$ |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |

**CRIEFF TO ABERFELDY.** *Reverse.*—From the cross-roads going S., cross the br. and ascend the long steep hill by Gatehouse. At Milton fork-roads keep to *r.*, and turn sharply to *L.* over R. Bran to Amulree Hotel, bearing again to *L.* beyond. Dangerous descent to Newton Bridge. At road junction beyond the Sma' Glen bear to *r.*, and to *r.* again at S. end of Gilmerton village. Keep to *r.* a third time at fork beyond, and bear to *r.* on entering Crieff.

**ROUTE 282.****AMULREE HOTEL TO DUNKELD.**

Descending the romantic Strath Bran, and being downhill practically the whole way to Dunkeld. The Falls of Bran lie below the Rumbling Bridge and are particularly fine after a few days' rain.

|                            | <b>DUNKELD</b> .....<br>(High Street.) | 4                     | 9 $\frac{3}{4}$ | Beyond the fork the road again descends, and past the rly. joins Route 283. Bear <i>r.</i> then <i>l.</i> , and cross the R. Tay into Dunkeld. Fair surface. |

**AMULREE HOTEL TO DUNKELD.** *Reverse.*—Cross R. Tay, and at branch-roads bear to *r.*, then *l.*, pass rly. and keep forward. At Milton fork-roads keep to *l.*, and at 1 $\frac{3}{4}$  m. further turn to *l.* over R. Bran to the Hotel at Amulree.

**ROUTE 283. DUNKELD TO ABERFELDY AND KILLIN.**

This road traverses some of the most beautiful scenery in Scotland; there is not a mile of it uninteresting. Especially attractive is the ascent of the finely wooded Tay valley, and the views of Loch Tay beyond Kenmore. Very good surface.

| <i>Miles from Killin.</i> | <i>Places on the Road.</i>             | <i>Mileage.</i>       |                  | <i>General description of the Road.</i>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |

|                    |                           |                 |                  | Taymouth Castle on <i>r.</i> , rather steeply for $1\frac{1}{2}$ m., then descending quickly with dangerous bend towards <i>r.</i> at foot to Kenmore. This hill must be ridden down with caution. Good surface. (A road runs by south side of Loch Tay to Killin: see note below.)                                                                                                                                                                                                                                                                                                                            |
| 16 $\frac{1}{2}$   | Kenmore .....<br>(Hotel.) | 6 $\frac{1}{4}$ | 23 $\frac{3}{4}$ | With Loch Tay on <i>l.</i> cross R. Tay and turn sharply to <i>l.</i> at branch-roads, (to <i>r.</i> , a road connects with Routes 284 and 285 over new br. at Comrie Ferry), proceeding along the northern shore of the loch. Level for $1\frac{1}{2}$ m., then rising to another level stretch and descending to Fearnan, where there is a steamboat pier. (A road leaves to <i>r.</i> leading to Fortingal on Route 284). Fairly level for $\frac{1}{2}$ m., then long ascent for $2\frac{3}{4}$ m., and subsequent fall to the Lawers Burn and short rise to the hotel (Temperance). Good surface.         |
| 13                 | Fearnan.....              | 3 $\frac{1}{2}$ |                  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |
| 8 $\frac{3}{4}$    | Lawers Hotel .....        | 4 $\frac{1}{4}$ | 31 $\frac{1}{2}$ | Steady bit of uphill work for a m., Ben Lawers rising above on <i>r.</i> , then undulating for $1\frac{1}{2}$ m. followed by a $\frac{1}{2}$ m. ascent from a br. From this point the road descends to Morenish, quickly at first, then more gradually, and is again undulating for about 1 m., whence it falls rather steeply to Br. of Lochay where bear to <i>l.</i> passing the Inn. Level into Killin with river on <i>l.</i> ; pass a church on <i>l.</i> and bear to <i>r.</i> into the village. Excellent surface on approaching Killin. (A road connects with Route 256 at Lix Toll: see note below.) |

|                    | KILLIN .....<br>(Square.) | I               | 40 $\frac{1}{4}$ |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |

**DUNKELD TO KILLIN. Reverse.**—Leave the village northwards, having R. Lochay on *r.* to Bridge of Lochay, where turn to *r.* when across. A straightforward road to Kenmore, before which turn sharply to *r.* and cross R. Tay. Beyond the village turn to *l.* and ascend a stiff hill. Pass over the cross-roads and a br. into Aberfeldy village, where turn to *l.* and then to *r.*, having river on *l.* and rly. on *r.* Avoid a road over R. Tay to *l.* at Grantully, and also the ferry road to *r.* beyond Balnamuir. Cross R. Bran beyond Inver, turn to *l.*, and again to *l.* about  $\frac{1}{2}$  m. further, and cross the R. Tay into Dunkeld.

**EDITOR'S NOTES.**—(a) Road by S. side of Loch Tay. This is also a very picturesque road and is preferred by some riders to that on the N. side, on account of the finer views obtainable of Ben Lawers and neighbouring heights. The hills, though short, are somewhat numerous and frequently very steep; but the surface is fair throughout. Several gates cross the road, rendering it dangerous to ride after nightfall. The distance from Kenmore to Killin by this road is about 17 m. (b) Road from Killin to Lix Toll (on Route 256). At S. end of the village keep to *l.* and cross R. Dochart, then bear to *r.* (*l.*, road mentioned in note a). Ascent very gradual for the first m., then stiffer to the toll.

## ROUTE 284. ABERFELDY TO THE BRIDGE OF BALGIE.

Passing up the beautiful Glen Lyon the scenery is extremely striking just beyond Fortingal and at the Bridge of Balgie. The continuation westwards eventually degenerates into a mere track, and should be avoided. No inn at the Bridge of Balgie.

| Miles from Br. of Balgie. | Places on the Road.    | Mileage.        |                 | General description of the Road.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |

Here commences a very steep tortuous ascent which must be walked, either up or down. After $1\frac{1}{2}$ m. it is a little less steep, but the road still continues to ascend till it reaches the summit at 1262 ft. near Loch Kinardochy (on L.), before which keep to r. where road forks (L., hill road to Loch Rannoch: see note). Fair surface. |
| $3\frac{3}{4}$           | The Summit.....<br>[Foss 1 m.]<br>↓ | $4\frac{1}{2}$          | $9\frac{3}{4}$  | From this point the descent towards the Tummel Valley is very steep, with a dangerous bend to L., near Foss. Cross two small brs.; awkward bend at second br.; then descending more easily to Tummel Bridge, bearing sharply to r. at the hotel. Poor surface on the descent.                                                                                             |
|                          | TUMMEL BRIDGE .....<br>(Hotel.)     | $3\frac{3}{4}$          | $13\frac{1}{2}$ | (Here join Route 286.)                                                                                                                                                                                                                                                                                                                                                    |

**ABERFELDY TO TUMMEL BRIDGE. Reverse.**—From hotel, proceed with river on L., passing a ch. on r. Cross two brs., road bending to r. on steep slope. Keep to L. before Coshievile Inn, then to Aberfeldy as in reverse of Route 284.

**EDITOR'S NOTE.**—A road leaves to L., near the summit at Loch Kinardochy, for Loch Rannoch, passing on L. the base of Schiehallion. That mountain is easily ascended from Braes of Foss Farm on this road. Road continues over open moorland, undulating to  $4\frac{1}{2}$  m. from fork, when it descends somewhat steeply for about a m. into the wooded valley. Cross the Tempar Burn, keep to r. at fork, and cross R. Tummel to Kinloch Rannoch. From Aberfeldy, by this road, the distance is 18 m. Surface poor, and rough in parts.

## ROUTE 286.

## PITLOCHRIE TO RANNOCH STATION.

A hilly, but very beautiful route, commanding magnificent views of mountain, wood, loch, and river. The last hotel passed is at Kinloch Rannoch. The famous Queen's View is passed at  $7\frac{1}{2}$  m.

| 6                          | Rannoch Lodge .....                         | 3                       |        |                                                                                                                                                                                                                                                                                                                                                                                                                                  |
|                            | RANNOCH STATION ...<br>(West Highland Rly.) | 6                       | 37½    |                                                                                                                                                                                                                                                                                                                                                                                                                                  |

**PITLOCHRIE TO RANNOCH STATION.** *Reverse.*—Follow left bank of R. Gaur to Loch Rannoch, and keep on N. side of loch to Kinloch Rannoch. Avoiding all branch-roads to L., follow R. Tummel to Loch Tummel, keeping on N. side of the loch. Keep to r. at fork beyond hotel, and turn sharply to r. over Fincastle Burn. Cross R. Garry, and on joining main road turn sharply to r. towards Pitlochrie.

**EDITOR'S NOTES.**—(a) The road to r. at fork beyond Tummel Bridge is a terribly hilly one, leading to Dalnacardoch on Route 210, and riding is quite out of the question for those who have any regard for their personal safety.

(b) A rideable road runs also on S. side of Loch Rannoch, and the circuit of the loch makes a pleasant ride from Kinloch Rannoch.

# ROUTE 287. TYNDRUM TO BALLACHULISH.

(Via Glen Coe.)

This route leads through some of the wildest scenery in the Highlands, the rugged grandeur and solitude of the surroundings giving it a peculiar charm. This charm, however, does not extend to the road surface—if such a term as “surface” can be applied to the face of what is, for the greater part, a wretchedly-conditioned mountain track. The gradients, too, are only such as a rack-and-pinion railway might surmount. After Clachaig Inn something more approaching what it is usual to call a road is met with, and the running is good thence to Ballachulish.

| Miles from<br>Ballachulish. | Places on the<br>Road.             | Mileage.                |        | General description of the Road.                                                                                                                                                                                                                                                                                                                                                                                              |
|-----------------------------|------------------------------------|-------------------------|--------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|                             |                                    | Inter-<br>medi-<br>ate. | Total. |                                                                                                                                                                                                                                                                                                                                                                                                                               |
| 34½                         | TYNDRUM<br>(Hotel.)<br>↑           | ...                     | ...    | From the hotel proceed for a short way along Route 256 then bear to r., passing the W. Highland Rly. ¾ m. beyond, road then running parallel with the line in the glen. Steep ascent in parts 1 in 15-17-20 for 1¼ m., followed by a long, quick, descent for 1½ m. to a br.; undulating for a m. with a short ascent to a further undulating stretch towards Br. of Orchy, descending past the sta. to the br. Poor surface. |
| 28                          | Bridge of Orchy Sta. ↓             | 6½                      |        |                                                                                                                                                                                                                                                                                                                                                                                                                               |
| 27¾                         | Bridge of Orchy.....               | ¼                       | 6¾     | Cross the br. and keep up the waterside, road undulating easily at first with an ascent 1½ m. from the br. and descent to the level before Inveroran Inn, before which the road passes through plantations on the shore of Loch Tulla. Poor surface.                                                                                                                                                                          |
| 25                          | Inveroran Inn .....<br>↑<br>↑      | 2¾                      | 9½     | Beyond the Inn two br.'s are crossed and a long arduous climb begins, the road, which is very rough and bad, rising for 2¾ m., reaching 1073 feet. There is a decline for ½ m. and a gradual rise to Ba Br.                                                                                                                                                                                                                   |
| 20                          | Ba Bridge.....<br>↑<br>↑<br>↑<br>↑ | 5                       | 14½    | The vicinity of Ba Br. is known as The Black Mount. On every side there is utter desolation, the loneliness being at times oppressive. From the br. there is a stiff ascent, followed by ½ m. of level road, during which a second br. is crossed. The road climbs a long, very steep hill, reaching the summit of this route at an altitude of 1449 ft. The “road” is practically a track strewn with loose stones.          |
| 18                          | Summit.....<br>↓<br>↓<br>↓         | 2                       | 16½    | Descent, very loose and rough, to Kingshouse Inn, the hill being steep just before the inn, having at that portion a gradient of about 1 in 14.                                                                                                                                                                                                                                                                               |
| 15¼                         | Kingshouse Inn .....<br>↓          | 2¾                      | 19¼    | Cross a stream and bear to L., road surface being fairer. A road leaves on L. for Loch Etive (very bad road) and there is a gradual ascent to Altnafeadh, where a small burn is crossed. The climb continues for over ½ m., then the road is undulating for some way and begins to wind                                                                                                                                       |

| $2\frac{1}{4}$                  | Ballachulish .....                    | $1\frac{3}{4}$        |                 |                                                                                                                                                                                                                                                                                                                                                                                                                                                            |
|                                 | <b>BALLACHULISH HOTEL</b>             | $2\frac{1}{4}$        | $34\frac{1}{2}$ | The Pier is 1 m. further W. (Route 288).                                                                                                                                                                                                                                                                                                                                                                                                                   |

**TYNDRUM TO BALLACHULISH.** *Reverse.*—From Ballachulish Hotel (at the S. end of the ferry) go E. passing through the village. At Bridge of Coe, bear to *r.*, thence an unmistakable road up Glen Coe and forward, avoiding all branch and cross-roads to Tyndrum.

**ROUTE 288. OBAN TO FORT WILLIAM.**

A very attractive route having magnificent scenery from end to end. There are no less than three ferries to cross, and the Highland ferryman is not always to be found at his post. However, this will be of little consequence to the lover of grand scenery who is not as a rule, in a hurry when touring. The road is rather loose to S. Shian from Connel, fair from N. Shian to Polanach, good to Ballachulish Hotel, and splendid to Fort William. The m.s.s do not reckon the ferry distances.

**OBAN TO FORT WILLIAM. Reverse.**—From pier, having Loch Linnhe on *r.*, an unmistakable road to Loch Leven Hotel. Cross ferry to Ballachulish Hotel, and then bear to *r.*, passing Ballachulish pier. Near Appin Ch. keep to *r.* and cross a br., and avoid roads on *r.* and *L.* beyond. Cross Shian Ferry and keep forward to Ledaig just beyond which, avoid a road to *L.* Cross the ferry at Connel, and bear to *r.* when over, to Oban.

**EDITOR'S NOTES.**—(a) From S. Shian there is a fairly good road eastwards along the side of Loch Creran to Creagan Ferry, where the loch should be crossed, gaining an equally fair road on the other side, and turning westwards. At fork the rider may either keep to *L.* for N. Shian or to *r.* for Appin Ch., rejoining Route 288 there. Very attractive scenery.

(b) From N. Shian a good road leads to *L.* for Port Appin, where there is a ferry to the island of Lismore. From Port Appin there is also a fair-surfaced road to Appin Ch.

## ROUTE 289.

## DALMALLY TO BRIDGE OF ORCHY.

A very loose, rough road up the lovely Glen Orchy. The view down the valley at the lower end of the glen is very fine, and the glen itself has a wild and rugged charm of its own, the road following the riverside nearly all the way.

| Miles from<br>Br. of Orchy. | Places on the<br>Road.     | Mileage.                |                  | General description of the Road.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |

**DALMALLY TO BRIDGE OF ORCHY. Reverse.**—From the br. proceed a short way towards sta. and turn sharp *r.* having the river on *r.* Unmistakable road down the glen to Inverlochy, where on meeting Route 256 turn *r.* to Dalmally.

## ROUTE 290. FORT WILLIAM TO KINGUSSIE.

A capital road throughout with easy gradients. Surface very fine to Roy Br., fair by Loch Laggan side, and excellent from Laggan Br. to Kingussie. The scenery in Glen Spean and Glen Spey is beautiful.

| 34 $\frac{3}{4}$      | Achlauchrach .....    | 2               |                  | Roy. Keep forward, cross the R. Roy, road rising to Achlauchrach, for a m. beyond which the running is easy. Steady, winding, gradual ascent of Glen Spean to Roughburn, where the highest point is gained. Nearly level for over a m., and an easy decline to Moy, thence a good, easily undulating run by the shore of Loch Laggan to Loch Laggan Hotel. Surface very fair from Roy Br., but a little loose on the short hills.                                                                                                                                                                                    |

| 17 $\frac{3}{4}$      | Loch Laggan Hotel ... | 8 $\frac{3}{4}$ | 31 $\frac{3}{4}$ | The road continues to lie in the valley and affords splendid going, descending in Strathmashie to road junction at Drumgask, where turn <i>l.</i> (forward, a fair moorland road connects, southwards, with Route 210 near Dalwhinnie, 7 $\frac{1}{2}$ m.), and cross the single-span iron br., then bear <i>r.</i> passing Laggan Ch. Road now undulates in the Spey valley, and there are a few short ups and downs near Cluny Castle, and a longer rise and fall at Auchmore. Beyond this the running is very easy to Newtonmore, where Route 210 is joined, and Kingussie. Very fine surface from Laggan Bridge. |

**FORT WILLIAM TO KINGUSSIE.** *Reverse.*—Leave in a S.W. direction, having rly. on *l.* Keep to *r.* at fork at Newtonmore, cross Laggan Bridge, and bear *r.* at road junction beyond. Unmistakable road to Spean Br., where turn *l.*, having rly. on *l.* for some way towards Fort William.

## ROUTE 291. ARDGOUR TO MOIDART.

A very hilly, trying road with fairly good surface to Salen Inn, then rough and inferior over to Moidart. Some remarkably fine views of hill and water. There is no inn at Moidart, the last passed being that at Shiel Bridge.

| Miles from Moidart. | Places on the Road.        | Mileage.        |        | General description of the Road.                                                                                                                                                               |

|                     | KINLOCH MOIDART ...   | 1 $\frac{1}{2}$ | 33 $\frac{1}{4}$ | (A <i>pathway</i> only leads round by the N. side of Loch Moidart, ascends Glen Uig, and goes by the S. side of Loch Ailort to Kinloch Ailort, 14 m. The scenery is beautiful.)                                                                                                                                                                                                                                                                                                                         |

ARDGOUR TO MOIDART. *Reverse.*—Climb the steep hill through Ardmolich Wood; steep descent on other side. At Shiel Bridge bear *l.*, and keep forward at Salen Inn (*r.* to pier). Thence an easily-followed road to Ardgour.

EDITOR'S NOTES.—(a) The road northwards from Ardgour by the W. side of Loch Linnhe is quite unrideable.

(b) To *l.* at road junction before Strontian there is a very hilly road, with rough surface, forming a connection with Route 292. This access between the routes can only be necessary when taking Route 291 in reverse direction, as Route 292 leaves to *l.* at fork beyond Inversanda in the forward direction.

## ROUTE 292. ARDGOUR TO LOCHALINE.

A hilly road through wild country in the heart of Morven, but with a fairly good surface, except on the steeper hills, when it is loose and rough. Fine view of Loch Aline from the high ground beyond Larachbeg.

| 25                       | Fork-roads .....           | 7                       | 7                | Keep to <i>L.</i> up steep ascent, then very undulating for over a m. with sharp fall of nearly $\frac{1}{2}$ m., then easy to Glengalmadale. Roughish surface after the fork, then better on the more level road. Ascent by Camasnacroise Ch., beyond which keep to <i>r.</i> with successive rise and fall to Tigh Ghardail, and a steep, rough climb to Lochuisge and the small croft of that name, and a further ascent beyond the road junction to summit. Loose stones on this ascent. |

**ARDGOUR TO LOCHALINE. Reverse.**—From the pier keep up the steep hill, passing a ch. on *r.*, thence an easily-followed road to Ardgour.

## ROUTE 293. FORT WILLIAM TO ARISAIG.

A very good road to Kinlocheil, then fairly good towards Stagehouse Inn; thereafter it is very hilly and the surface is poor in parts, but fair as a whole. The surroundings throughout are magnificent, the scenery scarcely being surpassed in Scotland for its wild grandeur.

FORT WILLIAM TO ARISAIG. *Reverse*.—From the inn bear r. inland; keep r. before Arienskill, thence forward, avoiding all branch-roads, to Banavie, where turn r. to Lochy Br., just beyond which, at road junction, turn again r. to Fort William.

EDITOR'S NOTES.—(a) From Kinloch Ailort a road leads 1 m. S. to Inverailort, where it stops, but there is a pathway for pedestrians, by the S. of Loch Ailort and up Glen Uig to Loch Moidart and Kinloch Moidart (on Route 291). The path leads through very charming scenery.

(b) Prince Charlie landed at the head of Loch Nan Uamh (Chambers' "History of the Rebellion," p. 24) on July 25th, 1745, and was sheltered in the farmhouse of Borrodale. He re-embarked here too after Culloden, in 1746.

## ROUTE 294.

## FORT WILLIAM TO LOCH ARKAIG.

A fairly good road with very easy gradients. The surroundings by Loch Lochy and to Loch Arkaig foot are beautiful, Loch Arkaig itself lying in a valley between high hills, with its shores thickly wooded.

| Miles from<br>Lh. **FORT WILLIAM TO LOCH ARKAIG. Reverse.**—Pass down the avenue from the loch foot and turn r. at road junction. Keep forward to Banavie, where bear l. and turn r. to Fort William when over Lochy Br.

## ROUTE 295.

## FORT WILLIAM TO INVERNESS.

This is a favourite route with touring cyclists and passes through charming scenery all the way. Though it skirts the shores of the great inland lochs that are connected by the Caledonian Canal, the road is by no means a level one. Its general characteristic is a continuous succession of rises and falls, with easier portions, at times, between. The surface is variable. On the whole it is capital to Spean Br., fair to Drumnadrochit, though roughish here and there, and very good for the last 15 m. into Inverness. This is its average condition.

| 6 $\frac{3}{4}$          | Lochend Inn.....               | 3 $\frac{3}{4}$         |        | to Lochend and for 2 m. beyond. At Dochgarroch a steady ascent for over a m. begins, thence, after a slight fall and rise on the top of the hill, a capital descent towards Inverness. Enter by Glen Urquhart Rd. and Tomnahurich St. Cross river by the suspension br. and keep forward into Bridge St. and High St. Very good surface from Drumnadrochit. |
| 4 $\frac{3}{4}$          | Dochgarroch .....              | 2                       |        |                                                                                                                                                                                                                                                                                                                                                             |
|                          | Inverness .....<br>(Town Hall) | 4 $\frac{3}{4}$         | 66     |                                                                                                                                                                                                                                                                                                                                                             |

**FORT WILLIAM TO INVERNESS.** *Reverse.*—Leave by Bridge St. and suspension br.; keep forward by Tomnahurich St., at end of which keep to *l.* and pass Public Park on *r.* Easily-followed road to Drumnadrochit, where turn *l.* and cross br., keeping again to *l.* at second br. Road follows shore of Loch Ness to Invermoriston, where turn again *l.* over a br., and keep to *l.* beyond. On leaving Fort Augustus turn to *r.*, and keep to *r.* before Bridge of Oich, crossing canal and river. At fork about 2 m. further bear *l.* (*r.* to Invergarry Hotel), and bear *r.*, at end of Loch Oich, over Laggan Br. At Spean Bridge turn *r.* at road junction, thence unmistakable to Fort William.

**EDITOR'S NOTE.**—The road forward before Laggan Br., by the E. side of Loch Oich, is more direct than that on the W. shore, but the surface is somewhat soft, and there are several hills more or less trying. This road shortens the route by nearly a m.

## ROUTE 296.

### INVERGARRY HOTEL TO CLUNIE INN.

To Tomdown Inn this road is good, though possessing a number of "wavy" ups and downs. Beyond Tomdown the climb is a somewhat alarming one when one takes the length of it into consideration as well as its rough, stony surface. To Clunie there is an equally trying descent. The view from the top is extensive; the scenery is also very fine in Glen Garry.

| Miles from<br>Clunie Inn. | Places on the<br>Road. | Mileage.                |                  | General description of the Road.                                                                                                                                                                                                                                                                    |

The steep descent to Clunie Inn (1 in 13-15 in parts) is equally rough, and there are several awkward bends. Bear L. at road junction (Route 298) to the inn. |
|                           | CLUNIE INN .....       | 3½                      | 21     |                                                                                                                                                                                                                                              |

**INVERGARRY HOTEL TO CLUNIE INN.** *Reverse.*—From the inn proceed eastwards to road junction just beyond, where turn r. At road junction at Tomdown Inn bear L. No other turns before Invergarry Hotel.

## ROUTE 297.

## TOMDOWN INN TO KINLOCHHOURN.

A fairly good narrow road through upper Glen Garry and Glen Quoich. Riders who penetrate to this part of the country usually prefer to stop at the head of the alarming descent to Kinlochhourn. Speaking of the view from this point, Sir John Lubbock says, "In Great Britain I know no better illustration of ice action than is to be seen on the road leading down from Glen Quoich to Loch Hourn, one of the most striking examples of desolate and savage scenery in Scotland."

| Miles from<br>Kinlochhourn. | Places on the<br>Road. | Mileage.                |        | General description of the Road.                                                                                                                                                                                                                                                                                                                 |

|                             | KINLOCHHOURN .....     | 1                       | 15¾    |                                                                                                                                                                                                                                                                                                                                                  |

**TOMDOWN INN TO KINLOGH HOURN.** *Reverse.*—Climb the precipitous hill from head of the loch and follow the road straight forward to Tomdown Inn.

## ROUTE 298. INVERMORISTON HOTEL TO KYLE RHEA FERRY.

The road is splendidly engineered up Glen Moriston, but the surface is loose and sandy in parts. The surface is firmer down Glen Shiel, and improves towards Shiel Inn. The ascent of Mam Rattachan necessitates over 2 m. of pedestrianism. In Glen Shiel, and from Shiel Inn to Kyle Rhea, the scenery is very grand, the outlook from the hill top above Shiel Inn being extensive. Dr. Johnson and Boswell crossed "Mam Rattachan" during their tour in the Highlands, and they termed that hill "a terrible steep to climb."

| Miles from Kyle Rhea. | Places on the Road.     | Mileage.         |                  | General description of the Road.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |

INVERMORISTON HOTEL TO KYLE RHEA FERRY. *Reverse*.—Proceed eastwards, having shore on *r*. Climb over the “Mam Rattachan” to Shiel Inn, where keep forward up Glen Shiel. At Ceannacroc Br. turn *r*. and re-cross river at Torgoyle Br., thence a straightforward road to Invermoriston Hotel.

## ROUTE 299.

## SHIEL INN TO BALMACARA HOTEL.

Easy running for over 4 m., then an exceedingly steep ascent and descent before Dornie. Toward Balmacara the surface is good and the road almost level. Fine view from top of hill at Keppoch.

SHIEL INN TO BALMACARA HOTEL. *Reverse*.—Beyond Lochalsh keep to *r*. and again *r*. about 2 m. further; cross ferry to Dornie, thence unmistakable to Shiel Inn.

EDITOR'S NOTE.—(a) The heavy hills between Shiel Inn and Dornie, via Keppoch (as described above), may be avoided by keeping on the other side of Loch Duich. Leave Shiel Inn as in Route 298 and, where road divides, keep to *r*. along the shore of the loch. Easy decline, roughish for a sho

way, then good surface. Practically level to  $5\frac{1}{2}$  m., then sharp, but quite rideable, rises and easy declines. Care required at the turn before Totaig. Here cross by ferry-boat to the W. landing at Dornie Ferry (fare, 1s.). The ferryman is summoned by horn. Shiel Inn to Totaig, 6 m. This easier way to Dornie, or Balmacara, is the more generally used of the two.

## ROUTE 300.

### INVERNESS TO FOYERS HOTEL.

A very pleasant and picturesque run, with easy gradients before Dore and towards Foyers; for the rest, practically level. The Falls of Foyers are beyond the hotel, both being close to the roadside. From the falls the road rises on a winding stiff gradient to junction with the road mentioned in the note to Route 301.

| 18 $\frac{1}{2}$         | Inverness .....<br>(Town Hall.) | ...                     | ...              | Leave Town Hall by Castle St., at end of which keep to <i>r.</i> by Haugh Rd. and Dore Rd. Capital running by the E. side of the R. Ness for over 2 m., followed by a longish easy rise and sharp descent, then again ascending, and a long downhill run to Dore. Very good surface. Here the shore of Loch Ness is gained, and the road, running through fine birch woods, is almost level for 8 m., with an occasional slight rise and fall. Rise to Inverfarigaig and steep fall to br. beyond, where keep forward ( <i>l.</i> , Route 301); care required on this descent. Stiffish rise from the br. to a capital stretch of good running before Foyers. Surface rather loose and soft after Dore, then good from Inverfarigaig.<br>(For pier and ferry across to Route 295 keep to <i>l.</i> , downhill beyond the hotel). |

**INVERNESS TO FOYERS HOTEL. Reverse.**—Follow the shore of Loch Ness in a N.E. direction, the road thence being a straightforward one to Inverness. Enter by Haugh Rd. and continue by Castle St. to Town Hall in High St.

## ROUTE 301.

### CRAGGIE INN TO FOYERS HOTEL.

A well-graded road up the beautiful Strath Nairn. The surface, however, is poor and is loose and rough beyond Flichity, but improves in the pass above Inverfarigaig and towards the junction with Route 300. The surroundings in the Inverfarigaig Pass and at Foyers are very attractive.

| 9 $\frac{1}{4}$                  | Aberarder.....                 | 2 $\frac{3}{4}$                  |                  | Downhill to road junction, where keep forward ( <i>r.</i> , a dangerously steep road down to Dores) to Loch Farraline and Errogie. At road junction keep to <i>r.</i> ( <i>L.</i> , see note). Descend the Pass of Inverfargaig and bear <i>L.</i> on meeting Route 300 at foot. Stiffish rise for a m., then easier to Foyers Hotel. Inferior surface as a whole to Flichity and roughish in parts; very rough and loose to the Inverfargaig Pass, then good to Foyers. |

|                                  | FOYERS HOTEL .....             | 2                                | 21               | (For the pier, where there is ferry connection over to Ruskich on Route 295, keep to <i>r.</i> , downhill, beyond the hotel.)                                                                                                                                                                                                                                                                                                                                            |

**CRAGGIE INN TO FOYERS HOTEL.** *Reverse.*—Reverse of Route 300 towards Inverfargaig, just before which, turn to *r.* up the pass, and keep forward at top, having loch on *r.* At road junction bear *r.*, thence an unmistakable road to Craggie Inn.

**EDITOR'S NOTE.**—The road ahead at road junction, just beyond Errogie, leads over the moors towards Fort Augustus. It is loose and rough to Whitebridge (7 m.), beyond which it rises very stiffly for 4 m. to the summit, where an altitude of about 1250 ft. is reached. From this point it is a fearful road—a mass of loose stones in parts—and has two appallingly steep descents before Fort Augustus, which is 9 $\frac{1}{4}$  m. from Whitebridge. There are, however, some splendid views from the higher ground.

**ROUTE 302.****DRUMNADROCHIT TO INVERCANNICH.**

Very fine scenery in Glen Urquhart and above Invercannich. The road on the whole is a good one, though apt to be a little soft here and there, especially towards the summit and down the steep hill therefrom.

From this point the descent immediately begins. Being long and steep with an awkward turn at foot, it is <i>dangerous</i> and therefore requires care. Turn to r. over R. Glass, having a straight easy run to Invercannich. Fair surface on the whole.</p> |
|                            | (Temperance Hotel.)    |                         |        |                                                                                                                                                                                                                                                                                                                                                                                                            |

**DRUMNADROCHIT TO INVERGANNICH.** *Reverse.*—Proceed due E. to road junction and there turn *Z.* up the steep hill. Unmistakable down Glen Urquhart to Drumnadrochit.

## ROUTE 303.

## INVERNESS TO GLEN AFFRIC LODGE.

(Via Struy Bridge.)

This route passes through some of the most beautiful scenery to be found in Britain. As a whole it is a fairly good road, soft in parts like most of the roads in Highland glens, but affording good riding on the whole. The longest hill is that beginning 2 m. beyond Invercannich. There is no hotel at Stray Bridge.

| 14                           | Balmore .....          | I                       |       | Keep forward ( <i>r.</i> , a fair road for a m. or two up the lovely Glen Cannich), having the R. Glass on <i>L.</i> , to branch-roads at 2 m. from Invercannich. Here keep <i>r.</i> ( <i>L.</i> , a rather inferior road, but quite rideable, for 3½ m. to Guisachan) up a long steep ascent, with a fairly easy, but soft, road from top of the hill. The ascent of the beautiful Glen Affric, going through the strikingly picturesque Chisholm's Pass, is made on a gradual, undulating gradient. At the end of the pass, Loch Beneveian is skirted on <i>L.</i> There is an ascent short, but stiffish at one part, to Glen Affric Lodge at the end of Loch Affric, and here, amid scenery which it would be difficult to surpass in the kingdom, the road ends. |

**INVERNESS TO GLEN AFFRIC LODGE. Reverse.**—Easily-followed road down to Invercannich. Here keep forward over the iron br., thence an unmistakable road to Lovat Br. where join Route 310 and follow latter portion of reverse of that route into Inverness.

## ROUTE 304.

## STRUY BRIDGE TO MONAR LODGE.

This road leads up the picturesque Strath Farrar. It is not a very good road, but it affords fair riding on the whole. Beyond Monar Lodge it is not advisable to go if cycling. Pedestrians only may continue by the moor track over to Attadale Sta. on the Strome Ferry branch of the Highland Rly.

**STRUY BRIDGE TO MONAR LODGE.** *Reverse.*—A straightforward easily-followed road down Strath Farrar, keeping on *l.* bank of the river.

**ROUTE 305. INVERNESS TO DINGWALL.**

(Via Kessock Ferry.)

The distance to Dingwall is 7 $\frac{1}{4}$  m. shorter by this route than by the main road (Route 310). Gradients well engineered and surface capital. Fine view from the summit.

**INVERNESS TO DINGWALL. Reverse.**—Route 310 (reverse) to Conan, where keep to *l.* at fork, and at fork at Tore keep to *r.* Cross ferry from N. to S. Kessock, and enter Inverness by Lower Kessock St. At cross-streets beyond the rly. br., bear *l.* into Grant St. and cross river. Keep forward by Waterloo Pl., Chapel St., and slightly to *l.* into Academy St. Pass rly. sta. on *l.* and enter the narrow Inglis St., at end of which turn *r.* into High St.

## ROUTE 306.

# INVERNESS TO INVERGORDON.

(Direct Road.)

A hilly road through the heart of the "Black Isle"—so-called because snow will seldom lie there in winter. The high ground passed over from the 10th to the 15th miles is known as Ardmanach or the "Monk's Height." There is an alternative road via Route 307 to Fortrose, and 309 to Invergordon.

|                            | (Tower.)                 |                         |                  | near the summit.                                      |

**INVERNESS TO INVERGORDON. Reverse.**—Ferry to Newhall Point Pier, from which bear *l.* along shore, then follow road round to *r.* At branch-roads at foot of hill toward summit keep to *r.*, and again *r.* over a m. further. Keep to *r.* near Knockbain Ch. thence a straightforward road to Kessock, where cross ferry (see Route 305) to Inverness.

## ROUTE 307. INVERNESS TO CROMARTY.

A well-graded road throughout, with very good surface to Rosemarkie, then fair over the hill to Cromarty. From Cromarty there is ferry connection with the roads on the opposite side of the bay; see Route 326. There are ruins of a cathedral at Fortrose.

| Miles from<br>Cromarty. | Places on the<br>Road. | Mileage.                |                  | General description of the Road.                                                                                                                                                                                                                                                                                                                                                                                                          |

**CONAN TO CROMARTY.** *Reverse.*—Leave the town having the bay on *r.* At road junction beyond the end of the bay bear *r.*, then keep to *l.* and bear round to *l.* about a m. further. On the descent from the summit keep to *r.* at fork and turn to *r.* just beyond Findon. Beyond Urquhart bear *r.*, then *l.*, and keep to *r.* before Conan.

## ROUTE 309. FORTROSE TO INVERGORDON

A connecting link between Routes 307 and 306. Many riders prefer to follow this road in preference to that detailed in Route 306, which is more direct but not so good. See summary to that route.

| Miles from<br>Invergordon.         | Places on the<br>Road.   | Mileage.                |                 | General description of the Road.                                                                                                                                                                                                                                                                                                                                                                                                                          |

|                                    | <b>FORTROSE</b> .....    | ...                     | ...             | Route 307 to road junction.                                                                                                                                                                                                                                                                                                                                                                                                                               |
| 9 $\frac{1}{4}$<br>7 $\frac{1}{4}$ | Road junction .....      | 2 $\frac{1}{2}$         | 2 $\frac{1}{2}$ | Here keep forward up a fairly steep ascent to the summit of Ardmanach, or "Monk's Height," with a long steep downhill run on the other side, to the level before the fork-roads. At the fork bear <i>r.</i> to Newhall Point, and keep forward round the coast to the ferry pier, where there is connection with Invergordon, the harbour of which is $\frac{1}{2}$ m. across the firth. Roughish surface in parts on the hill, good on the level ground. |

**FORTROSE TO INVERGORDON.** *Reverse.*—Ferry to Newhall Pier, from which bear *l.* along shore, then follow road round to *r.* At branch-roads at foot of the long hill, towards the summit keep to *r.*, and bear to *l.* over a m. up the ascent. Thence an easy road to follow to Fortrose. Descend the hill to Rosemarkie with care.

## ROUTE 310.

### INVERNESS TO JOHN O' GROAT'S.

As far as Helmsdale this is a magnificent road with excellent surface and, on the whole, well-graded hills. Beyond Helmsdale the gradients are for many miles of a break-neck character, the road climbing over hill shoulders and dipping down precipitous slopes to the intersecting valleys. After Latheron the general undulating nature of the road is resumed and the surface is again very good, and good it remains to within a few miles of John o' Groat's, when it becomes rather rough. Throughout, the scenery is extremely attractive, some of the cliff views being very striking. At John o' Groat's the furthest north point on the mainland of Scotland is attained. The m.s.s. are measured at first from a point rather N. of the Town Hall at Inverness, and therefore do not tally with the distances given below, which are taken from the Town Hall as a starting point.

| 115 $\frac{1}{2}$                     | Dingwall .....                 | 1 $\frac{3}{4}$                  | 21 $\frac{1}{4}$ | Entering the town turn <i>L</i> at ch. into High St., and in about 50 yds. go to <i>r.</i> into Tulloch St., then forward, passing the public school, and over an old canal and level rly. crossing, beyond which road bends to <i>r.</i> Cross over rly., road then running by the shore of the Cromarty Firth, and fine views are had of the "Black Isle" opposite. Easy rise to Evanton, then practically a downward tendency for 3 m., but so slight as to be hardly noticeable. Keep to <i>r.</i> when road forks ( <i>L</i> , a link with Route 323) on an easily undulating road to Alness. Very good surface as a rule; soft in wet weather. |

| 85 $\frac{1}{4}$              | Ferrytown Inn.....                    | $\frac{1}{4}$           |                  | where turn sharp <i>l.</i> (forward, Route 329), having the farm of Cuthill on <i>r.</i> with ascent to Clashmore, where the road round by Bonar Br. is met. Here bear <i>r.</i> , having a capital undulating run through finely wooded land to br. over the R. Evelix, and Milltown of Evelix, where a good road leaves on <i>r.</i> for Dornoch. Keep forward, ascending for 2 m. to fork-roads, where bear <i>l.</i> ( <i>r.</i> , to Littleferry), with a splendid downhill run to next fork, where keep again <i>l.</i> and to the level before The Mound. Cross The Mound—a splendid artificial embankment, 1000 yds. long, across a portion of Loch Fleet. At the end of the embankment turn up to <i>l.</i> passing Mound Sta. After passing rly. bear <i>r.</i> on an easy road to Golspie. Very good surface. |

| 53 $\frac{3}{4}$              | Helmsdale .....                       | $\frac{1}{4}$           | 83               | At hotel turn to <i>l.</i> , then to <i>r.</i> , ascending through East Helmsdale up a long, loose, rough, very steep ascent, the beginning of the hill work over the famous Ord of Caithness. This winding climb must be walked up. In 2 m. the road is easier for $\frac{3}{4}$ m., then re-ascends in varying gradients to the summit. There is a swinging descent on fairly good, hard surface for 2 m. then undulating towards the top of the dangerously steep hill down to Berridale. On this descent the utmost care is required, the gradient being at one portion 1 in 9, and the hill is a sharp turn over a br. at foot.                                                                                                                                                                                     |
|                               | ↑                                     |                         |                  | From the br. the ascent is almost equally steep and quite as long, and there is a very treacherous turn at $\frac{1}{4}$ m. up the hill. This hill necessitates                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |

| 41                            | ↑<br>Borgue .....                      | 2 $\frac{3}{4}$         |                   | a walk of over a m., after which there is a good downhill run for 4 m. to top of the hill before Dunbeath. This hill (1 in 14) has also a nasty turn and must be taken with great caution.                                                                                                                                                                                                                     |
| 37 $\frac{3}{4}$              | ↑<br>Dunbeath .....<br>(Bridge.)       | 3 $\frac{1}{4}$         | 99                | Beyond the br. the road ascends steeply at first and is then somewhat easier, but again becomes stiff towards the top. After a short stretch of undulating running there is another steep descent, leading down to the br. at Latheronwheel—care required—and beyond the br. the road climbs up steeply to Latheron, where keep to r. (L., Route 331). Surface very loose on the hills; fairly good otherwise. |
| 34 $\frac{3}{4}$              | ↑<br>Latheronwheel .....<br>(Bridge.)  | 3                       | 102               |                                                                                                                                                                                                                                                                                                                                                                                                                |
| 33 $\frac{1}{2}$              | Latheron .....<br>(Post Office.)       | 1 $\frac{1}{4}$         | 103 $\frac{1}{4}$ | The road now becomes a succession of undulations, more or less easy, with intermediate level stretches, by the coast, to Lybster (where a fairly good road strikes N. to Watten, on Route 332) and Ulbster, from which latter place it runs rather more inland to Wick. The last 5 $\frac{1}{2}$ m. are all downhill. Surface very fine.                                                                       |

INVERNESS TO JOHN O' GROAT'S. *Reverse.*—Leave due S. by the new road. At Reiss bear L. and on entering Wick bear r. into Bridge St. and keep forward, having the town on L. At Latheron turn L. over the br., and again L. at Latheronwheel, to which the descent is *dangerous*. *Very dangerous* descents to Dunbeath and Berridale: both hills should be walked down. At foot of hill into Berridale, keep to L. and ascend to r. towards the Ord of Caithness. *Dangerous* hill into Helmsdale. Bear L. into the village, then turn r. at hotel. Beyond the br. and rly. sta.

bear to *L*. At fork just beyond Golspie keep to *r*. Turn to *L*. near the Mound Sta. and cross the Mound. At Poles keep to *r*. at fork (*L*. to Dornoch—a good road), and at Clashmore Inn turn sharp *L*., then *r*. near Cuthill, to Ferrytown Inn. Cross Meikle Ferry and, beyond rly., bear *L*. to Tain. Pass through Tain by Academy St. Turn *r*. at Garrick Br. and again *r*. about 1 m. further. Cross over rly. near Kildary and turn *L*. just beyond, going by the shore towards Alness. At that village bear *L*. and beyond Evanton keep *L*. at fork. Enter Dingwall by Talloch St., bear *L*. into High St., and then round to *r*. Turn *L*. over Conan Br. and keep *r*. out of the village. At Muir of Ord pass over rly. and bear *r*. Before Lovat Br. turn to *L*. and cross the river, and 3 m. further turn sharp *L*. Enter Inverness over Muirtown Br. and go forward by Telford St., then *L*. along Wells St., and to *r*. by the river side to the suspension br., which cross into Bridge St. and High St.

## ALTERNATIVE ROUTE.

### TAIN TO CLASHMORE INN.

|                              | CLASHMORE INN .....    | 2                       | 24 $\frac{1}{2}$ |                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |

**TAIN TO CLASHMORE INN. Reverse.**—Leave the inn due westward. At Bonar Br. turn *L*. and cross the river, and at Ardgay turn again to *L*. At branch-roads beyond West Fearn keep to *L*.; thence a straightforward road to Tain.

**EDITOR'S NOTES.**—(a) The shorter way between Alness and Kildary Sta. is to take the road to *L*. at fork at E. end of Alness village and keep straight forward over a gently undulating road with good surface. The coast villages are thus avoided. Distance, 7 $\frac{1}{4}$  m.

(b) The alternative, and rather longer, road from this fork to John o' Groat's goes via Huna Inn. After keeping *L*. at fork the road ascends for about a m. and falls gradually from the hill top. A m. down this hill turn sharp *r*. to Huna Inn and follow the narrow road on to John o' Groat's. this road John o' Groat's is 19 $\frac{1}{2}$  m. from Wick.

## ROUTE 311.

## DINGWALL TO STROME FERRY.

A very attractive road to Garve, then somewhat desolate for several miles; but from Achnasheen onwards there is much in the surrounding landscape to attract attention, and down Glen Carron to Strome Ferry the scenery is impressive. The road, as a whole, affords fairly good riding, but on the more lonely portions of the route the surface is rather poor; out of Dingwall and near Loch Carron the surface is good. The m.s.'s. are unreliable for some way after Achnasheen.

DINGWALL TO STROME FERRY. *Reverse.*—By the shore of Loch Carron through Jeantown, thence a straightforward road to Achnasheen. Here bear *r.* and then keep *l.* (*r.* to sta., etc.). Beyond Achility Inn cross br. and bear *r.*, and keep to *l.* at Contin. Unmistakable to beyond Fodderty, where bear *r.*, pass rly., then turn *l.* into Dingwall.

(a) The fare is one shilling for passenger and cycle.

## ROUTE 312. GARVE TO ULLAPOOL.

Until Braemore Lodge is reached the surroundings are wild, rugged, dreary, but the descent into Strath More is very beautiful, the lower slopes of the hills on *r.* being thickly clad with fir, while the waters of Loch Broom are seen at the foot of the valley. Ullapool is a fishing village, established in 1788, by the British Fisheries Association. The road surface on the whole is fairly good, but near the summit it is rough.

**GARVE TO ULLAPOOL. Reverse.**—An unmistakable road southwards, at first by the E. shore of Loch Broom, then up Strath More and down Strath Garve to Garve. On meeting Route 311 beyond Gortin, bear *l.* to Garve Hotel.

## ROUTE 313.

## BRAEMORE LODGE TO DUNDONNELL.

This is known as "Destitution Road," not on account of its lonely surroundings, but because it was made, as relief work, in the famine of 1851. The surface is fairly good at first, then rough near the summit and on the long descent, but it becomes good again towards Dundonnell. Extensive view from the hill top.

| <i>Miles from Dundonnell.</i> | <i>Places on the Road.</i> | <i>Mileage.</i>       |                  | <i>General description of the Road.</i>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |

| 13 $\frac{3}{4}$              | BRAEMORE LODGE ...         | ...                   | ...              | Leaving Route 312 at the road junction cross over the R. Broom just above the falls of Measach, having an easy ascent for 2 $\frac{1}{2}$ m. to a small br. The road crosses the br., then turns <i>l.</i> up the stream side, and the gradient (about 1 in 25) is continuous for 2 m., and then it ascends for $\frac{1}{4}$ m. at about 1 in 17, and is easier to the summit. Surface fairly good for 4 $\frac{1}{2}$ m., then rough.<br>For over 2 $\frac{1}{2}$ m. the down grade is easy though the road stony and rough. The surface becomes poorer and the gradients steeper, there being three long, sudden falls that require care, the road going down through rocky gorges, the last hill being about 1 in 15. Towards the foot of the descent the surface improves and is good down the valley to Dundonnell Inn. |

**BRAEMORE TO DUNDONNELL INN.** *Reverse.*—Go up Strath Beg and keep by the stream side up the steep ascent in front; then go forward over the summit and down to Braemore Lodge at junction with Route 312.

## ROUTE 314. ACHNASHEEN TO GAIRLOCH.

Surface generally very fair indeed, though under the trees and on the more level portions apt to be soft and loose in dry weather. At certain points the scenery is unsurpassable. The view of Loch Maree, as the road descends Glen Docharty, is worthy of notice. From Kinlochewe the white peaks (quartzite) of Ben Eighe and the stupendous proportions of Slioch, opposite, are very striking. Then all along Loch Maree side, and down the Kerry valley to Gairloch, the surroundings are charming.

| 10                          | Loch Maree Hotel.....<br>(Talladale.) | 4                     | 19½           | For 2 m. the road skirts the tree-clad shore of the loch and ascends gradually. Beyond this there are two very stiff pulls to summit, which is reached at over 400 ft. From the top there is an undulating run, with downward trend for 2 m., followed by a long gradual descent to Kerrysdale, beyond which there is a rise and fall to Gairloch Post Office and an up-and-down road on to the hotel. Good surface as a whole.<br>(Route 315 is joined here.) |

**ACHNASHEEN TO GAIRLOCH.** *Reverse.*—Leave hotel southwards, passing the ch. and post office. Thence an unmistakable road by Loch Maree, and over the summit to Achnasheen.

# ROUTE 315.      GAIRLOCH TO ULLAPOOL.

This is one of the hilliest routes to be found in the kingdom. Surface fair for 15 m., poor for the next 10 m., then fairly good to Dundonnell. Over the hill towards Loch Broom the road is a bad one, and terribly steep. To avoid this latter portion the rider may follow Route 313 (reverse) to Braemore Lodge, and thence to Ullapool by Route 312, but it makes the journey nearly 20 m. longer. The view from the summit, at 2½ m., is magnificent.

| 25½                  | [Aulthea Inn ½ m.] ..... | 6½             |        | Turn r. over the br., having a level road to Inverewe, beyond which there is ½ m. of ascent and a gradual fall towards Loch Thuirnaig, the head of which is passed on L. Thence a very winding uphill pull for 2 m. and a descent of equal length towards Aulthea, which lies over on L. The road again ascends for over a m. and falls by Laid, bends to r. by the shore, and is very undulating to First Coast. There is a very stiff rise to the clachan of Second Coast, and then a steep uphill pull for about ¾ m., and an immediate and <i>dangerous</i> descent from the top along the face of the cliff, with an awkward turn not far from the summit. After crossing br. near foot there is easy going for a m., then another stiff but short ascent, and a long gradual downhill run to Gruinard, then a slight rise and fall during the next m. to Mungasdale. Beyond this there is a further long stiff climb, the first m. of which is arduous, the second easier. From the top the road is rapidly downhill for 1½ m., and the next m. is easier. Thence undulating to Dundonnell Inn by the shore of Little Loch Broom. Poor surface from Laid to Gruinard, then fairly good. |

| 2½                   | Summit.....              | 3¾             |        | Slight rise to Auchtascaillt, where bear to L., then nearly level across Strath Beg. Out of the strath the road goes up a steep hillside: first m. very difficult, the second easier, the third again stiff. At the summit there is a magnificent view. From the top of this hill the road actually drops down the face of a precipice, to the shore of Loch Broom, falling 500 ft. in 1 m., with a gradient of 1 in 5 at the foot! The surface, on both sides of the hill, is wretched. Ferry from Aultnaharrie over to Ullapool.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |

## Route 315.

## GAIRLOCH TO ULLAPOOL—continued.

| Miles from Ullapool. | Places on the Road. | Mileage.       |        | General description of the Road.                                       |
|----------------------|---------------------|----------------|--------|------------------------------------------------------------------------|
|                      |                     | Inter-mediate. | Total. |                                                                        |
| I                    | Aultnaharrie .....  | I              |        | The ferry-boat usually lies on the Ullapool shore, and must be hailed. |
|                      | Ferry.              |                |        |                                                                        |
|                      | ULLAPOOL .....      | I              | 37½    |                                                                        |

**GAIRLOCH TO ULLAPOOL.** *Reverse.*—Ferry across to Aultnaharrie and climb the hill. At foot of the descent on the other side cross Strath Beg and bear *r.* to Dundonnell Inn, and keep forward. Thence an unmistakable road, following the coast most of the way, to Gairloch Hotel.

## ROUTE 316. KINLOCHEWE TO TORRIDON.

This is a good road, with a splendidly-graded rise and fall, up and down the glen, with high mountains on every side. Very fine scenery throughout, but especially at Loch Torridon.

| Miles from Torridon. | Places on the Road.  | Mileage.       |        | General description of the Road.                                                                                                                                                                                                                                                                                                                                                      |
|----------------------|----------------------|----------------|--------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|                      |                      | Inter-mediate. | Total. |                                                                                                                                                                                                                                                                                                                                                                                       |
| II                   | KINLOCHEWE INN ..... | ...            | ...    | From the inn proceed due southwards, having river on <i>l.</i> Easy rise for a m., then short dip to a br., and the steady and gradual ascent of the valley is resumed. At fork near top keep to <i>r.</i> , and pass Loch Clair on <i>l.</i> Thence a capital, gently undulating road down the valley of the R. Torridon to Torridon, a fishing hamlet at the head of Loch Torridon. |
| 7¼                   | Head of the Glen...  | 3¾             |        |                                                                                                                                                                                                                                                                                                                                                                                       |
|                      | TORRIDON .....       | 7¼             | II     |                                                                                                                                                                                                                                                                                                                                                                                       |

**KINLOCHEWE TO TORRIDON.** *Reverse.*—Proceed up Glen Torridon, having river on *r.*, and keep forward to Kinlochewe.

## ROUTE 317. JEANTOWN (LOCHCARRON) TO SHIELDAIG.

Very hilly out of Jeantown but with comparatively easier gradients for the rest of the way. The surface is fairly good beyond Kishorn, with a little roughness here and there.

| Miles from Shildaig. | Places on the Road. | Mileage.       |        | General description of the Road.                                                                              |
|----------------------|---------------------|----------------|--------|---------------------------------------------------------------------------------------------------------------|
|                      |                     | Inter-mediate. | Total. |                                                                                                               |
| 15¾                  | JEANTOWN .....      | ...            | ...    | From the inn proceed westwards through the village, leaving the loch on <i>l.</i> , then turn sharp <i>r.</i> |
|                      | (Lochcarron.)       |                |        |                                                                                                               |

# Route 317. JEANTOWN TO SHIELDAIG—continued.

| Miles from<br>Shieldaig. | Places on the<br>Road.               | Mileage.                |                  | General description of the Road.                                                                                                                                                                                                                    |
|--------------------------|--------------------------------------|-------------------------|------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|                          |                                      | Inter-<br>medi-<br>ate. | Total.           |                                                                                                                                                                                                                                                     |
| 14 $\frac{3}{4}$         | Road junction .....<br>↑             | 1                       |                  | at road junction up a very steep, unrideable hill, on the other side of which there is a comparatively easy decline towards Kishorn, and a further descent beyond Courthill to Tornapress. Roughish surface on the hill out of Jeantown, then fair. |
| 13 $\frac{1}{2}$         | Summit.....<br>↓                     | 1 $\frac{1}{4}$         |                  |                                                                                                                                                                                                                                                     |
| 10 $\frac{1}{4}$         | Kishorn.....                         | 3 $\frac{1}{4}$         |                  |                                                                                                                                                                                                                                                     |
| 9 $\frac{1}{4}$          | Courthill House.....                 | $\frac{1}{2}$           |                  |                                                                                                                                                                                                                                                     |
| 8 $\frac{3}{4}$          | Tornapress .....<br>(Road junction.) | 1                       | 7                | Keep forward (L. to Applecross, below) on an easy road for 1 $\frac{1}{2}$ m., then a steady ascent, stiffish near the top, for 2 $\frac{1}{2}$ m.; thence a long, undulating descent to Shieldaig, down Glen Shieldaig.                            |
| 4 $\frac{1}{2}$          | Summit.....<br>↓                     | 4 $\frac{1}{4}$         |                  | Fair surface.                                                                                                                                                                                                                                       |
|                          | SHIELDAIG INN .....                  | 4 $\frac{1}{2}$         | 15 $\frac{3}{4}$ |                                                                                                                                                                                                                                                     |

**JEANTOWN (LOCHCARRON) TO SHIELDAIG.** *Reverse.*—Leave southwards, following the road up Glen Shieldaig and forward to Jeantown. The descent into that village is dangerous.

**TORNAPRESS TO APPLECROSS.**—This road has a continuous and appallingly steep ascent for 6 $\frac{1}{4}$  m. from Tornapress, rising to the summit, *considerably over 2000 ft.*, with a series of zigzags. From the top it immediately descends to sea-level at Applecross in 6 m. The surface is in very bad condition, and this, together with the nature of the gradients, makes riding impossible. There is an unsurpassable view from the top of the hill.

# ROUTE 318. ULLAPOOL TO LOCHINVER.

This road passes through wild, rugged scenery, thoroughly characteristic of Ross-shire and Sutherland. The "Little Matterhorn," Suilven, (or "Sugar Loaf,") is a conspicuous object to the W. most of the way. It is difficult to procure quarters at Lochinver in the summer and autumn. This is a hilly road with very variable surface.

| Miles from<br>Lochinver. | Places on the<br>Road.         | Mileage.                |                 | General description of the Road.                                                                                                                                                                                                                                                                                          |
|--------------------------|--------------------------------|-------------------------|-----------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|                          |                                | Inter-<br>medi-<br>ate. | Total.          |                                                                                                                                                                                                                                                                                                                           |
| 37 $\frac{1}{2}$         | ULLAPOOL .....<br>(Pier.)<br>↑ | ...                     | ...             | From the pier go a short way along the shore, having the water on r., then turn to L. through the village, leaving the loch side, and keep forward, crossing the R. Ullapool. Over the br. there is an ascent for 1 m., then a hilly, up-and-down road towards Auchendrean. Surface rough for 5 m., then slightly better. |
| 29 $\frac{3}{4}$         | Auchendrean .....              | 7 $\frac{3}{4}$         | 7 $\frac{3}{4}$ |                                                                                                                                                                                                                                                                                                                           |

Stiff ascent with one short break for 1 $\frac{1}{2}$  m., then downhill to the road junction. (L. a very hilly, bad road to Lochinver, 21 m.) Keep forward,

Route 318. **ULLAPOOL TO LOCHINVER**—*continued.*

| 11                               | Skaig Bridge.....                  | 8½                               | 26½           | Turn sharp <i>l.</i> , having Loch Assynt on <i>l.</i> , road easy by the loch side but surface rough and poor. Towards Lochassynt Lodge the undulations are more marked, but it is comparatively easy going down the valley of the R. Inver to Brackloch, where the road ascends slightly, falls towards the road junction, with a slight rise thereto, then descends (care required) to Lochinver and crosses the river to the hotel. Surface loose and stony but comparatively fair as a whole. |

**ULLAPOOL TO LOCHINVER.** *Reverse.*—Cross the river, bear to *r.*, and keep forward at the road junction, having the R. Inver on *r.* At Skaig Bridge join Route 320 and follow it, southwards, to road junction at Ledmore, where bear off to *r.*; thence unmistakable to Ullapool.

**ROUTE 319. BONAR BRIDGE TO ROSEHALL.**

With the exception of the stiffish pull before Rosehall, this is an easy and very good road through the lovely valley of the Oykeil.

| <i>Miles from<br/>Rosehall.</i> | <i>Places on the<br/>Road.</i>    | <i>Mileage.</i>                  |               | <i>General description of the Road.</i>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |

**BONAR BRIDGE TO ROSEHALL.** *Reverse.*—Facing E., go to *r.* at fork, and then over the hill, and down Strath Oyke. Beyond Inveran Hotel bear *r.*, pass *rly.*, and keep by the Kyle of Sutherland to Bonar Bridge.

## ROUTE 320. LAIRG TO SCOURIE.

(Via Aultnacallagach.)

A narrow road, with fairly good surface on the easier portions, but somewhat loose and gravelly on the hills and over the moorland. This route passes through scenery absolutely unique for its rugged grandeur and its varied view of loch and mountain. The difficulty of the hills—especially beyond Skaig Bridge—is amply compensated for in the prospects from their summits.

| 10 $\frac{1}{2}$    | Ferry.                        |                 |                  | Cross the ferry ( $\frac{1}{4}$ m.) by boat from the inn, and on landing on the opposite shore keep well to L., ascending a fairly steep hill from Kylestromie. Quick descent from hill top to Duartmore Br., and a corresponding ascent on the other side. Beyond this hill there is easy running for a m. over the moor, then a further descent. This is followed by a succession of more or less stiff rises and falls, the hill beyond Eddrachillis Ch. being steepest. Downhill, avoiding a road to r. during the descent, to Scourie. Fair surface on the whole for such a hilly road. |

**LAIRG TO SCOURIE.** *Reverse.*—Passing the hotel on r. climb the hill ahead, thence keep forward. Cross ferry at Kyle Sku and ascend beyond the inn. At Skaig Br. keep to L., having Loch Assynt on r., and at road junction at Ledmore keep straight on. An easily-followed road to Rosehall, where keep to L., cross the moor and bear L. on meeting Route 324. Turn r. then L. before Lairg.

## ROUTE 321.

## LAIRG TO SCOURIE.

(Via Loch Shin.)

This is a much easier and better road than Route 320. The average gradients are easy all the way, the two steeper hills being in the rider's favour in the forward journey. The surface is apt to be rather soft along the loch sides, but is very fair generally.

|                     | (Hotel.)            |                |        |                                                                                                                                                                                                                                                                                                                                                                                                                     |

**LAIRG TO SCOURIE (VIA LOCH SHIN).** *Reverse.*—Leave eastward, passing Loch Baddidarroch on l. At road junction 6¾ m. out keep forward; thence a very easily-followed road to Lairg.

## ROUTE 322.

## LAIRG TO TONGUE.

Speaking of it generally, the surface is very fair, the only roughnesses being on the higher moorland. By Loch Loyal side the running is capital, though apt to be rather soft in dry weather. The view is a striking one above Tongue. Altnaharra is the "Invermudal" of Black's "White Heather," in which the surroundings are fully described.

| 26 $\frac{1}{4}$      | Crask Inn .....        | 5 $\frac{3}{4}$         |                  | for a m., but is not at any point difficult. There are 3 m. of gentle undulations over the open moorland, and the ascent to "The Crask" (or watershed) is resumed. The surface is good for several m. out of Lairg, then becomes rather poorer towards the summit.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |
| 25 $\frac{1}{2}$      | "The Crask" .....      | 3 $\frac{1}{4}$         | 13 $\frac{1}{2}$ | Sharp fall (1 in 20) for about $\frac{1}{2}$ m., then an easy downward trend for 3 m., and a quicker descent towards Altnaharra Inn. Surface improves somewhat, latterly.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |
|                       | ↓                      |                         |                  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |
| 18 $\frac{1}{2}$      | Altnaharra Inn .....   | 7                       | 20 $\frac{1}{2}$ | Cross the R. Mudal, and, avoiding a road to r. (Route 337), and to l. (Route 338), ascend the long, stiff hill ahead. In 2 m. from the inn the gradient is steep, but lessens considerably towards the summit, and the descent to Inniscannanlocha, beyond which a br. is crossed, is in no part sudden. By the shore of Loch Loyal, and at the base of Ben Loyal, the road is almost level, with only a slight rise here and there, and has a good surface, but towards the end of the loch, where it narrows into Loch Creagach, the re-ascent begins. The rise, which lasts for 2 m., is, however, gradual. At fork keep to r. (l., down to the village, hotel, etc.), and descend through trees for over a m., and keep to l. at branch-roads (r., Route 335). There is a sharp bend to l., and the road goes down abruptly to Tongue Ferry (Route 335). This descent is dangerous. Surface fairly good over the hill from Loch Loyal; loose on the descent to the ferry. |

**LAIRG TO TONGUE. Reverse.**—From the ferry keep to l., ascending the steep hill, and avoid a road to l. on the ascent [or, keep to r. from the ferry, go through Tongue village, and keep to l. ascending to the road above]. Keep forward, passing Loch Loyal on l., to Altnaharra, where avoid roads to r. and l. Thence a straightforward road to Lairg.

# ROUTE 323. ALNESS TO BONAR BRIDGE.

(The Hill Road.)

A very hilly, moorland road, but more direct than via Tain. The surface, however, is very bad on the higher ground and there is a long, dangerous descent to West Fearn. On the whole this route has little to recommend it, unless it be the extensive view from the summit.

| Miles from Bonar Br. | Places on the Road.   | Mileage.       |        | General description of the Road.                                                                                                                                                                                                                                                                                                                                                                                                                                 |

| 17½                  | ALNESS (Bridge.)      | ...            | ...    | From the br. go a few yds. E. into the village, then turn up to L, having a steady ascent for 2 m. to road junction in the woods, beyond Achandunie. The ascent is resumed just beyond this, and continues without intermission for 3 m., when the road dips to the R. Strathroy and re-ascends to the highest point on the route. The surface is fairly good at first but soon degenerates, and is very poor over the summit.                                   |

| 10¾                  | Summit                | 1½             | 7½     | The descent is easy to Aultnamain, but the surface is bad and, though the next 3 m. are gently undulating, the riding afforded is rough. At the end of the undulating stretch there is a very steep fall for 2 m. with a nasty turn, near a small br., about half-way down. This bit is particularly dangerous and should be taken slowly and carefully. Easy decline to West Fearn, where the rly. is joined on r. Surface loose and very rough on the descent. |
| 9½                   | Aultnamain            | 1½             |        |                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |

ALNESS TO BONAR BRIDGE (THE HILL ROAD.) *Reverse.*—Reverse of Route 310 (alternative portion) to the road junction beyond W. Fearn, where bear r., uphill. At fork at Achandunie, on the descent towards Alness, keep to L. Care required on entering the village.

# ROUTE 324. BONAR BRIDGE TO LAIRG.

This is a connecting link between the routes meeting at Bonar Br. and those going N. and E. from Lairg. Route 319 forms the connection with Route 320, in which case it is unnecessary to go to Lairg at all. Very fine scenery all the way from Bonar Br. to Lairg.

| 6 $\frac{1}{4}$          | Cross River Shin .....     | 1 $\frac{1}{4}$       |                  | crossing the R. Shin turn to r., having river on r. Road ascends gradually for a m., then falls, but soon resumes the upward tendency, which is continued, on a very easy gradient, for 3 $\frac{1}{2}$ m.; then level into Lairg. Capital surface.<br>(Routes 321, 322, and 325 joined here). |
|                          | LAIRG .....<br>(Church.)   | 6 $\frac{1}{4}$       | 10 $\frac{3}{4}$ |                                                                                                                                                                                                                                                                                                |

**BONAR BRIDGE TO LAIRG.** *Reverse.*—Leave due S., and at road junction  $\frac{1}{4}$  m. out keep forward having river on r. On meeting Route 319 at the Shin Br. bear to l. and cross the br. No further turnings to Bonar Br.

**EDITOR'S NOTE.**—An alternative road to Lairg from Bonar Br. runs on the other side of the valley, E. of the rly. Keep to r. at fork beyond Invershin Sta., thence up a stiffish ascent 2 m. long, with an undulating round towards Lairg from the top of the hill. Distance, 10 $\frac{1}{2}$  m. Fair surface on the whole.

**ROUTE 325. LAIRG TO GOLSPIE.**

The gradients on this road are easy and the surface fairly good, but there is nothing very attractive in the surroundings until near The Mound Sta. and at Golspie.

| <i>Miles from Golspie.</i> | <i>Places on the Road.</i>        | <i>Mileage.</i>       |               | <i>General description of the Road.</i>                                                                                                                                                                                                                                                                                                                                                                                                                |
|----------------------------|-----------------------------------|-----------------------|---------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|                            |                                   | <i>Inter-mediate.</i> | <i>Total.</i> |                                                                                                                                                                                                                                                                                                                                                                                                                                                        |
| 18                         | LAIRG .....<br>(Church.)          | ...                   | ...           | From the ch. go a few yds. S., having the waters of the loch on r., then bear round to l. ascending. The upward tendency is continuous for 2 m., and there is a good downhill run, on fairish surface, for 6 m., having rly. on r. Beyond the Torrbreac Burn the road is gently undulating to Rogart Sta. and there is a capital run, on better surface, towards the road-junction near The Mound Sta. Here keep forward, as in Route 310, to Golspie. |

|                          | <b>PORTMAHOMACK</b> .....<br>(Harbour.) | 2              | 15½    |                                                                                                                                                                                                                                                                      |

**CROMARTY TO PORTMAHOMACK. Reverse.**—Having harbour on *r.*, proceed in a southerly direction, and keep forward at North Tarrel road junction. At Fearn bear round

to *r.*, then keep to *L.* at Hill of Fearn, and go forward to the cross-roads near Nigg Sta. Here turn *L.* and follow Route 326 to Cromarty.

EDITOR'S NOTE.—An alternative road may be taken by turning to *r.* in the forward journey, bearing *L.* over  $\frac{1}{2}$  m. further, then keeping forward, passing Balintore on *r.*, to Hillton of Caddboll, where bear *L.*, and rejoin the route above. Easy, undulating road; good surface. Distance almost equal either way.

## ROUTE 328. TAIN TO PORTMAHOMACK.

The direct road. On the whole, fairly good, but apt to be loose at one or two parts. An alternative way is obtained by following Route 326 for  $2\frac{1}{2}$  m., then bearing *L.*, passing Fearn Sta. and joining Route 327 at Hill of Fearn.

TAIN TO PORTMAHOMACK. *Reverse.*—Having harbour on *r.* proceed forward to road junction at N. Tarrel, where bear *r.* A straightforward road to Tain.

## ROUTE 329. TAIN TO GOLSPIE.

(Via Dornoch.)

This route, crossing by the Meikle and Little Ferries, saves what would otherwise be a very circuitous road. Its surroundings, however, are rather uninteresting and the surface is poor in parts.

| Miles from<br>Golspie. | Places on the<br>Road.        | Mileage.                |        | General description of the Road.                                                                                                                                                                                                 |

| 7 $\frac{3}{4}$        | Dornoch.....              | 3 $\frac{1}{2}$         | 9 $\frac{1}{2}$  | Bear <i>r.</i> on entering the village, then turn <i>l.</i> and keep forward. Road ascends (keep to <i>l.</i> at fork; <i>r.</i> to Embo) to the hamlet of Embo-Street for $\frac{1}{2}$ m., beyond which it is easy and then descends gradually towards Little Ferry S. Landing, where ferry-boat is taken for the N. Landing. Fair surface from Dornoch to Little Ferry. |
| 6 $\frac{1}{2}$        | Embo-Street.....          | 1 $\frac{1}{4}$         |                  |                                                                                                                                                                                                                                                                                                                                                                            |
|                        | <i>Ferry.</i>             |                         |                  |                                                                                                                                                                                                                                                                                                                                                                            |
| 3 $\frac{1}{4}$        | Little Ferry N. Landing.. | 3 $\frac{1}{4}$         | 14               | The road on to Golspie, leading through a portion of Balblain Wood, is level, but has a poor surface. Route 310 is re-joined at the village.                                                                                                                                                                                                                               |
|                        | GOLSPIE .....             | 3 $\frac{1}{4}$         | 17 $\frac{1}{4}$ |                                                                                                                                                                                                                                                                                                                                                                            |

**TAIN TO GOLSPIE. Reverse.**—Leaving the village southwards bear to *r.*, then keep to *l.*, where roads fork, just beyond. Cross Little Ferry, and a m. beyond the S. Landing turn to *l.* In Dornoch bear *r.* in centre of the village and leave to *l.* by the Meikle Ferry road, which is seen, ahead, running level through the low shrubs by the shore. Cross Meikle Ferry beyond Ferrytown Inn and, beyond Meikle Ferry Sta., bear *l.* towards Tain.

## ROUTE 330. HELMSDALE TO MELVICH.

For a greater part of the way this road passes through some of the dreariest country in Scotland. At either end, however, above Helmsdale and in lower Strath Halladale, the surroundings are more pleasant. For such a lonely road the surface is wonderfully good, the little roughnesses being appreciable only here and there.

| Miles from<br>Melvich. | Places on the<br>Road.              | Mileage.                |        | General description of the Road.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |

| 15 $\frac{3}{4}$    | Forsinard Hotel & Sta. .... | 1 $\frac{1}{2}$ | 24 $\frac{1}{2}$ | Here the road crosses the rly. on the level and leaves it, the rly. going N.E. and the road due N. There is a long undulating descent into Strath Halladale, with a slight ascent from the br., over the Halladale R. The downward run is resumed for over a m. and then the road undulates by the straggling crofts of Trantlebeg, Croick, and Dalhalvaig, falls beyond the br. over the Smigel Burn, and trends upward to Golval. At road junction beyond bear to L. cross the Halladale R. by the handsome new br. and ascend into Melvich. From Forsinard the surface, though fairly good on the whole, is rather soft and loose here and there, and becomes especially so in dry weather. |

**HELMSDALE TO MELVICH.** *Reverse.*—Proceed southwards, cross the Halladale R. and turn r. at road junction beyond. Thence an unmistakable road over the lonely moorland and down the Helmsdale valley to Helmsdale.

**ROUTE 331. LATHERON TO THURSO.**

A very lonely road passing through a vast plain of dull brown peat-bog, clothed with acres of luxuriant heather. There is no shelter of any kind for many miles, and not even a tree to be seen for the greater part of the way. The surface, with the exception of some rather loose, stony patches in parts, is very fair.

**LATHERON TO THURSO.** *Reverse.*—Route 332 (reverse) to road junction, 6 m. out, where bear to *r.* and avoid a road to *L.*, beyond Georgemas Sta. Thence straight forward to Latheron.

## ROUTE 332.

## WICK TO THURSO.

(Via Watten.)

This is a companion route to 333; both are good roads and both are of almost equal length. Of the two, however, perhaps this route via Watten is the better and easier. The surroundings are rather monotonous and dreary.

| <i>Miles from Thurso.</i> | <i>Places on the Road.</i> | <i>Mileage.</i>        |               | <i>General description of the Road.</i>                                                                                                                                                                                                                                                                                                                                                                                                                                         |

| 6 $\frac{3}{4}$       | Railway Bridge .....   | 3                       |                  | Georgemas Junction Sta. lying over to <i>l.</i> The highest point of the road is reached a m. beyond the rly. br., at Georgemas Inn, before which Route 331 is joined on <i>l.</i> Good surface.                                                                                         |
| 6                     | Road junction .....    | $\frac{3}{4}$           |                  |                                                                                                                                                                                                                                                                                          |
| 5 $\frac{3}{4}$       | Georgemas Inn .....    | $\frac{1}{4}$           | 15               | The road descends easily for 2 m., and is then undulating, but with a continuous downward tendency to Thurso, before which bear <i>l.</i> over the br. into the town. The last few m. are somewhat rough and lumpy owing to the heavy traffic in connection with the flagstone quarries. |
| $\frac{1}{4}$         | Thurso Bridge .....    | 5 $\frac{1}{2}$         |                  |                                                                                                                                                                                                                                                                                          |
|                       | THURSO .....           | $\frac{1}{4}$           | 20 $\frac{3}{4}$ |                                                                                                                                                                                                                                                                                          |
|                       | (Princes Street.)      |                         |                  |                                                                                                                                                                                                                                                                                          |

WICK TO THURSO (VIA WATTEN). *Reverse.*—From Princes St. and Macdonald Sq. turn down to the br., which cross, and bear *r.* on other side. Near Georgemas Inn avoid a road to *r.*, but keep forward passing over the rly.; thence an unmistakable road to Wick.

## ROUTE 333.

## WICK TO THURSO.

(Via Thura Inn.)

See summary to previous route. The m.s.s. on this road appear to be measured from a different point in Wick, and therefore do not tally with the distances given below, which are taken as starting from the County Buildings, as being the most convenient centre for this route to begin at. All the gradients on the route are comparatively easy; the scenery, however, is tame.

| Miles from<br>Thurso. | Places on the<br>Road.      | Mileage.                |                  | General description of the Road.                                                                                                                                                                                                                                                                                                              |
|-----------------------|-----------------------------|-------------------------|------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|                       |                             | Inter-<br>medi-<br>ate. | Total.           |                                                                                                                                                                                                                                                                                                                                               |
| 21                    | WICK<br>(County Buildings.) | ...                     | ...              | From Bridge St. go to <i>l.</i> up High St., and out of the town by the sawmills. The first $\frac{1}{2}$ m. is uphill; beyond that it is at first level, then slightly undulating, and rises easily to the Plover Inn at Reiss, where the John o' Groat's Rd. (Route 310) leaves to <i>r.</i> Surface a little lumpy out of Wick, then good. |
| 20 $\frac{1}{2}$      | Gallowhill .....            | $\frac{1}{2}$           |                  |                                                                                                                                                                                                                                                                                                                                               |
| 17 $\frac{3}{4}$      | Reiss .....                 | 2 $\frac{3}{4}$         | 3 $\frac{1}{4}$  | Keep forward, having an easy downhill run by Reiss School, then a stretch of fairly level road and a stiffish rise for $\frac{1}{2}$ m., followed by a succession of rise and fall, all easy, to Thurso Inn. Good surface.                                                                                                                    |
| 16 $\frac{1}{2}$      | Kilminster .....            | 1 $\frac{1}{4}$         |                  |                                                                                                                                                                                                                                                                                                                                               |
| 14                    | Kirk .....                  | 2 $\frac{1}{2}$         |                  | The road is undulating, with upward trend, for some way beyond the inn, then gradually falls towards Castletown, before which place a fairly good road leaves on <i>r.</i> for Barrock, etc. Shar turn at a br., then a winding road with easy rise                                                                                           |

**WICK TO THURSO. Reverse.**—From Macdonald Sq. go down to br., which cross, and bear *l.* at branch roads beyond. Near top of hill turn to *r.*, and on leaving Castletown keep again to *r.* and bear *l.* beyond and cross br., at which the road makes an awkward turn. Thence a direct, forward road to Wick.

## ROUTE 334. THURSO TO JOHN O' GROAT'S.

An easy road from Castletown to East Mey, then rather hilly for 3 m., and again fairly level to John o' Groat's. The surface, though good as a whole, is, owing to the sandy nature of the soil, somewhat loose in parts. Some fine views of the Pentland Firth.

|-------------------------------|------------------------------|-------------------------|------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|                               |                              | Inter-<br>medi-<br>ate. | Total.           |                                                                                                                                                                                                                                                                    |
|                               | [Huna Inn, $\frac{1}{4}$ m.] |                         |                  | further (forward, to Huna Inn). In another $\frac{3}{4}$ m. turn to <i>L.</i> , and to <i>r.</i> in about $\frac{1}{2}$ m., then, $\frac{3}{4}$ m. beyond, finally to <i>L.</i> to John o' Groat's. Good surface; loose here and there, especially in dry weather. |
|                               | JOHN O' GROAT'S .....        | 3                       | 20 $\frac{1}{4}$ |                                                                                                                                                                                                                                                                    |

THURSO TO JOHN O' GROAT'S. *Reverse*.—Leave the hotel due S., and at cross-roads at about  $\frac{1}{2}$  m. out turn to *r.* then to *L.* over  $\frac{1}{2}$  m. beyond, and to *r.* at next road junction. On meeting the road to Huna Inn bear *L.*, going westwards near the coast and passing Canisbay Ch. After crossing the first br. at Gills bear to *r.* and cross the other br., thence unmistakable to Castletown, where join Route 333.

## ROUTE 335. THURSO TO DURNESS.

An excessively hilly road, with several very dangerous descents and at least two ferries to cross. The surface to Reay is very good, then it becomes poor and is in parts rough and loose, but on the easier portions of the road affords fair riding. There are, however, an abundance of remarkably fine views of the northern coast, and the many straths dipped into are a picturesque relief to the dull moorland passed over for a greater part of the way. The Cave of Smoo, to the seaward of Smoo House, is worthy of a visit, it being a remarkable cavern. Sir Walter Scott gives an account of it in his *Diary*.

| 52½                 | Strathy..... ↓          | 2½             |        | Strathy to the br. over the Strathy Water. On the other side of the river there is a long steep hill to face, having a maximum gradient of 1 in 16. From the top of the hill, which is a m. long, there is easy going for 1½ m., followed by another steep and dangerous descent with an awkward turn about midway. At the hill foot the Armadale Water is crossed and there is a very stiff long ascent therefrom, on a gradient of about 1 in 14. And for a m. beyond the top of this steep hill the ascent is continuous for over a m., but becomes much easier. Poorer surface after Melvich.                                                                                                                                                                                                                                                                             |

| 42¾                 | [Farr]..... ↓           | 3              |        | For about 2 m. the surface is better and the road, after descending from the inn, is gently undulating. Cross the R. Naver to r. by the new br. and keep up the valley, having river immediately on L., to road junction, where turn r. up a long, roughish, steep hill; gradient 1 in 11. Having crossed the watershed the road falls almost as rapidly to Borgie Br.—care required. The road now ascends another hill shoulder, passes three lochs, drops down to a small br., rises sharply, and re-descends by Strath-theanga to another br. After a m. of rise and fall, more or less considerable, the quick dangerous descent towards Tongue Ferry begins. On meeting Route 322 turn sharp r. The road bends round to L. just beyond, passes Tongue House at the hill foot, and is level to the ferry pier. Bad surface on the whole, but improving a little latterly. |

|                     |  |                 |                  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |
| 24                  | The Moin House ...<br>(Summit.)                                                  | 3 $\frac{3}{4}$ |                  | arduous ascent, over a vast boggy moorland known as "The Moin," or peat moss. The road over this tract of peat-hags was constructed, by the Duke of Sutherland, at the expenditure of a great amount of labour and money. Half-way across is the "Moin House," erected as a refuge for those who may be overtaken by a storm. For $\frac{3}{4}$ m. beyond this refuge house the road is gently undulating, and then the long dangerous descent towards the R. Hope begins. This hill, which is 2 m. long, must be taken with great care, as there is an awkward turn at one point, and that just where the gradient is steepest. Cross the river by the Chain Ferry.                                                                                                                                                                                                                                                                                                                                                                |
| 20 $\frac{1}{2}$    | Chain Ferry.....                                                                 | 3 $\frac{1}{2}$ | 52 $\frac{1}{4}$ | Steep ascent for $\frac{1}{2}$ m., followed by a short fall and re-ascent to Heilem, where keep forward (r. to Heilem Inn, from which the ferry may be crossed, thus obviating the necessity of going round the head of the loch, and also saving over 9 m.). By the shore the road is level, then it rises sharply to a m. of fairly easy running, and re-ascends, slightly, to Eireboll, and junction with Route 338. From this point there is a short, sharp descent and an undulating stretch by the side of Loch Eireboll to the straggling Clachan of Laid, through which the road rises and falls, subsequently passing a road on r. leading to Heilem ferry, to a small br. From this br. for over $\frac{1}{2}$ m. the road ascends, and is up and down more or less for 2 m. to fork, where keep to l., ascending a steep, winding pitch of $\frac{1}{2}$ m. Downhill to Sangobeg, out of which it is again uphill work, and thence very undulating to Durness. Surface fair on the whole; roughish on the steeper hills. |

**THURSO TO DURNES. Reverse.**—Leave due E., having Sango Bay on l., and follow the road round Loch Eireboll [or, at 7 m. out turn l., cross Heilem Ferry to Heilem Inn, and re-join the road above the inn]. Near Heilem keep to r. (l. to the inn and cross R. Hope by chain ferry. At foot of long hill from the Moin, turn sharp r. (great care required) to the ferry and cross the Kyle of Tongue in the ferry-boat. From the E. pier keep to l. up the steep hill, and at road junction towards the town turn sharp l. At road junction in Strath Naver turn sharp l. and cross the br. to Bettyhill Inn, where keep forward, passing Farr Ch. When over the Halladale br. keep again forward, avoiding a road to r. At fork beyond Reay bear to r. to Shebster to Thurso.

## ROUTE 336. THURSO TO REAY.

An alternative road to the first portion of the preceding route. Rather more hilly than via Shebster but possessing a good surface.

| Miles from Reay. | Places on the Road.              | Mileage.        |                  | General description of the Road.                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |

|                  |                                  | Inter-mediate.  | Total.           |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |
| 10 $\frac{3}{4}$ | THURSO .....<br>(Princes Street) | ...             | ...              | Proceed along Princes St. in a N.E. direction, then turn round to <i>L.</i> and keep forward, having Thurso Bay on <i>r.</i> when out of the town. At $\frac{3}{4}$ m. out keep to <i>L.</i> ( <i>r.</i> to Scrabster; see note) and at next branch roads keep to <i>r.</i> up a long, stiff hill. From the top there is a long descent to Bridge of Forss and a short re-ascent by Lybster. Thence the road is undulating for 3 m., rises and falls to the road junction, and is easy to Reay. Good surface. |
| 9 $\frac{3}{4}$  | Top of the hill .....            | 3               |                  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |

**THURSO TO REAY. Reverse.**—Leave eastwards and at road junction, beyond the br. over the Isauld Burn, bear *L.*; thence unmistakable to Thurso.

**THURSO TO SCRABSTER PIER.**—As in above route to fork  $\frac{3}{4}$  m. out, where bear *r.* down a roughish, lumpy road to the pier (2 m. from Thurso). Here the mail steamboat leaves for Orkney every week-day evening on the arrival of the mails from the south.

## ROUTE 337. ALTNAHARRA TO BETTYHILL.

A very solitary road down Strath Naver, with bad surface—in parts, in fact, a mere track. This lonely glen was once fairly well populated, but now there are few signs of a human habitation. The scenery by the side of Loch Naver, and towards Bettyhill, is very fine.

| Miles from Bettyhill. | Places on the Road. | Mileage.        |                  | General description of the Road.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |

|                       | BETTYHILL INN ..... | 2 $\frac{3}{4}$ | 24 $\frac{1}{4}$ |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |

**ALTNAHARRA TO BETTYHILL. Reverse.**—Follow Route 335 for 2 $\frac{3}{4}$  m., then keep forward up Strath Naver to Altnaharra.

## ROUTE 338. ALTNAHARRA TO DURNES.

A rough road, with loose, soft surface. The descent towards Route 335 is difficult even to walk down. The broch of Dun Dornadilla, attributed to the Picts of the 7th century, stands close by the roadside, and is worthy of notice. Just beyond the fort the vast sides of Ben Hope, topped by a mass of barren rock, rise sheer above the road.

| Miles from Durness. | Places on the Road.                       | Mileage.              |                        | General description of the Road.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |

| 35 $\frac{1}{4}$    | ALTNAHARRA INN ...                        | ...                   | ...                    | Proceed N. from the inn to the branch-roads, where turn to L. (r., Route 337; forward, Route 322) up the valley of the Mudal Water. The ascent is undulating and gradual for 5 $\frac{1}{2}$ m. For over a m. at the top the road is fairly level, and the subsequent descent is easy for 3 m., then rather steeper for 1 $\frac{1}{2}$ m., passing the Pictish fort, or broch, towards the hill foot. Thence the road is gently undulating to the Strathmore Water. Here a broad river has to be forded over, or ferried, according to the depth of the water there is at present no br. When safely on the other side, the rider has a long, rough, steep ascent to face. There is a break in the climb, for rather over $\frac{1}{4}$ m., about half-way up, then a stiff pull to the top, where a magnificent view is obtained. The descent towards the road junction is almost precipitous, and has some treacherous turns on a gradient of 1 in 6! Surface very rough. |
|                     | ↓                                         |                       |                        |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |

**ALTNAHARRA TO DURNES. Reverse.**—Route 335 (reverse) to road junction before Fireboll, where turn r. up the steep winding ascent. At the foot of the descent beyond, the Strathmore Water has to be forded or ferried across, according to the state of the water. Thence a straightforward road to Altnaharra.

## ROUTE 339. SCOURIE TO DURNES.

A good road for this part of Sutherlandshire. The surface is very fair throughout, and the hills over the summit, though long, are well engineered. There are also some very fine views, and the surroundings are, in parts, wildly picturesque.

**SCOURIE TO DURNES.** *Reverse.*—Leave due S.W.; thence an unmistakable road, passing the Kyle of Durness on *r.* at one portion, and going over the summit to Rhiconich Inn. Here bear *l.* and cross br. At road junction just beyond Laxford Br. bear *r.*, and follow Route 321 to Scourie.

**ROUTE 340. DURNES TO CAPE WRATH.**

very hilly road, passing through an absolutely desolate tract of country. The surface, however, is comparatively fair as a whole, but is in certain parts loose and rough. There is some remarkably fine cliff scenery at the Cape. Visitors are not admitted to the lighthouse on Sundays, and travellers are not allowed to take up temporary quarters there at any time without permission from the Secretary of the Commissioners of Northern Lights in Edinburgh. This rule is very strictly enforced. Concessions are, of course, made in the case of any one who may be overtaken by storms.

|                                                  | CAPE WRATH LIGHTHO.                                      | 5 $\frac{3}{4}$                  | 14              | For $\frac{1}{4}$ m. on this high ground—a desolate tract of moorland known as “The Parph”—the road is fairly level, then the descent begins, and the steep decline to the small valley below is made in two sections, with a $\frac{1}{4}$ m. break about half way down. From the br. the rider has a stiffish uphill pull (about 1 in 15) for nearly $\frac{3}{4}$ m., followed by a m. of easier work; at the end of this there is a fairly steep descent (near the foot be careful to avoid an access-road to r., leading to the quarries of Clashcarnoch) and a re-ascend beyond of nearly a m. Thence an easier bit of road to the lighthouse at the point of Cape Wrath. The surface, though fair on the whole is rather loose and rough in places, especially on the steeper hills. |

**DURNESS TO CAPE WRATH. Reverse.**—This being the only existing road it cannot possibly be mistaken. Great care must be taken at the hills, and one or two had best be walked down. Beyond Keoldale, on joining Route 339, bear L. to Durness.

# ISLE OF ARRAN.

## ROUTE 341. BRODICK TO BRODICK.

(Round the Island.)

This road, with the exception of its deviation into Glen Chalmadale, follows the coast line very closely right round the island. It is a narrow road, with very variable surface. On the less frequented portions the surface is loose and rough, but on the whole it affords fair riding. Tricyclists, however, will not find the roads in Arran adapted to their machines, either with regard to the nature of the road-surface or to the fact that only a narrow foot-bridge is provided for crossing some of the streams. The scenery is very fine throughout.

|                                    | Places on the Road.   | Mileage.        |                  | General description of the Road.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |

| 49 <sup>1</sup><br>49 <sup>1</sup> | Corrie<br>(Hotel.)    | 4 $\frac{1}{4}$ | 6 $\frac{1}{4}$  | Near the middle of the village the road makes a sharp turn at the head of the little harbour. Road level to the foot of Glen Sannox, up which glen the view from the road is remarkably fine. The surface becomes soft and somewhat heavy, and there is an open burn to cross. Bicyclists will find a wooden foot-bridge a little higher up. An ascent by Mid Sannox, and then a m. of easier running across N. Glen Sannox, but the surface is somewhat rough and loose in parts. Beyond the br. in the glen the road ascends steeply for 1 $\frac{1}{2}$ m.; surface soft and rutty. At the summit (600ft.) the view of the hills, looking backward, is a very grand one. For $\frac{1}{4}$ m. the road is nearly level and the surface is better, but beyond this the long descent of Glen Chalmadale begins, and the road deteriorates. Towards the foot of the hill the descent is sharp, and on a curve, then level to the hotel at Lochranza. |

| 41 <sup>1</sup><br>39 <sup>1</sup> | Lochranza<br>(Hotel.) | 3 $\frac{1}{2}$ | 14 $\frac{1}{4}$ | A level road round Coillemore Point, but loose and rutty in parts, to Catacol, where some remarkable examples of contorted schist will interest the geologist. At the Craw there is a quick turn and short, steep ascent, and a fall                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |
|                                    | Catacol               | 2               |                  |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |

## Route 341.

## BRODICK TO BRODICK—continued.

| Miles from Brodick. | Places on the Road.               | Mileage.        |                  | General description of the Road.                                                 |
|---------------------|-----------------------------------|-----------------|------------------|----------------------------------------------------------------------------------|
|                     |                                   | Inter-mediate.  | Total.           |                                                                                  |
| 37 $\frac{1}{4}$    | Tundergay Free Ch. ...            | 2               |                  | to the level, passing Tundergay Free Ch. on <i>L.</i> to Pirnmill. Fair surface. |
| 34 $\frac{3}{4}$    | Pirnmill.....                     | 2 $\frac{1}{2}$ | 20 $\frac{3}{4}$ | From Pirnmill the road is level, but a little rutty                              |
| 33 $\frac{3}{4}$    | Whitefarland .....                | 1               |                  | to Whitefarland, and ascends towards Imachar                                     |
|                     | ↑                                 |                 |                  | past which place it descends to the level again                                  |
| 32 $\frac{1}{4}$    | Imachar.....                      | 1 $\frac{1}{2}$ |                  | Sharp curves on both of these hills require care                                 |
|                     | ↑                                 |                 |                  | and may be considered dangerous. Level to                                        |
| 29 $\frac{3}{4}$    | Dougie .....                      | 2 $\frac{1}{2}$ |                  | Dougie, where cross the Iorsa Water by the                                       |
| 28                  | Auchagallon .....                 | 1 $\frac{1}{2}$ |                  | wooden br. At Auchagallon, where the road                                        |
| 26 $\frac{1}{2}$    | Tormore .....                     | 1 $\frac{1}{2}$ |                  | divides, keep forward ( <i>L.</i> to Route 342). Cross                           |
|                     | ↓                                 |                 |                  | the Machrie Water by the small br., having                                       |
| 25                  | Free Church.....                  | 1 $\frac{1}{2}$ |                  | slight rise to beyond Tormore ( <i>a</i> ), followed by                          |
|                     | ↓                                 |                 |                  | a fall and a curve, which take cautiously, to the                                |
| 23 $\frac{1}{2}$    | Blackwaterfoot ( <i>b</i> ) ..... | 1 $\frac{1}{2}$ | 32               | Free Ch., and a further rise and fall before                                     |
|                     | (Inn.)                            |                 |                  | Blackwaterfoot. Road fairly good.                                                |
| 22                  | Kilpatrick .....                  | 1 $\frac{1}{2}$ |                  | Follow the road inland for $\frac{1}{2}$ m., then turn sharp <i>r.</i>           |
| 19 $\frac{1}{4}$    | Corrie-cravie .....               | 2 $\frac{3}{4}$ |                  | (forward, Route 342), having an easy rise                                        |
| 18 $\frac{1}{4}$    | Sliderry .....                    | 1               |                  | towards Kilpatrick on good surface. Road                                         |
|                     | ↓                                 |                 |                  | undulating to beyond Corrie-cravie and descending                                |
| 16 $\frac{3}{4}$    | Clanchog .....                    | 1 $\frac{1}{2}$ |                  | to the br. over the Sliderry water, at which                                     |
|                     | ↓                                 |                 |                  | curve requires to be taken carefully. Ascent                                     |
| 16 $\frac{1}{4}$    | Lagg Hotel .....                  | $\frac{1}{2}$   | 39 $\frac{1}{4}$ | with indifferent surface, from the br., then fairly                              |
|                     | ↑                                 |                 |                  | level for over $\frac{1}{2}$ m., and a quick descent by                          |
| 13 $\frac{3}{4}$    | E. Bennan.....                    | 2 $\frac{1}{2}$ |                  | Clanchog, with sharp bend before Lagg Hotel—                                     |
|                     | ↓                                 |                 |                  | care necessary.                                                                  |
| 12                  | Auchenhew .....                   | 1 $\frac{3}{4}$ |                  | After crossing the br. there is a fairly steep ascent                            |
|                     | ↓                                 |                 |                  | met with on which the road curves twice                                          |
| 10                  | Dippen.....                       | 2               |                  | sharply. At cross-roads keep straight on, having                                 |
|                     | ↓                                 |                 |                  | gentle undulations to East Bennan, with fair                                     |
| 7 $\frac{1}{4}$     | Whiting Bay .....                 | 2 $\frac{3}{4}$ | 48 $\frac{1}{4}$ | surface. Road level for a short way, then                                        |
|                     | (Hotel.)                          |                 |                  | descends a roughish hill and rises and falls                                     |
|                     | ↑                                 |                 |                  | having some awkward turns requiring care, to                                     |
| 4                   | Monamore Bridge .....             | 3 $\frac{1}{4}$ |                  | the br. below Auchenhew. Long ascent and                                         |
|                     | ↑                                 |                 |                  | short fall towards Dippen, where another sharp                                   |
| 3                   | Lamlash.....                      | 1               | 52 $\frac{1}{2}$ | curve requires attention; surface rough and                                      |
|                     | (Hotel.)                          |                 |                  | stony. Descent to the level before Whiting                                       |
|                     | ↑                                 |                 |                  | Bay; surface very rough.                                                         |
|                     | ↑                                 |                 |                  | For a m. the road is easy and the surface fairly                                 |
|                     | ↑                                 |                 |                  | good. Slight rise, and a curve, at the br. a                                     |
|                     | ↑                                 |                 |                  | KnockenKelly, followed by a gradual ascent                                       |

## Route 341

**BRODICK TO BRODICK**—*continued.*

| Miles from<br>Brodick. | Places on the<br>Road.         | Mileage.               |                  | General description of the Road.                                                                                                                                                         |
|------------------------|--------------------------------|------------------------|------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|                        |                                | Inter-<br>medi-<br>ate | Total.           |                                                                                                                                                                                          |
| 1 $\frac{1}{4}$        | Summit.....<br>↓               | 1 $\frac{1}{4}$        |                  | and is then all downhill towards Brodick. There is a sharp turn at the hill-foot which requires care; good surface latterly; the rest rather rough and loose, especially in dry weather. |
|                        | <b>BRODICK</b><br>(Pier.)..... | 1 $\frac{3}{4}$        | 55 $\frac{1}{2}$ |                                                                                                                                                                                          |

**BRODICK TO BRODICK (CIRCULAR).** *Reverse.*—Ascend the steep hill due S.; at foot of descent, on other side, turn *r.* into Lamlash. At the br. in the Monamore Glen, bear round to *L.*, and turn *r.* at branch roads beyond. An easily-followed road to near Blackwaterfoot, just before which on meeting a road at right angles turn *L.* An unmistakable road by the coast to Lochranza, from which place keep inland, ascending the glen. Before Brodick the road runs close to the shore, passing Brodick Castle on *r.* At road-junction beyond the br. turn *L.*, and keep well to *L.* round Brodick Bay to Brodick.

**EDITOR'S NOTES.**—(a) About 1 m. inland from Tormore there are interesting prehistoric remains in the shape of several circles and upright stones. In a few of the circles human remains were found some years ago. The stones are very numerous and will amply repay exploration.

(b) About 2 m. along the shore from Blackwaterfoot are the "King's Caves"—very remarkable caverns, the walls of which are carved with rough sketches of the chase, etc. King Robert the Bruce is said to have at one time inhabited these caves—hence the name.

## ROUTE 342.

**BRODICK TO BLACKWATERFOOT.**

(Via The "String" Road.)

A hilly road to the summit of the glen above Brodick, then easier. Surface roughish on the long hill, but improving towards Blackwaterfoot. The scenery is very fine; there are some excellent views of the neighbouring mountains. The m.s.'s. are measured from the old pier in front of Brodick Castle.

|                                       | <b>BLACKWATERFOOT</b> ...<br>(Inn.) | 1¼                               | 11            |                                                                                                                                                                                                                                                                                |

**BRODICK TO BLACKWATERFOOT. Reverse.**—Proceed inland, crossing the Black Water and following a portion of Route 341. Where that route branches off to *r.*, keep forward up the valley. On meeting Route 341 before Brodick bear *r.*, and go round the head of the bay to the pier.

**BRODICK TO LAGG HOTEL (VIA GLEN SCORRODALE).**—Route 341 (reverse) to Lamlash. After leaving the village the road is fairly level and good towards the road junction at Monamore Br., where keep forward (*L.*, Route 341). At first the road is level then it goes up a long incline, the surface being loose and stony. At the summit there is a short level stretch, then a descent into Glen Scorrodale. About a m. from the top there is a sharp turn and steep descent at a br.—*dangerous*. Beyond this the road ascends slightly, and is again downhill to the old mill. Surface fairly good at first, then rougher towards the mill. Cross br., road ascending gently to the falling to Bennecarrigan, where it improves slightly. On meeting the coast road (Route 341) bear *L.* to Lagg Hotel. Distance, Brodick to Lagg, 13½ m.

## ISLE OF BUTE.

---

### ROUTE 343. ROTHESAY TO KILMICHAEL.

Reverse of Route 266 (p. 283) to Port Bannatyne, and at road-junction beyond bear *l.*, crossing the island on an undulating, narrow road, with loose, roughish surface in parts, but affording fair riding on the whole. At fork, beyond the road-junction, bear *r.* down to the coast at Ettrick Bay (5 m.), from which the road runs near the shore of the Kyles of Bute to Kilmichael (9 m.), where it stops. There is ferry communication with Route 264. The road has poor surface after Ettrick Bay.

### ROUTE 344. ROTHESAY TO ROTHESAY.

(Via Kilchattan.)

Follow the ascending road inland from Rothesay, and pass the long, narrow Loch Fad on *r.* Keep to *r.* at fork-roads, and at road-junction beyond bear *l.* to Kingarth Ch. (6½ m.). Here turn *r.* to Kilchattan Bay, 8 m. from Rothesay. Road narrow, but having an average good surface. Return to Kingarth, and keep forward on the broad "new road" constructed by the Marquis of Bute. From the top of the hill there is a descent, keeping to *r.*, to Kerrycrov, on the coast near the entrance to Mount Stuart, the seat of the Marquis of Bute. Follow the shore road by Ascog, and round Bogany Point to Rothesay, 8½ m. from Kilchattan. Total distance 16½ m. Good roads.

# ISLE OF MULL.

## ROUTE 345. SALEN TO SALEN.

(Circular.)

Mull has a very wet climate, and this has some effect on the roads in the island where they are at a hilly. The surface is then apt to be "rain-washed" and loose, but on the whole the roads are very good for so desolate a country. The road detailed below has an average good surface, the portion from Salen to Lochdonhead affording capital riding. The scenery is very wild and grand, the giant Ben More being prominent before Kilfinichen Ch. There are also on this route some excellent seascapes.

| Miles from Salen. | Places on the Road.                 | Mileage.        |                  | General description of the Road.                                                                                                                                                                                                                                                                                                                                                                                                                                  |

**SALEN TO SALEN (CIRCULAR).** *Reverse.*—Follow the road ascending inland from the village, and at branch-roads at 2½ m. out keep forward. Bear to *l.* at road junction near Knock House; thence along the shore of Loch na Keal, and through the glen to Kilfinichen Ch., where keep forward by the side of Loch Scridain. At road junction near the two-arched br. turn *l.*, up into Glen More. At Lochdonhead follow the road ascending inland; thence unmistakable to Salen.

(a) Also called Aros.

(b) From Lochdonhead a narrow road leads N.E. to Duart Castle, an interesting ruin standing on Duart Point above the Sound of Mull. The walls of the main tower, fairly well preserved, are 12ft. thick. This castle was formerly inhabited by the Macleans of Mull.

## ROUTE 346. KINLOCH INN TO IONA.

This road has a good, hard surface, and is usually in very fair condition. Iona will ever be famous as the abode of St. Columba, who spread the light of Christianity to the Northern Picts before St. Augustine had landed in Kent. At Iona, too, Columba died in 597, and the present Cathedral ruins in the island mark the spot where his Monastery stood. A well-known saying of Dr. Johnson's is recalled to mind—"That man is little to be envied . . . whose piety would not grow warmer among the ruins of Iona."

KINLOCH INN TO IONA. *Reverse.*—Ferry to Fionphort, thence an unmistakable direct road to Kinloch Inn.

**ROUTE 347. TOBERMORY TO TOBERMORY.**

(Circular.)

The first 28 m. of this road are very arduous, but the surface on the whole is fairly good, and the views from the summits of the various watersheds passed over are remarkably fine.

| 31 $\frac{3}{4}$             | Calgary .....<br>↓         | 4 $\frac{1}{2}$       |               | 8 Keep forward, crossing the br. at head of Loch Cuin. Undulating road for 2 m., then an ascent of 1 m., and a long, easy decline to Calgary with rather a sharper descent beyond. By the shore of Calgary Bay the gradients are upward to Ensay. To the Ensay Burn the rise is gradual, but during the following m. the road rises steeply to the summit (580 ft.). Just beyond the top there is a double bend that requires care and a long steep decline for a m. followed by a short ascent and a further abrupt fall to the br. before Kilninian Ch. Stiff                                                                                                       |

| 25 $\frac{1}{4}$      | Kilninian Church .....  | 1 $\frac{1}{2}$ | 19               | For a short way beyond the ch. the road is level, then falls, and ascends for over $\frac{1}{2}$ m. towards Torloisk House. There is easy running for nearly $\frac{1}{2}$ m. and a descent, also easy, beyond the Free Ch. and Ballygown to a small br. From this br. the road rises to Kilbrenan, fine views of the Isle of Ulva being obtained, seaward. Long decline by Lagganulva to beyond Laggan Bay ; the road then bends round to L. and ascends, easily at first, then steeply, to Achronich. From this point it falls again, quickly at first, to the shore of Loch na Keal, and undulates to the junction with Route 345 beyond Killichronan. Here bear L. and follow that route to Salen. Surface very fair generally. |

| 13                    | Killichronan .....      | 1 $\frac{3}{4}$ |                  | Turn L. in the village and leave having Salen Bay on r. At road junction bear r. and cross the Aros Br., ascending a stiffish hill for $\frac{3}{4}$ m. beyond. The road is thence undulating, and chiefly downhill, to Ardnacross, beyond which point it ascends a long, roughish, steep hill to the head of the cliff. There is an extensive prospect from the hill top. For 3 m. the descent is of an undulating character, and beyond this there is a very sharp fall into Tobermory—care required. Fairly good surface.                                                                                                                                                                                                        |

**TOBERMORY TO TOBERMORY (CIRCULAR.)** *Reverse.*—Proceed S. from the pier, turn to r. uphill, then to L., crossing the Tobermory river. An unmistakable coast-road to Salen. At branch-roads in the village bear r., and at road junction, 2 $\frac{1}{2}$  m. further, turn again to r. and then keep forward to Dervaig, where avoid a road to r., and proceed over the hills (great care required at the sharp bends) to Tobermory.

## ROUTE 348. SALEN TO DERVAIG INN.

(Via Glen Aros.)

Follow portion of the preceding route to the road junction at 1 $\frac{3}{4}$  m. Keep forward up Glen Aros, having the R. Aros on r. A very undulating road at first, then easier down the valley of the R. Bellart to Dervaig (10 m.). Surface fairly good as a whole. This is the only direct road between Salen and Dervaig Inn.

# ISLE OF SKYE.

## ROUTE 349. KYLE AKIN TO STAFFIN INN.

The roads in Skye are, as a whole, good, but there are a few very steep hills. However, considering the wild, mountainous nature of the country, the roads, speaking generally, are remarkably well engineered and follow the river-valleys closely. The surroundings are rugged and grand in the extreme, and, as is so frequently the case on Highland roads, the extensive views obtained from the top of the higher hill-shoulders passed over give adequate compensation for the climb. A favourite way of approaching Skye is by steamboat from Gairloch (on Route 314) to Portree.

| Miles from Staffin Inn. | Places on the Road.                       | Mileage.       |        | General description of the Road.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |

| 49½                     | Broadford .....<br>(Hotel.)               | 1½             | 8      | Short, stiff rise at Broadford, then an undulating road to Dunan, which lies over to r., followed by a long hill over the moor and a steep descent to Luib; thence easy running for nearly 3 m. round the head of Loch Ainort. From the loch the road goes inland and ascends a precipitous hill, nearly a m. long, having a gradient of 1 in 8. Surface very bad. The descent on the other side is not so steep, but, owing to the rough surface, it requires to be ridden down carefully. From the foot of the hill there is an easy, undulating run by the shore of Loch Sligachan to Sligachan Inn. Very variable surface; fairly good on the easier portions—rough and bad on the steep hills. |

| 24 $\frac{1}{2}$        | Portree .....<br>(Pier.)<br>↑                                     | 3               | 33               | Leaving the village retrace the road for about $\frac{1}{2}$ m., then bear to <i>r.</i> For a short way the road is easy, then it begins to ascend, and the hill top is reached at 3 m. out of Portree; stiffish climb latterly. Long descent, keeping <i>r.</i> at fork-roads to Kensaleyre Inn. The surface on these hills is fairly good. Easy road for a m., then a gradual ascent for $1\frac{3}{4}$ m., and a fall towards Hinnisdal Br. For 3 m. further the road rises gradually, passing several scattered crofts on <i>L.</i> , and falls, quickly, to Uig Inn. On the whole, good surface.                                                                                                                                                                                                                                                                                                                                          |

| 9 $\frac{1}{2}$         | Uig Inn .....<br>↑<br>(Awkward turn.)<br>↑                        | 4 $\frac{1}{2}$ | 48               | Downhill to the br., then easy. Road now bends round to <i>r.</i> and begins the long, rough, arduous ascent to the summit near the Quirang. Avoid a road to <i>L.</i> (see note <i>d</i> ) just after the bend. The fourth m. from Uig is fairly level and acts as a welcome break midway on the ascent. The summit is reached 2 m. further. From this point the prospect is magnificent. A pathway to <i>L.</i> leads to the Quirang (see note <i>e</i> ). Just beyond the top of the hill there are two nasty turns that render riding very dangerous. This descent should always be walked down. On this hill, too, there is an accommodating bit of easy road in the middle, but at the end of this the steep decline is resumed. Avoid a road to <i>L.</i> (to Kilmaluag—rough road) and keep forward to Stenscholl and Staffin Inn, to which there is a slight rise. Surface fair generally, but apt to be loose and rough near summit. |

|                         | STAFFIN INN ( <i>f</i> ).....                                     | 3 $\frac{1}{2}$ | 57 $\frac{1}{2}$ |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |

**KYLE AKIN TO STAFFIN INN. Reverse.**—Go due W. from the inn, and avoiding a road to *r.* ascend the steep hill to the summit. Care must be exercised towards the foot of the descent beyond, where the road bends round to *L.* Keep forward to Portree, bearing *L.* to the village. Leaving Portree retrace portion of the road and keep to *L.*, having the bay on *L.* At Sligachan Inn bear *L.*; thence an easily-followed road to Broadford. At fork beyond keep to *L.*, avoid a road to *r.* at Lusa Br., thence by the coast to Kyle Akin.

**EDITOR'S NOTES.**—(*a*) An undulating road, fair surface, leads from Balmacara Hotel to Kyle Inn and ferry pier, whence there is communication with Kyle Akin. Kyle Inn pier is also the terminus of the extended single line of rly. from Strome Ferry.

(*b*) **KYLE RHEA TO BROADFORD.**—When approaching Skye by Route 298 the rider crosses by ferry boat to Kyle Rhea, and on landing there has to face a long, rough, very arduous hill, with an almost precipitous gradient near the summit. The hill is so steep that it is difficult even to wheel a cycle up. The ascent is  $2\frac{1}{2}$  m. long, the gradient, latterly, being 1 in 8. From the top there is a wide prospect of the desolate, but grandly majestic, hills of Skye, which present a solemn picture of a strange, wild, rugged solitude. There is a long very rough descent down Glen Arroch (care required in parts) for  $4\frac{1}{2}$  m. to the junction, at Lusa Br., with the Kyle Akin road. Bear *L.*, and follow Route 349 to Broadford. Distance, Kyle Rhea to Broadford,  $10\frac{3}{4}$  m.

- (c) **BROADFORD TO ARMADALE.**—Leave Broadford eastward, and at road junction,  $1\frac{1}{2}$  m. out, bear  $\gamma$ . Gradual undulating ascent for  $3\frac{1}{2}$  m., followed by a m. of downhill running to a small br., thence again an undulating road for 2 m., and a slight ascent to Duisdale ( $3\frac{1}{2}$  m.). At about a m. further, a road leaves on  $\angle$  for Isle Oronsay pier, etc. Keep forward, having an ascending road for  $1\frac{1}{2}$  m. and a long descent to the shore at Knock Bay ( $4-12\frac{1}{2}$ ). There is a subsequent undulating rise towards Sleat and a short descent by Sleat Ch. ( $1\frac{3}{4}-14\frac{1}{4}$ ), with a re-ascent towards Kilbeg ( $\frac{3}{4}-14\frac{3}{4}$ ). From here the road descends to the level before Armadale Castle ( $1\frac{1}{2}-16\frac{1}{4}$ ), and is thereafter a succession of short, but stiffish rise and fall to Ardavasar Inn ( $1-17\frac{1}{4}$ ). Beyond this the road degenerates into a mere track. The surface from Broadford is fair as a whole, but here and there it is rather apt to be soft and loose.
- (d) **UIG TO STAFFIN INN (VIA KILMALUAG).**—This is a very hilly, poor road. On the ascent from Uig Inn, northward, keep to  $\angle$  at branch-roads, at about  $1\frac{1}{4}$  m. The top of the hill is soon reached, and the road descends for nearly  $1\frac{1}{2}$  m., rises, and again falls to Kilvaxter Inn ( $5\frac{1}{2}$  m.). For  $\frac{1}{2}$  m. beyond the inn, the road is easy, but it re-asends during the subsequent m., and from the hill top there is a long, quick, rough descent. Uphill to Duntulm ( $3\frac{1}{2}-9$ ) and a re-descent before Kilmaluag Inn ( $1\frac{1}{2}-10\frac{1}{2}$ ). Cross the Kilmaluag Water, thence a very arduous, up-and-down, poor road to junction with the hill-road from Uig direct. Just before the road junction, the Quirang is passed on  $\gamma$ . Bear  $\angle$  to Staffin Inn ( $6\frac{1}{2}-17$ ). As far as Kilmaluag, this road is tolerable; thereafter it is not recommended.
- (e) **THE QUIRANG.**—This is the name given to a wonderfully fantastic group of curiously-shaped rocks. Several of these huge masses of stone resemble needles, or ruined castles, or gigantic tables. One rock rises, in the form of an obelisk, to a height of fully 120 ft. The view of the sea (some 1500 ft. below) through the intervening spaces of the Quirang is very grand. There are several sheer precipices from the tableland down to the coast below. In treacherous weather it is advisable to enlist the services of a reliable guide, as, otherwise, the exploration of the Quirang is fraught with an ever-present danger. Cycles should be left by the roadside near the summit, and not taken along the narrow footpath towards the Quirang.
- (f) **THE "KILT ROCK,"** some way to the S.E. (about  $2\frac{1}{2}$  m.) of Staffin Inn, should be visited, but on foot. It is a mass of variously-coloured strata jutting out into the sea, and, in consequence of a crossing and re-crossing of the colours, resembles the tartan of a kilt—hence its name. All the cliffs around Staffin Bay are very grand, but they are best seen from a boat.

## ROUTE 350.

## PORTREE TO PORTREE.

(Circular.)

This circular road leads through some of the wildest scenery in Skye. The hills are numerous, frequently long, and several are exceedingly stiff. The surface is variable. In parts it is very fair, being hard and well set; in other parts it is loose and often very rough. The views of the Coolin Hills obtained from Bracadale are remarkably fine.

| Miles from Portree. | Places on the Road. | Mileage.        |                  | General description of the Road.                                                                                                                                                                                                                                                                                                                   |

**PORTREE TO PORTREE (CIRCULAR).** *Reverse.*—Reverse of portion of Route 349 to Sligachan Inn, where turn *r.* Descent to Coillore—dangerous. Easily-followed road to road junction, beyond Kensalroag, where bear *l.* to Dunvegan. At hotel turn *r.*, and after crossing the R. Horneval bear *l.* and keep forward to Fairy Br. Here turn sharp *r.* over the moor, and keep to *r.* on the descent beyond. Road bends to *l.* round head of Loch Greshornish; thence unmistakable to Portree, into which village bear *r.* on meeting the road from the S.

**EDITOR'S NOTES.**—(*a*) Dunvegan Castle, placed on a rock, having the sea on three sides, lies 1 m. N. of the hotel. It is said to be the oldest inhabited castle in Scotland. The Macleods of Dunvegan have entertained Sir Walter Scott, Johnson, and Boswell here, and it was here, too, that Scott wrote his plaintive "MacCrimmon's Lament."

(*b*) At Idrigill Point, to the W. across Loch Bracadale, are the striking basaltic rock formations known as "Macleod's Maidens," which were much admired by Scott during his tour in the district. They rise out of the sea in front of frowning cliffs some 700 ft. high.

## ISLE OF ORKNEY.

The roads on the "mainland" of Orkney are all good, and the gradients, as a whole, well engineered and easy. The characteristic of the road surface is firmness and solidity. The following are the distances from Kirkwall Harbour: Finstown,  $6\frac{3}{4}$  m.; Stromness, 15; Evie,  $15\frac{1}{4}$ ; Swannay,  $20\frac{3}{4}$ ; Birsay Bay (Via Finstown and Smithfield),  $19\frac{1}{2}$ ; Orphir,  $9\frac{1}{4}$ ; Deerness, 12; St. Mary's,  $6\frac{3}{4}$ ; Holm,  $8\frac{3}{4}$ . Distances from Stromness: Birsay Bay, 14 m.; Orphir, 8; Kirkwall (Via Orphir),  $17\frac{1}{4}$ . The scenery in Orkney is somewhat monotonous owing to the flatness of a greater part of the mainland, and the unbroken expanses of brown heath and heather. On the other hand the coast and island scenery is very fine, and the objects of interest, especially those connected with the old Northern Rovers, are many. The particulars of what there is to see in Orkney are too many to even mention here. Readers are referred to the ordinary guide books, the translated "Sagas," Scott's "Pirate," etc.

# ISLES OF LEWIS, SHETLAND, N. AND S. UIST, ISLAY, AND JURA.

---

**LEWIS.**—The roads on this island are, on the whole, fair, and there are no serious hills. All the routes branch from Stornoway as a centre-point. The distances from the pier at Stornoway are: Barvas,  $12\frac{1}{2}$  m.; Port of Ness, 27; Garrynahine Inn,  $14\frac{1}{4}$ ; Callernish Inn,  $16\frac{1}{4}$ ; Carloway,  $22\frac{1}{2}$ . In the southern portion of the island, known as Harris, the road surface is much poorer. The surface of Lewis is, on the whole, flat, and there are a remarkable number of small lochs. There are, too, vast plains, unbroken save by the lochs, of peat moss of a soft and spongy nature. The only town on the island is Stornoway, but there are fairly good hotels at Barvas and Garrynahine, and at Tarbert (36 m. from Stornoway) in Harris.

**SHETLAND.**—The roads on the mainland of Shetland are, on the whole, fair, but have not the same general excellence as the Orkney roads. One of the best runs from Lerwick to Scalloway (6 m.) and back, going by one road and returning by the other. Shetland is mostly clad in a dark brown heath, but is not all flat, there being several considerable hills. The cliff scenery is magnificent, but this, of course, is best seen from a boat.

**N. AND S. UIST.**—The roads are narrow but have a fair surface generally. N. Uist, Benbecula, and S. Uist are separated from each other at high tide only; at low water the intervening sands may be crossed, but this should not be attempted without a guide who is familiar with the tides, etc. There is an hotel at Lochmaddy and there are inns at Gramisdale and Greagorry in Benbecula, and at Loch Boisdale and Castle Bay in S. Uist. Distances from Lochmaddy—Tighary, 16 m.; Carinish, 11; Portnalong Inn,  $8\frac{3}{4}$ ; Paible, 13. In Benbecula:—Gramisdale to Greagorry, 6 m. In S. Uist the distances from Lochboisdale are:—Pollachar,  $7\frac{1}{2}$  m.; Howmore,  $12\frac{3}{4}$ ; and N. end of the island, 20.

**ISLAY.**—The road between Bowmore and Port Charlotte, by Bridgend, is a good one; for the rest, the average condition is very fair. There is a *dangerous* hill at Port Askaig. The following are the distances from Port Askaig:—Port Charlotte,  $15\frac{3}{4}$ ; Portnahaven,  $22\frac{3}{4}$ ; Bridgend, 8; Bowmore,  $10\frac{3}{4}$ ; and Port Ellen, 19. There are inns at all the places named, except Port Charlotte. The ferry from Jura is only  $\frac{1}{2}$  m. across.

**JURA.**—The only really rideable road on Jura is that by the coast from Craighouse Inn to Faolin (8 m.). The extension N. to Lagg Inn is in a very rough and poor condition the whole way, 9 m.

# SECURITY TO CYCLISTS TOURING!

## NO MORE BROKEN CHAINS!

AVOID ACCIDENTS BY ADOPTING THE

# FOLEY CYCLE BRAKE

(PATENT).

This Brake is now being taken up all over the world. Testimonials received daily.

It possesses STRENGTH, DURABILITY, SIMPLICITY, LIGHTNESS, and NEATNESS of appearance.

The Brake is instantaneously applied or released by the forward or backward motion of the pedals, and is fitted to the wheel hub in such a manner that it forms part of same.

In its construction it is so arranged that all the working parts are closed in, keeping them free from dust and grit, and there are only three principal parts added to the hub, these weighing less than 4oz.

There is no side strain either on the hub or spindle when the Brake is applied.

The strain on the chain while going down hill being about a quarter of that required when riding a machine without a Brake, hence the danger of breaking chain is reduced to a minimum.

## ORIGINAL AND ONLY GENUINE

# CHLORODYNE.

**C**OUGHES,  
**C**OLDS,  
**A**STHMA,  
**B**RONCHITIS.

ORIGINAL AND

ONLY GENUINE

**D**R. J. COLLIS BROWNE'S CHLORODYNE.—This wonderful remedy was discovered by Dr. J. COLLIS BROWNE, and the word CHLORODYNE coined by him expressly to designate it. There never has been a remedy so vastly beneficial to suffering humanity, and it is a subject of deep concern to the public that they should not be imposed upon by having imitations pressed upon them on account of cheapness, and as being the same thing.

**D**R. J. COLLIS BROWNE'S CHLORODYNE.—Vice-Chancellor Sir W. PAGE WOOD STATED PUBLICLY in Court that Dr. J. COLLIS BROWNE was undoubtedly the INVENTOR of CHLORODYNE, that the whole story of the defendant was deliberately untrue, and he regretted to say it had been sworn to.—See *The Times*, July 13th, 1864.

**G**REAT SPECIFIC for  
**C**HOLERA, DYSENTERY,  
**D**IARRHŒA.

The GENERAL BOARD of HEALTH, London, Report that it ACTS as a CHARM, one dose generally sufficient.

Dr. GIBSON, Army Medical Staff, Calcutta, states:—"TWO DOSES COMPLETELY CURED ME of DIARRHŒA."

**D**R. J. COLLIS BROWNE'S CHLORODYNE is the TRUE PALLIATIVE in

**N**EURALGIA, GOUT, CANCER,

**T**OOTHACHE, RHEUMATISM.

"Royal Irish Fusiliers, Cork,  
 "Feb. 6th, 1896.

"DEAR SIR,—I wish to give public testimony to the infinite value which your remedy for Dysentery and Diarrhœa (Dr. Browne's Chlorodyne) proved to several members of the Special Service Corps, in the recent Ashanti Expedition. I bought a small bottle just before leaving London for West Africa, and having used it myself with beneficial result, treated some of my comrades with equal success (though some of them were very bad). I should be very glad to recommend it to any one about to travel in a treacherous climate, where they are so much exposed to this dangerous malady.

"Gratefully yours,

"G. SMITH,

"Band, R.I.F."

The ILLUSTRATED LONDON NEWS of Sept. 28, 1895, says:

"If I were asked which single medicine should prefer to take abroad with me, as likely to be most generally useful, to the exclusion of all others, I should say CHLORODYNE. I need not travel without it, and its general applicability to the relief of a large number of simple ailments forms its best recommendation."

**I**MPORTANT CAUTION.

The IMMENSE SALE of the REMEDY has given rise to many UNSCRUPULOUS IMITATIONS.

N.B.—EVERY BOTTLE OF GENUINE CHLORODYNE BEARS on the GOVERNMENT STAMP the NAME of the INVENTOR,

**D**R. J. COLLIS BROWNE.

SOLD IN BOTTLES, 1s. 1½d., 2s. 9d., 4s. 6d., by all Chemists.

Sole Manufacturer, J. T. DAVENPORT, 33, Great Russell Street, W.
